

BUILD INSTRUCTIONS

Polynesian Village Resort

A mid-size display model in LEGO® bricks

614
pieces

26 × 19 cm
32 × 24 studs

Unofficial fan design

An unofficial fan-designed model (MOC), inspired by Disney's Polynesian Village Resort at Walt Disney World. It is not affiliated with, sponsored or endorsed by The LEGO Group or Disney. LEGO® is a trademark of The LEGO Group.

About this model

The arrival front of the Polynesian, as a guest sees it from the drive: the Great Ceremonial House with its very tall, steep thatched roof and the dark timber gable with tall windows facing you, and in front of it the porte-cochere, a steep thatched gable of its own on dark timber posts over the drive, so the two peaked gables stack one behind the other. Lava-rock walls with small waterfalls frame the entrance on both sides, with palms and planting around them, and tiki torches with glowing tips line the lawn along the front.

Pieces	614 elements, 51 kinds, 11 colours
Size	32 × 24 studs (25.6 × 19.2 cm), 15 cm tall
Scale	about 1:250 (one storey = 4 plates, 1 stud ≈ 2 m), like the large resort models
Build time	about 2 to 2½ hours
Model files	polynesian_midsize.mpd (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The display base, the drive and the lawns
2. The Great Ceremonial House
3. The porte-cochere
4. The lava-rock walls (build 2)
5. The tiki torches, the palms and the planting (build 6 torches and 4 palms)

Every kit in the mid-size resort collection stands on the same 32×24 display base with a black front band. Each section starts with a list of the parts it needs.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- The roofs go up one course at a time: first the dark tan plates, then the tan slopes on them, then the reddish brown bricks of the gables at the front and back.
- Each slope sits on the plate or slope below it. Press every slope down firmly before the next plates go on: they lock the slopes together.
- The porte-cochere stands on its four posts over the drive, just in front of the entrance; its ridge beam reaches the gable of the Great Ceremonial House.
- A **"Build 2"**, **"Build 4"** or **"Build 6"** badge means you build that module that many times.

Getting the parts

Every element is listed with its LEGO Element ID in the inventory at the back, and in parts/ as CSV and BrickLink XML files. See "Ordering the parts" on the last pages.

