

BUILD INSTRUCTIONS

Animal Kingdom Lodge

560
pieces

26 × 19 cm
32 × 24 studs

A mid-size display model in LEGO® bricks

Unofficial fan design

An unofficial fan-designed model (MOC), inspired by Disney's Animal Kingdom Lodge at Walt Disney World. It is not affiliated with, sponsored or endorsed by The LEGO Group or Disney. LEGO® is a trademark of The LEGO Group.

About this model

The arrival front of Jambo House at Animal Kingdom Lodge, as a guest sees it from the drive: the porte-cochere over the drive, a tall, steep, thatched kraal-style roof on heavy timber posts; the lobby behind it, a timber-framed glass front under a two-tier thatched roof with a clerestory of timber and glass; and the guest wings with dark timber balconies and hipped roofs, stepping back and down on both sides like the curving horseshoe. An acacia, a rock outcrop and grasses stand on the lawn by the drive.

Pieces	560 elements, 56 kinds, 6 colours
Size	32 × 24 studs (25.6 × 19.2 cm), 14 cm tall
Scale	about 1:250 (one storey = 4 plates, 1 stud ≈ 2 m), like the large resort models
Build time	about 2 to 2½ hours
Model files	animal_kingdom_lodge_midsize.mpd (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The display base, the drive and the lawns
2. The lobby
3. The inner guest wings (build 2)
4. The outer guest wings (build 2)
5. The porte-cochere
6. The acacia, the rocks and the grasses

Every kit in the mid-size resort collection stands on the same 32×24 display base with a black front band. Each section starts with a list of the parts it needs.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- The thatched roofs go up one ring of steep slopes at a time. Hidden tan bricks inside each ring hold up the next one; they have a step of their own.
- On the guest wings, each balcony railing is a reddish-brown tile one stud in front of the black glass; the floor plates above tie the walls together.
- The finials sit on plates with one centre stud, half a stud off the grid.
- A **"Build 2"** badge means you build that module twice.

Getting the parts

Every element is listed with its LEGO Element ID in the inventory at the back, and in parts/ as CSV and BrickLink XML files. See "Ordering the parts" on the last pages.

