BUILD INSTRUCTIONS

Craftsman Bungalow

A one-and-a-half-storey Craftsman house with a stone porch, in LEGO® bricks

696
pieces

38 × 26 cm
48 × 32 studs

Unofficial fan design

An unofficial fan-designed model (MOC), made from a photo of a Craftsman-style house. It is not affiliated with, sponsored or endorsed by The LEGO Group. LEGO® is a trademark of The LEGO Group.

About this model

This model recreates the Craftsman bungalow in the photo: sage-green siding with white trim under a dark grey roof, the front-gable bay with its stone skirting and wide lit window, the big front-gable dormer and the small shed dormer beside it, and the porch across the front with white columns on chunky stone piers, a white railing, a wooden door and steps between stone cheeks. The lot has the curved walk, mulch beds with hydrangeas, hostas and shrubs, a big shade tree on the lawn, the sidewalk and curb, a mailbox, the driveway with a grey SUV and a wooden privacy fence.

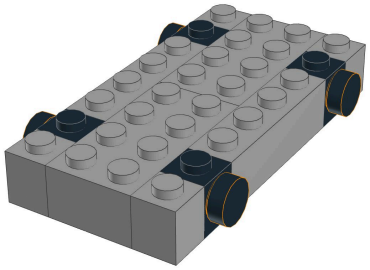

Pieces	696 elements, 118 kinds, 16 colours
Size	48 × 32 studs (38.4 × 25.6 cm), 12 cm tall
Scale	about 1:76 (1 stud = 2 ft, one storey = 4 bricks)
Build time	about 4 to 5 hours
Model files	`craftsman_house.mpd` (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The lot: base, street, curb and sidewalk
2. The house: walls, windows and porch
3. The upper storey and the roofs: dormers, porch roof and main roof
4. The yard: driveway, walk, mulch beds and lawn
5. The shade tree
6. The garden: shrubs and flowers, mailbox and fence
7. The car

The house, its upper storey and roofs, the tree and the car are built on their own and then set on the lot. Every section starts with a list of the parts it needs.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- The stone parts are masonry-profile 1×2 bricks in three colours. The exact colour order doesn't matter, so mix them as you like.
- Each white column sits on the single centre stud of a tan 2×2 jumper plate on top of its stone pier, so it stands in the middle of the pier. Its top stud goes into the white ceiling plate above.
- The orange bricks behind the big windows are the lit rooms. Slide the clear glass into each white window frame before you place it.
- The roofs go on one row of slopes at a time. Where the bay, the dormers and the main roof meet, the slopes step around each other to form the valleys, and a few hidden bricks hold up the slopes above them.

Getting the parts

Every element is listed with its LEGO Element ID in the inventory at the back, and in `parts/` as CSV and BrickLink XML files. See “Ordering the parts” on the last pages.

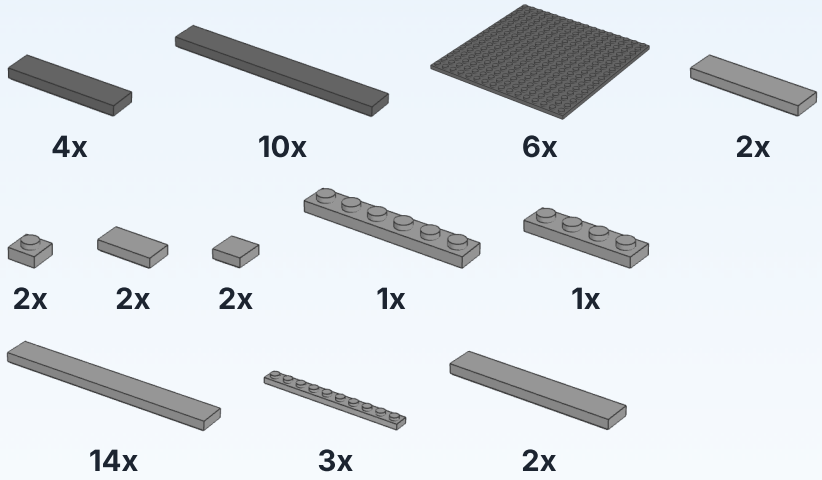

1

The lot

Six 16 × 16 plates make the base. The street, the curb and the sidewalk lock the front plates together; the house locks the back ones.

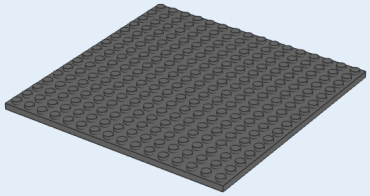

49 elements in this section

PARTS FOR THIS SECTION

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

1. Go to **lego.com → Pick and Build → Pick a Brick** and choose **Upload list**.
2. Upload `parts/pick_a_brick_upload.csv`. It lists all 118 kinds of element by Element ID with their quantities, and fills your bag in one go.
3. If anything isn't matched, upload `pick_a_brick_upload_retry.csv`. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in Pick a Brick's Bestseller range, which sells up to 999 of an element per order.

2 · BrickLink or Rebrickable (backup)

The files in `parts/` cover anything Pick a Brick does not stock:

- `bricklink_wanted_list.xml`: BrickLink → Want → Upload.
- `rebrickable_parts.csv`: import it as a Rebrickable part list, then compare stores.
- `pick_a_brick_mapping.csv`: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 696 elements with a known price come to about **US$114**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Base:** six 16×16 plates. Any plates that cover 48×32 studs will do.
- **Stone:** mix the three colours of masonry bricks freely; plain bricks work too.
- **Hidden parts:** the plinth, the ceiling and roof decks and the fillers under the roofs can be any colour.
- **Car:** pick any colour to match your own car.