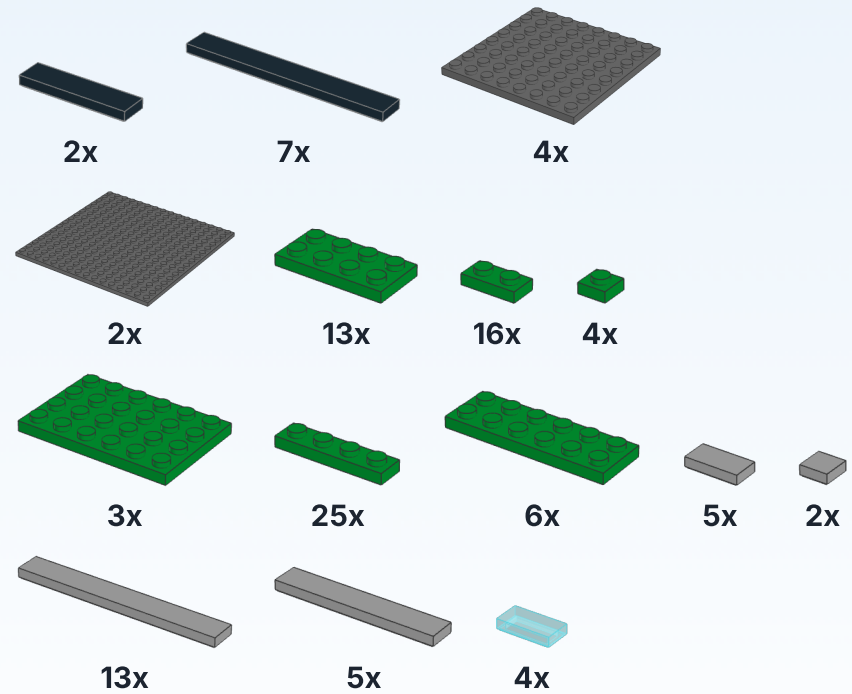

1

The display base

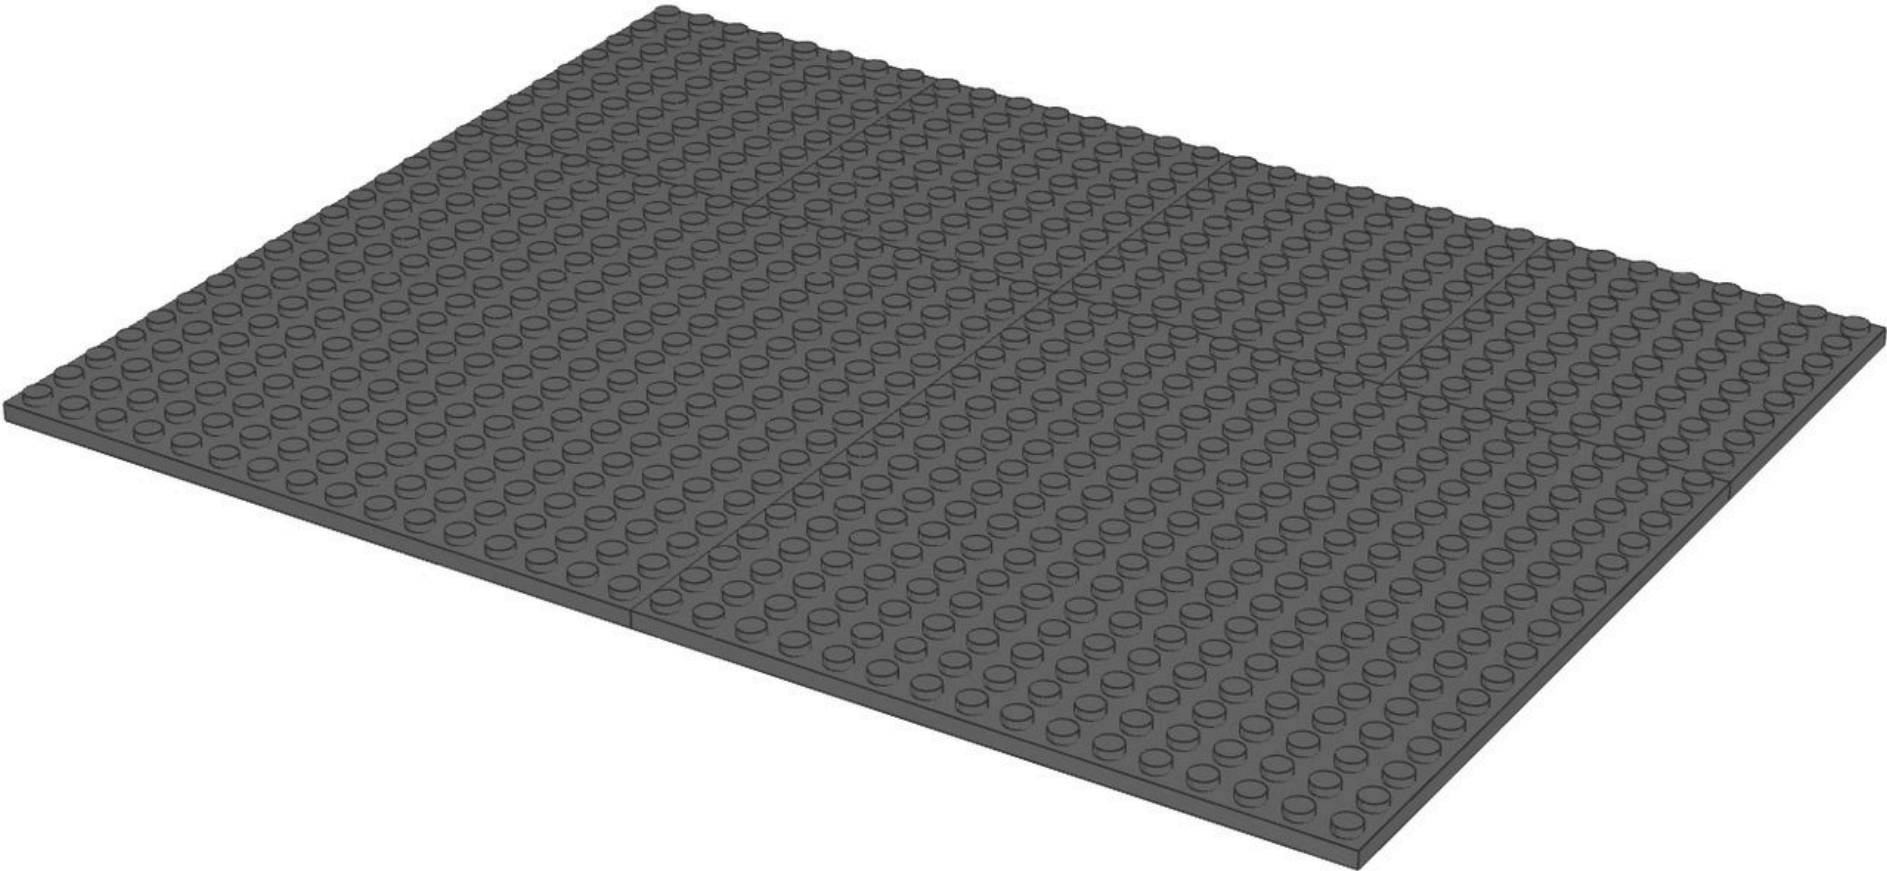

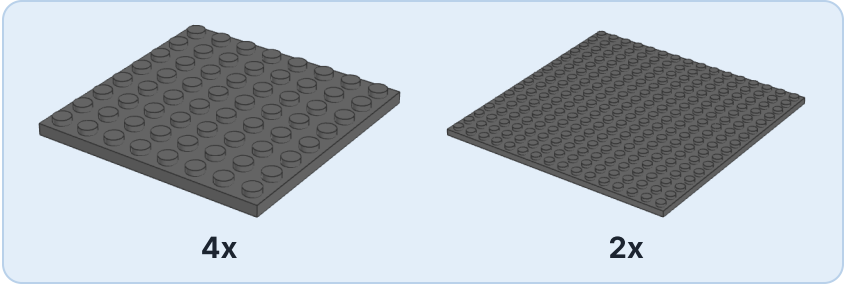

The base and the black band are the same for every mid-size kit. The drive, the pools and the lawns go on next; the drive tiles tie the base plates together.