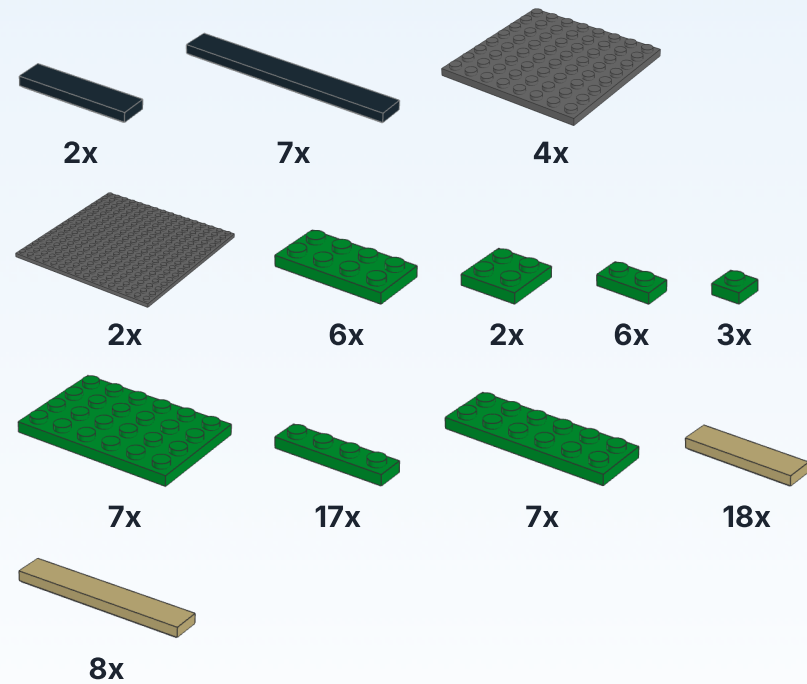

1

The display base

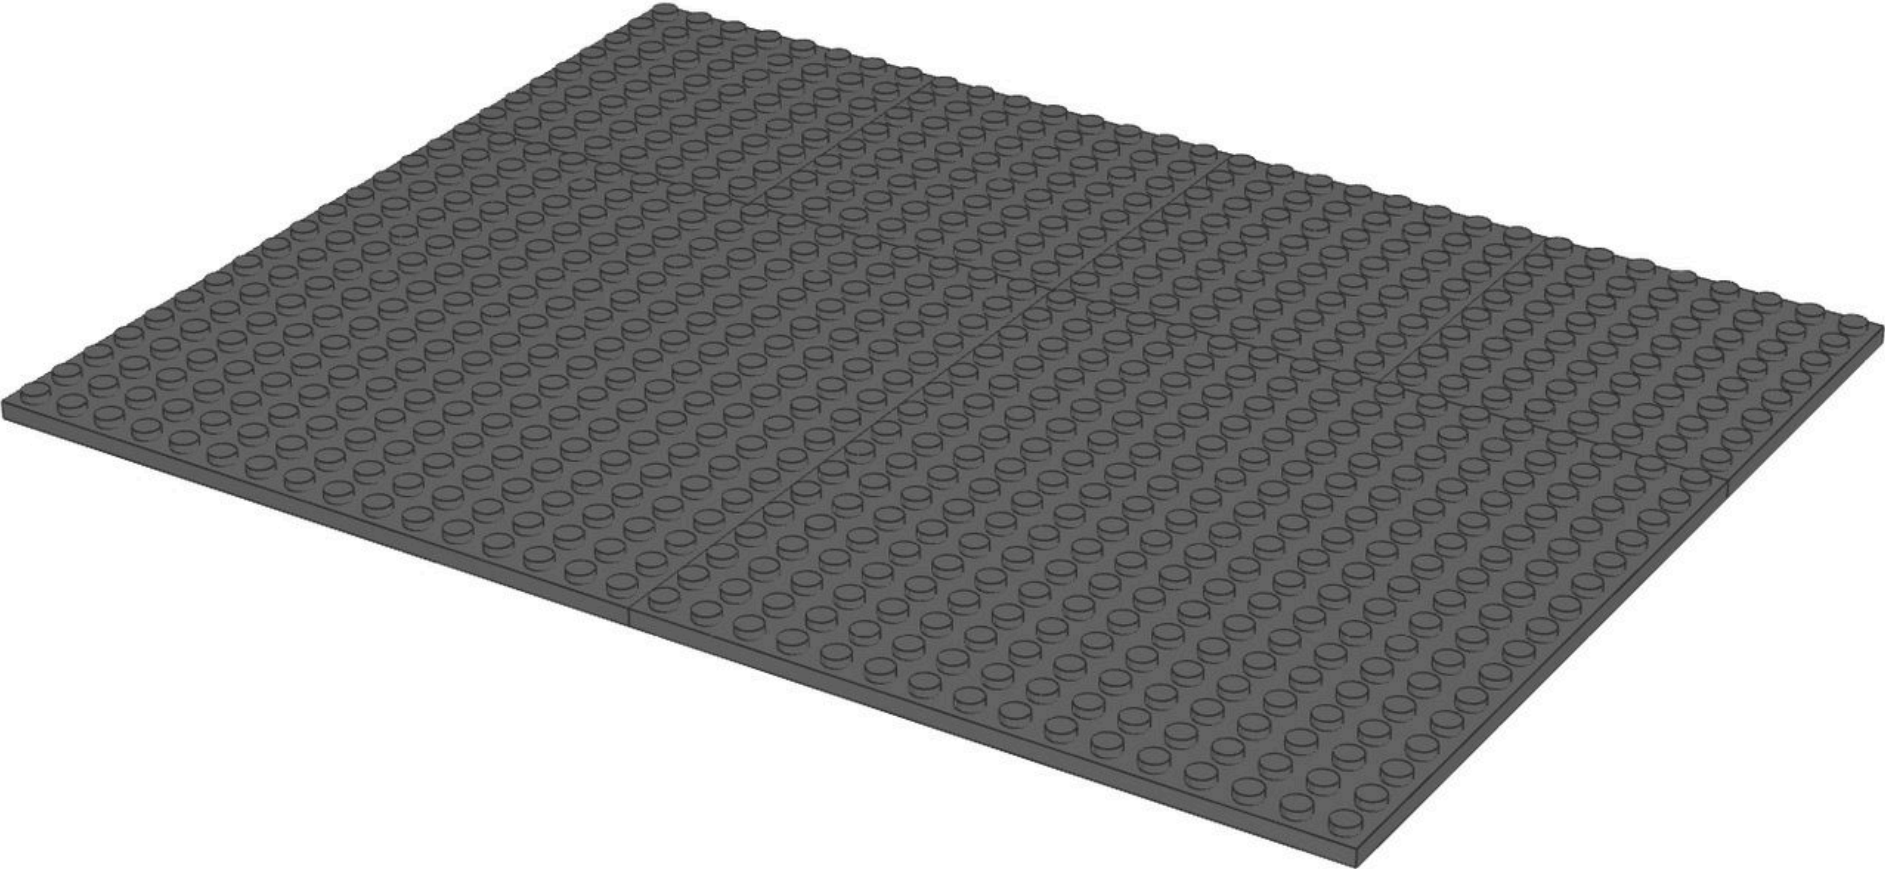

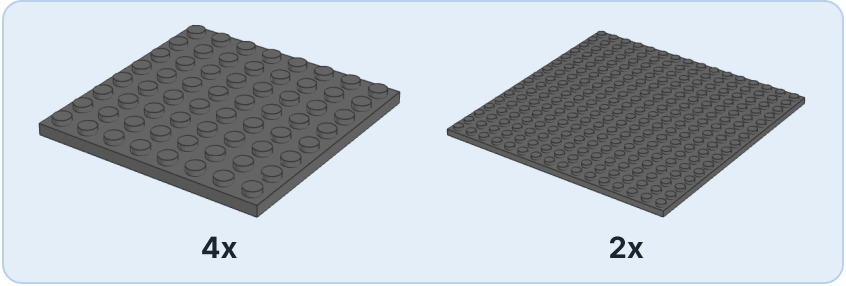

The base and the black band are the same for every mid-size kit. The drive, the entrance and the lawns go on next.

89 elements in this section

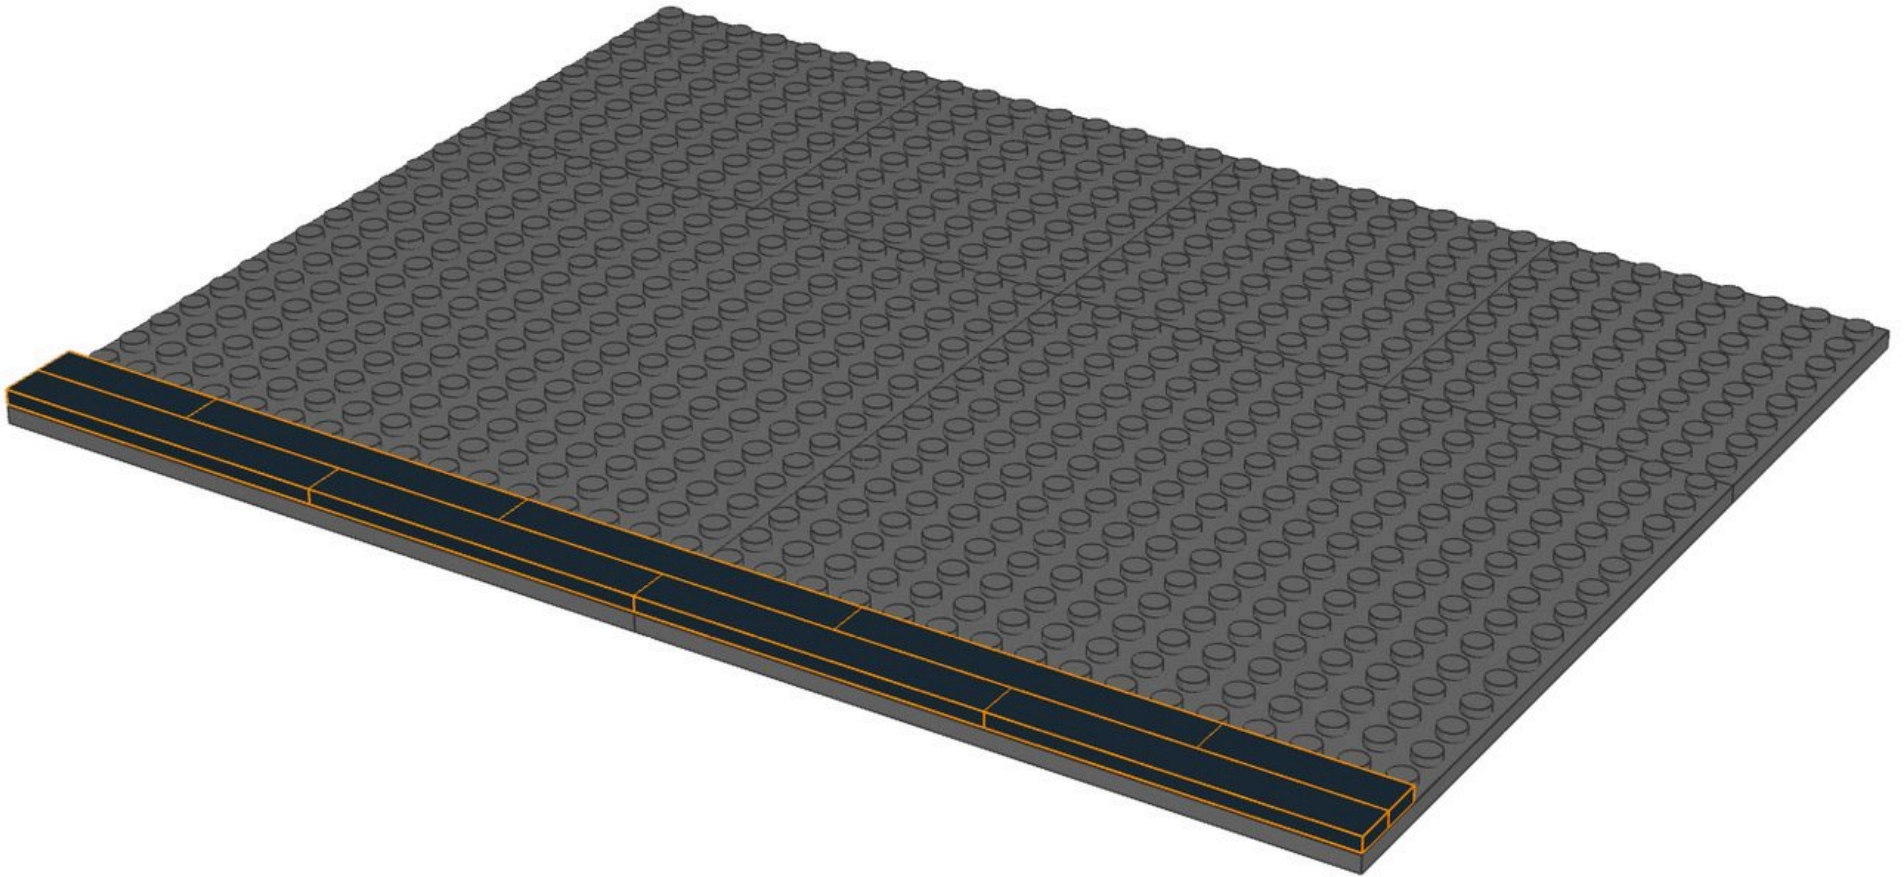

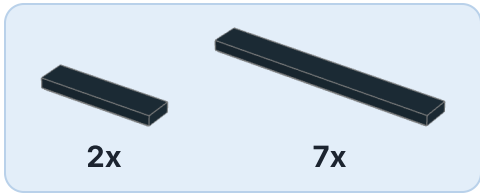

PARTS FOR THIS SECTION

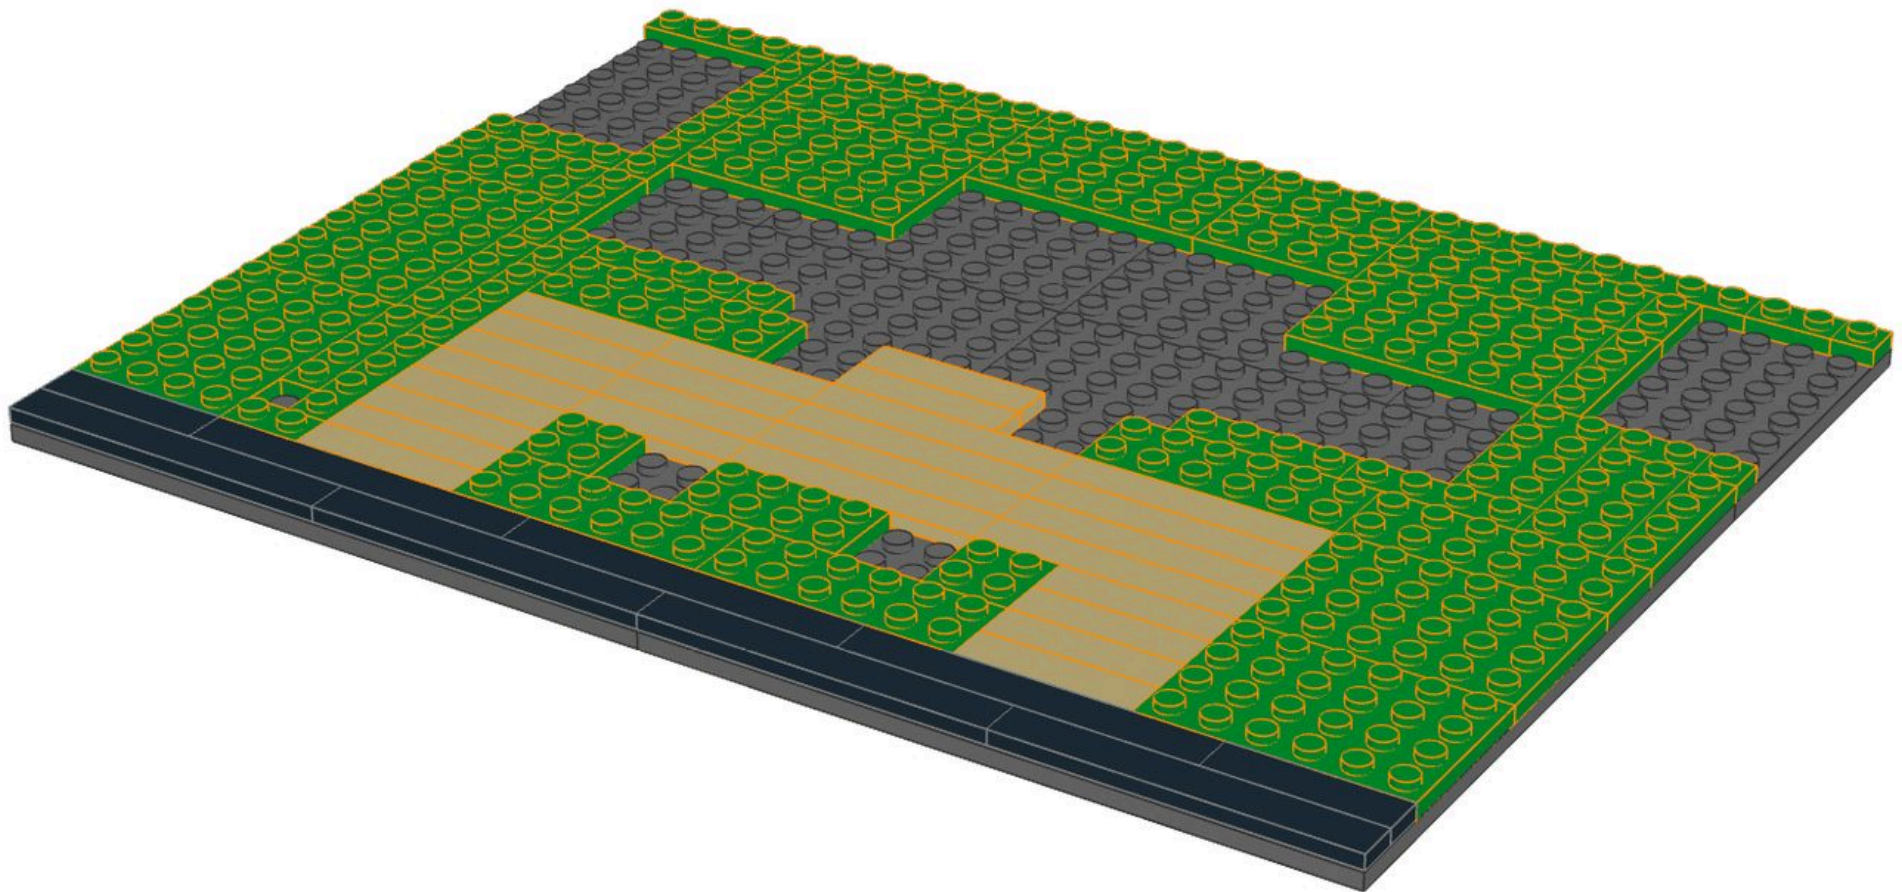