111 elements in this section

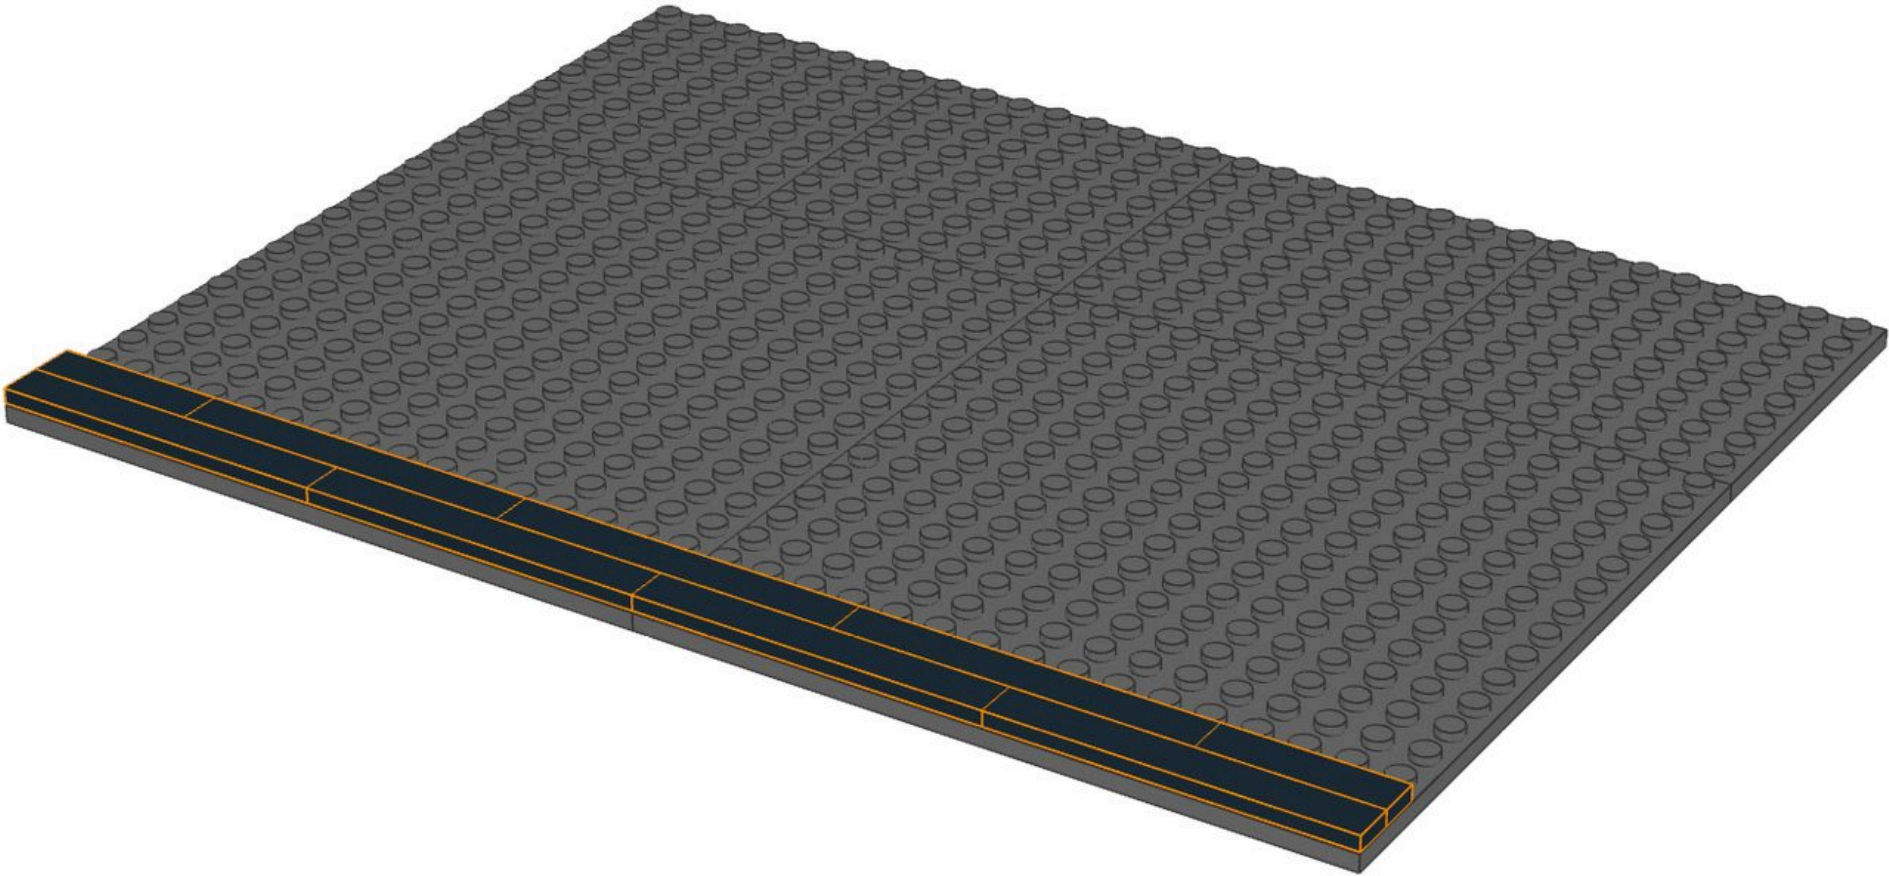

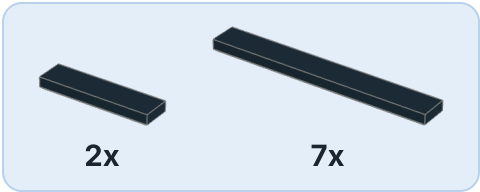

PARTS FOR THIS SECTION

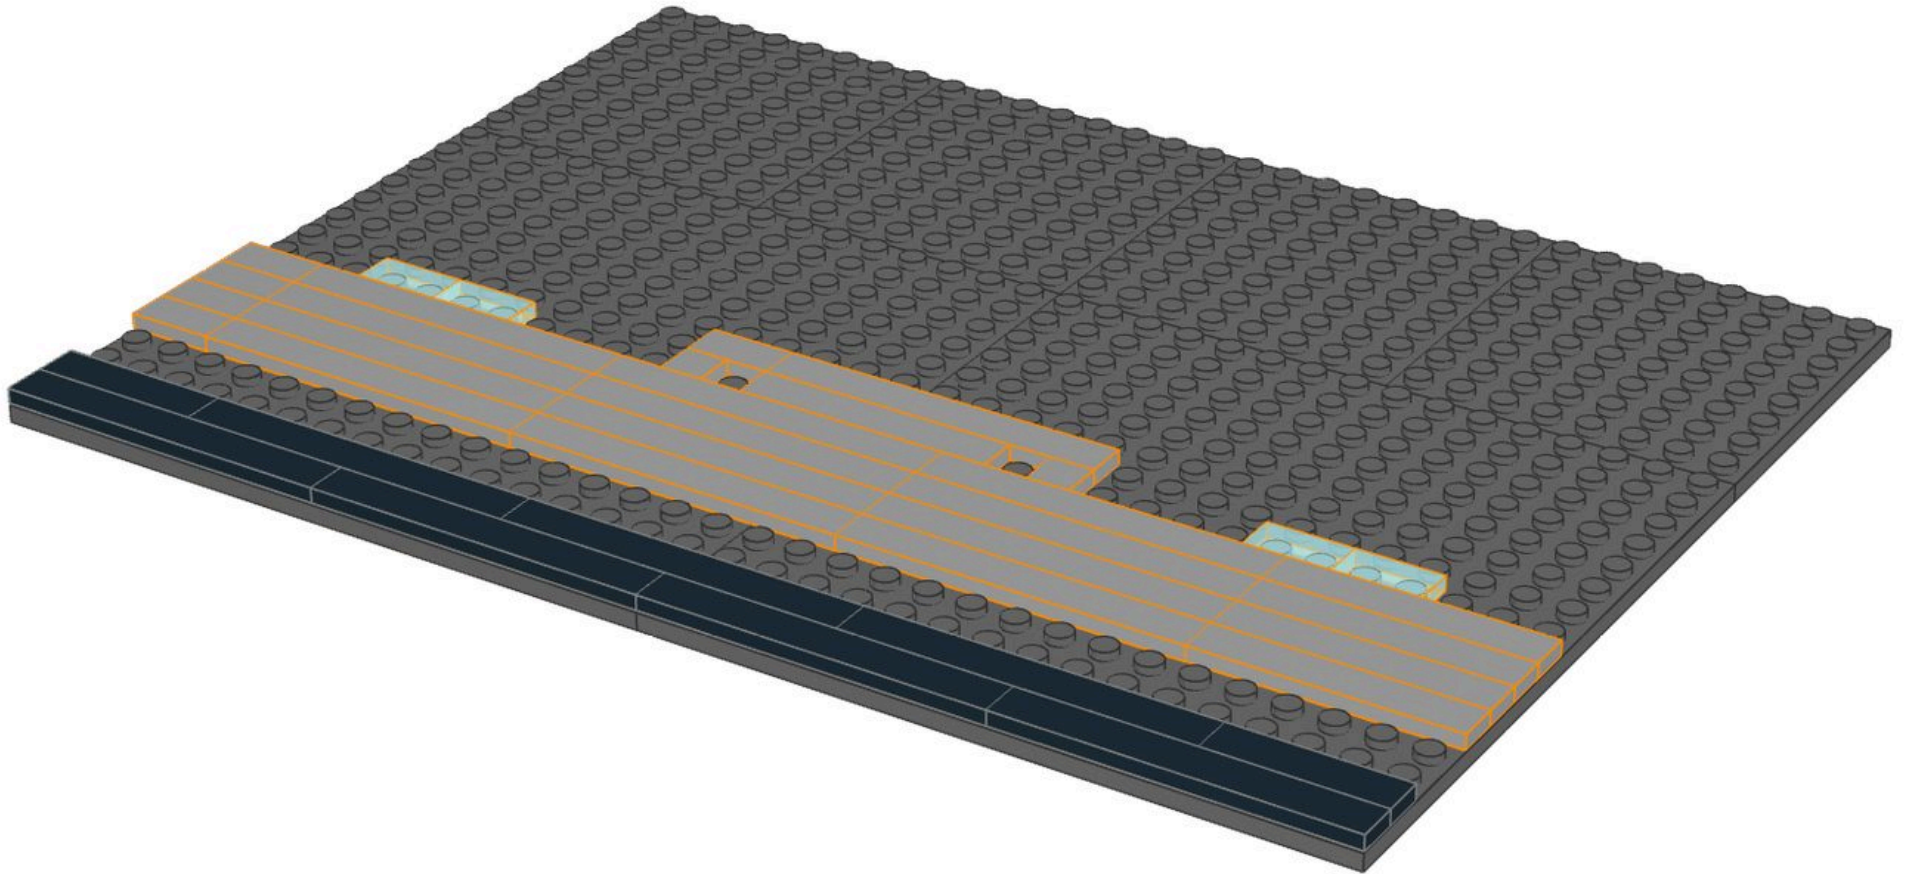

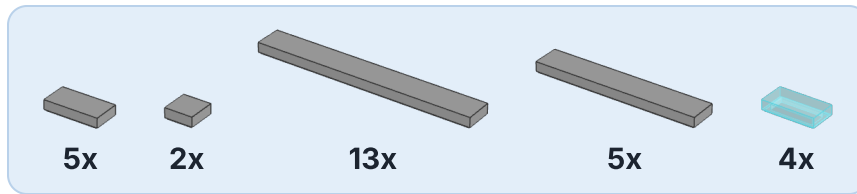

1

2

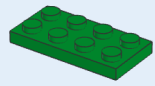

3

The drive tiles run across the seam between the two big base plates.

2

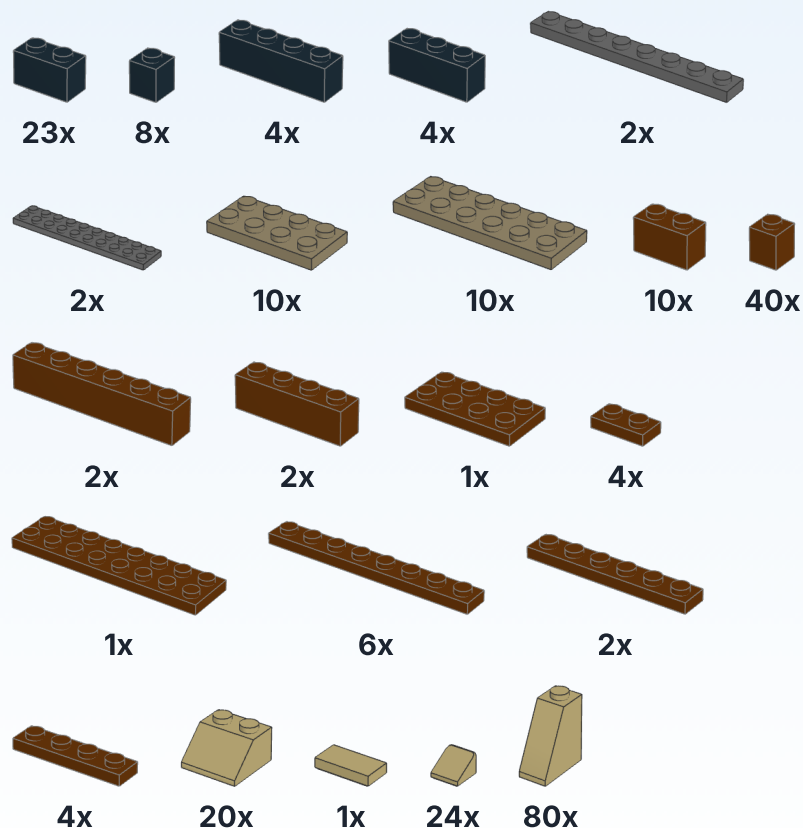

The Great Ceremonial House

Two storeys of timber posts and glass, then the steep roof one course at a time: two flared courses of 45-degree slopes at the eaves, then four courses of 65-degree slopes, each on a dark tan plate, with the timber gables and their tall windows between them.

The porte-cochere

Four dark timber posts carry a ring of beams, then a steep thatched roof in four layers with timber gables. It stands over the drive in front of the entrance.

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

1. Go to **lego.com** → **Pick and Build** → **Pick a Brick** and choose **Upload list**.
2. Upload parts/pick_a_brick_upload.csv. It lists all 51 kinds of element by Element ID with their quantities, and fills your bag in one go.
3. If anything isn't matched, upload pick_a_brick_upload_retry.csv. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in Pick a Brick's Bestseller range, which ships from the US warehouse.

2 · BrickLink or Rebrickable (backup)

The files in parts/ cover anything Pick a Brick does not stock:

- bricklink_wanted_list.xml: BrickLink → Want → Upload.
- rebrickable_parts.csv: import it as a Rebrickable part list, then compare stores.
- pick_a_brick_mapping.csv: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 614 elements with a known price come to about **US\$74**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Ground:** any colour of tiles works for the base around the building.
- **Hidden parts:** bricks and plates inside the building can be any colour.

Colour names

In this booklet	LEGO name	BrickLink
Tan	Brick Yellow	Tan
Dark Tan	Sand Yellow	Dark Tan