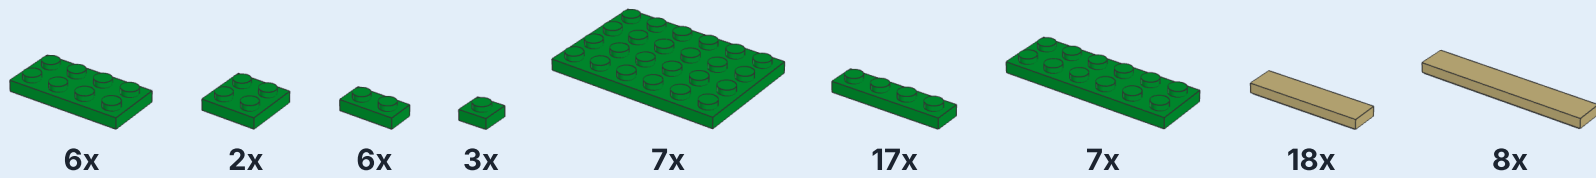

1

2

3

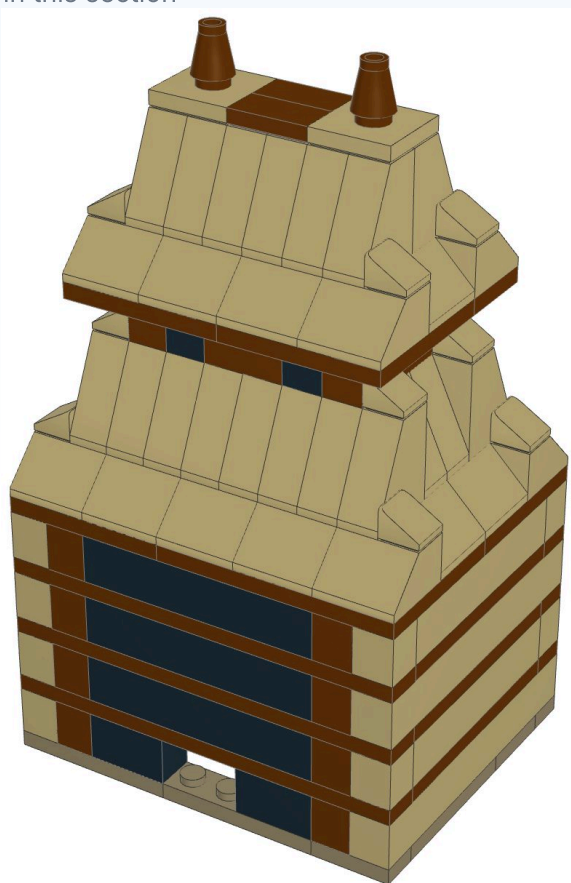

2

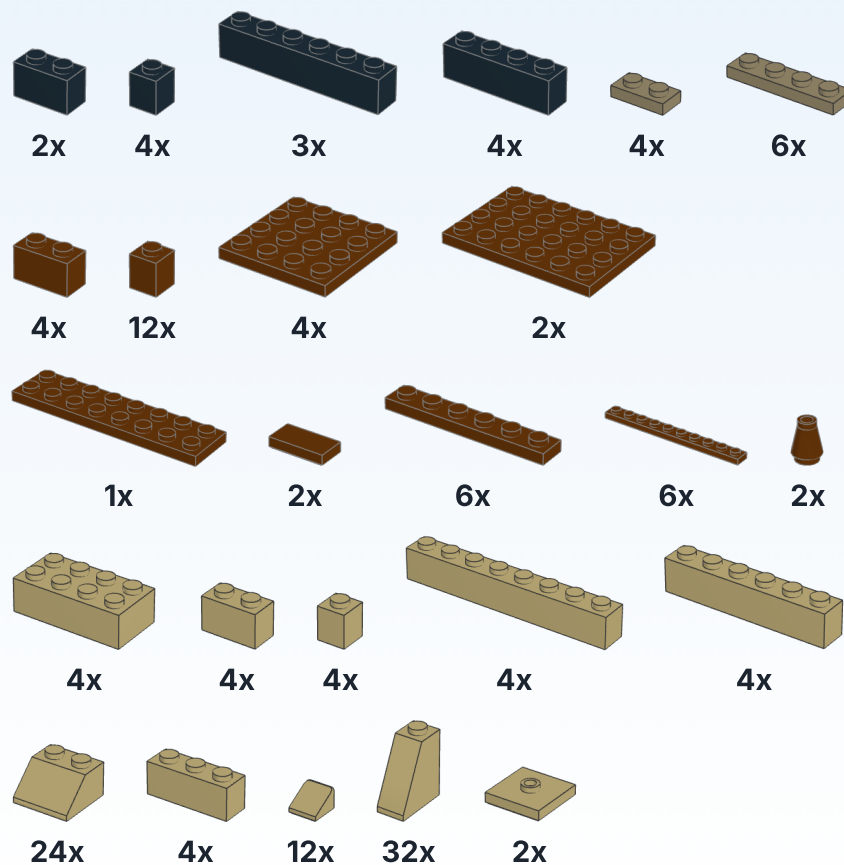

The lobby

Four storeys with a timber-framed glass front, then the two-tier thatched roof: an eave and a ring of steep slopes, the clerestory of timber and glass, the upper roof on its timber deck, and the ridge.

50

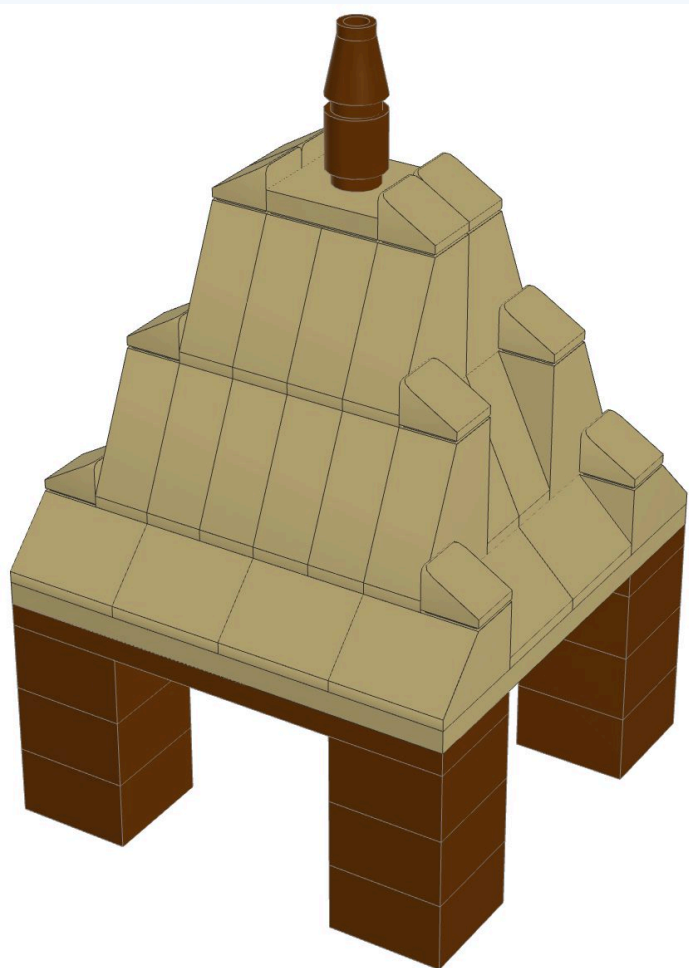

5

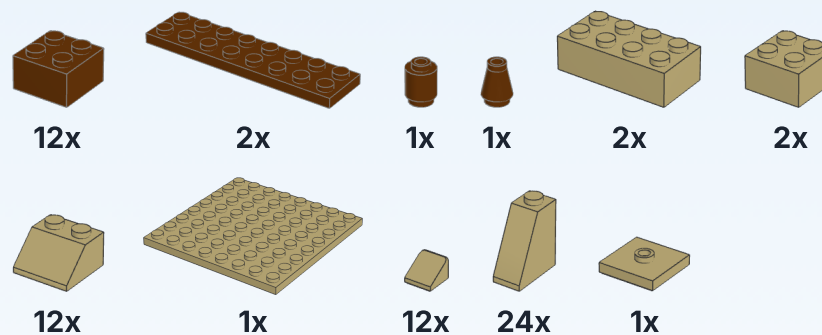

The porte-cochere

Four heavy timber posts, two timber beams and a deck carry the tall, steep thatched roof with its timber finial.

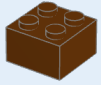

70 elements in this section

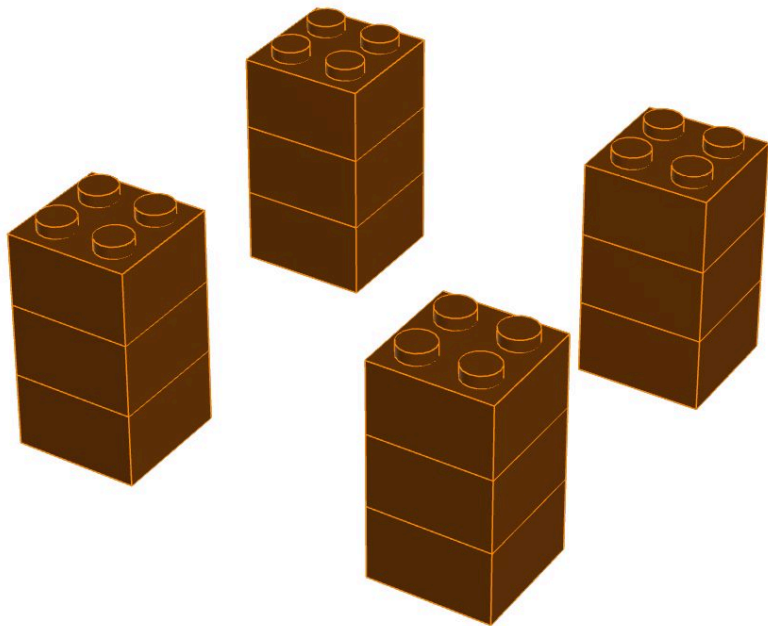

PARTS FOR THIS SECTION

51

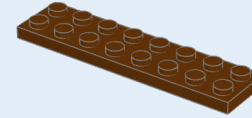

12x

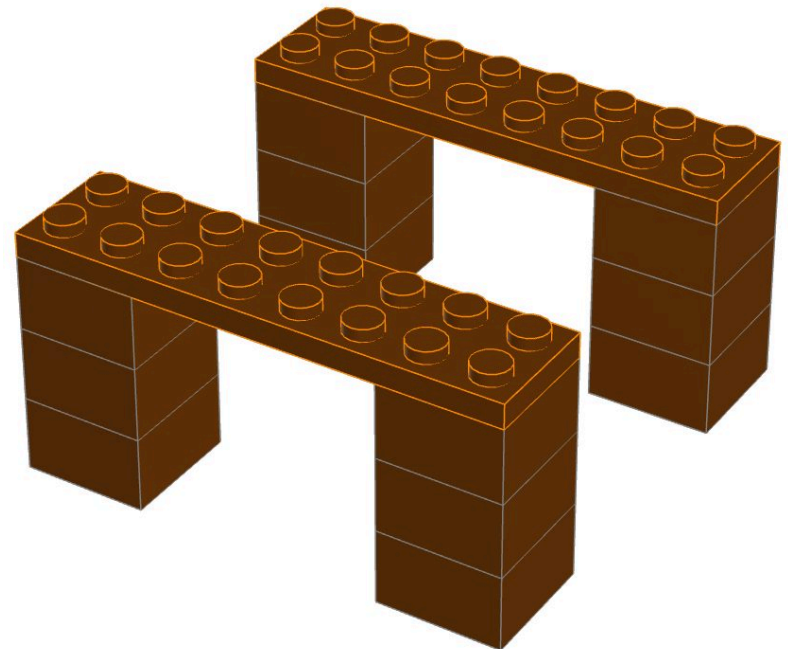

Heavy timber posts: three 2x2 bricks each.

52

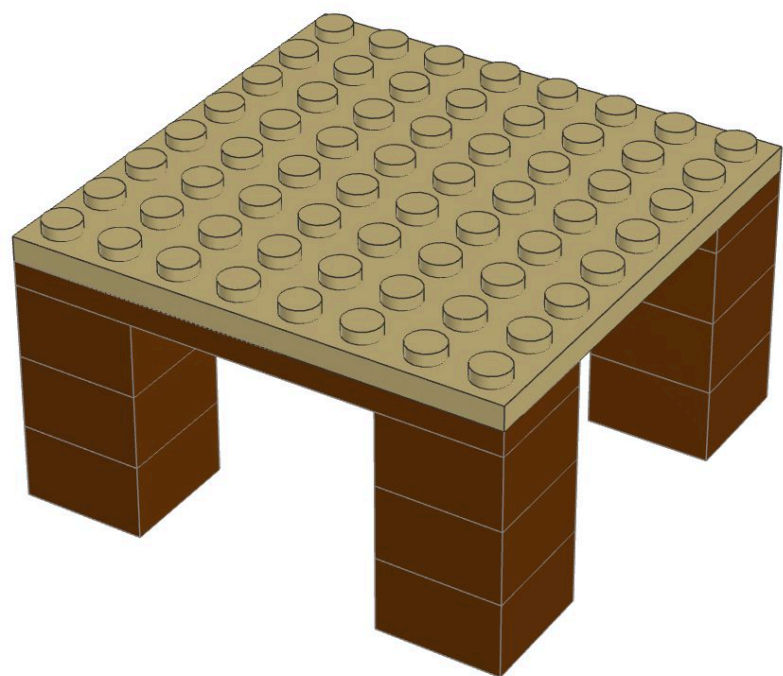

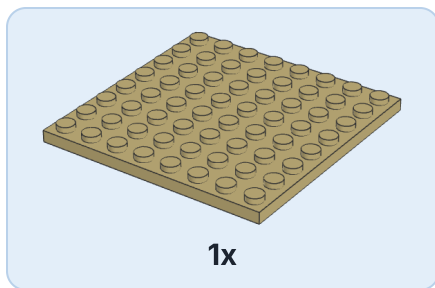

2x

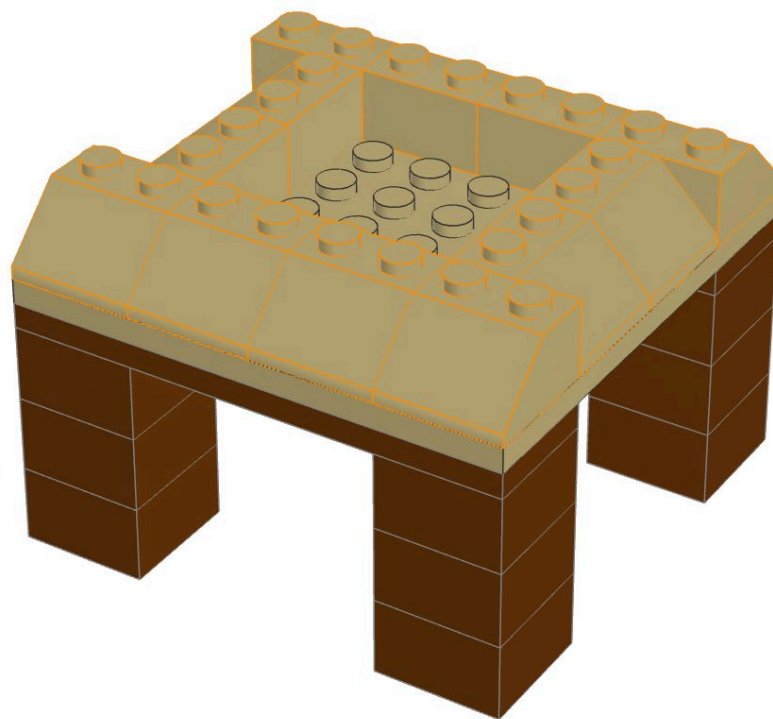

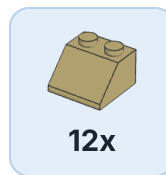

Timber beams join the posts in pairs, front and back.

53

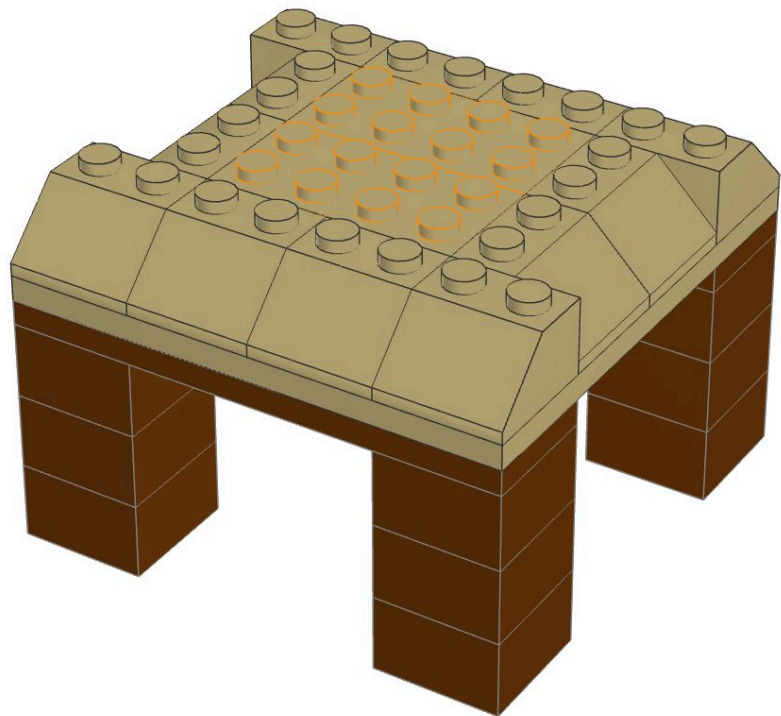

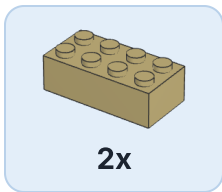

54

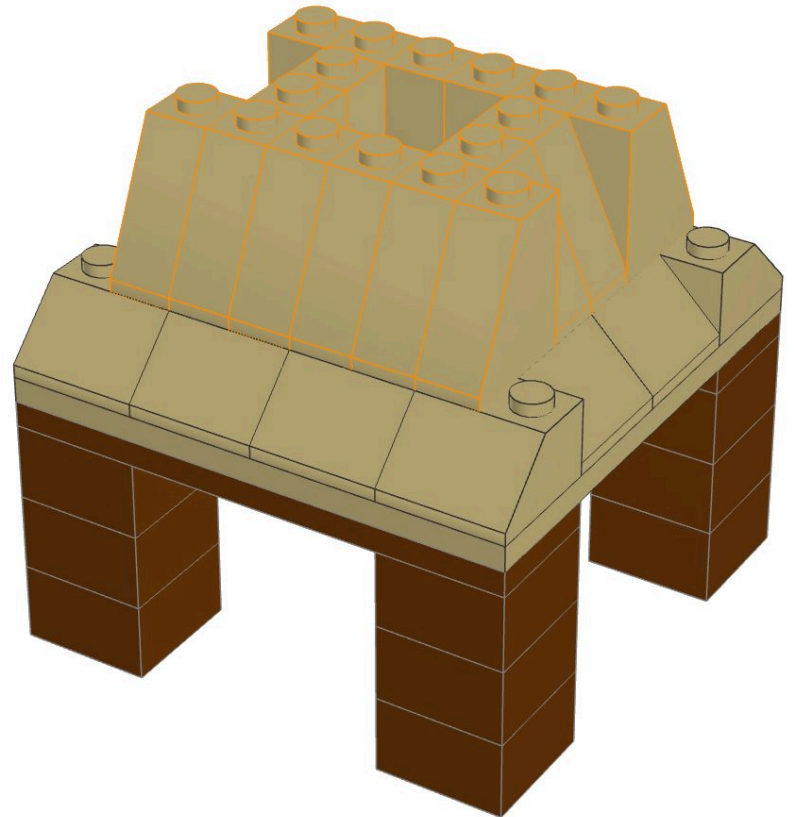

The deck: one 8x8 plate across the beams.

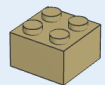

55

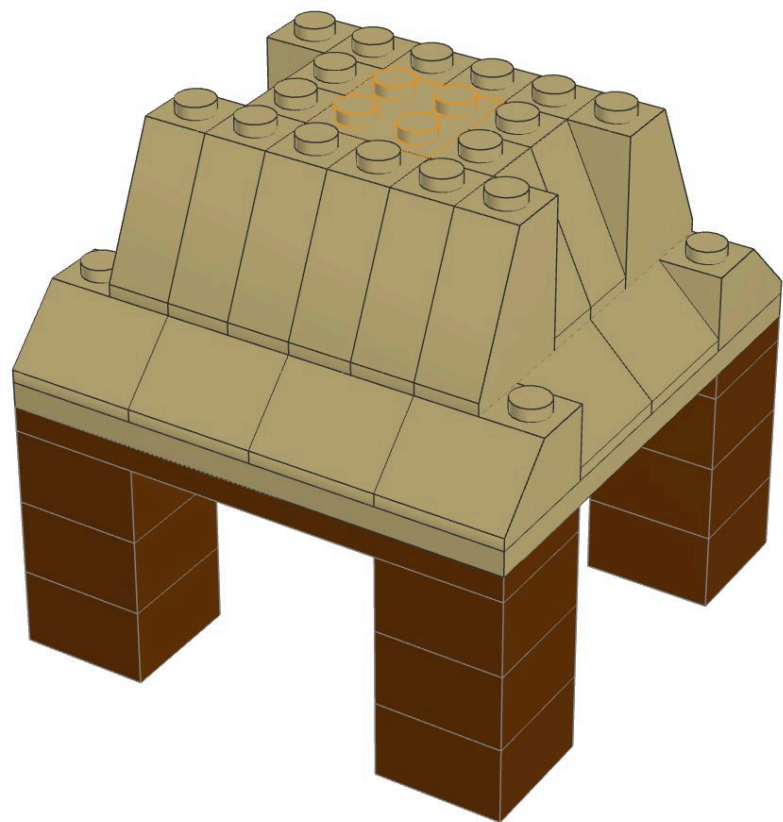

56

57

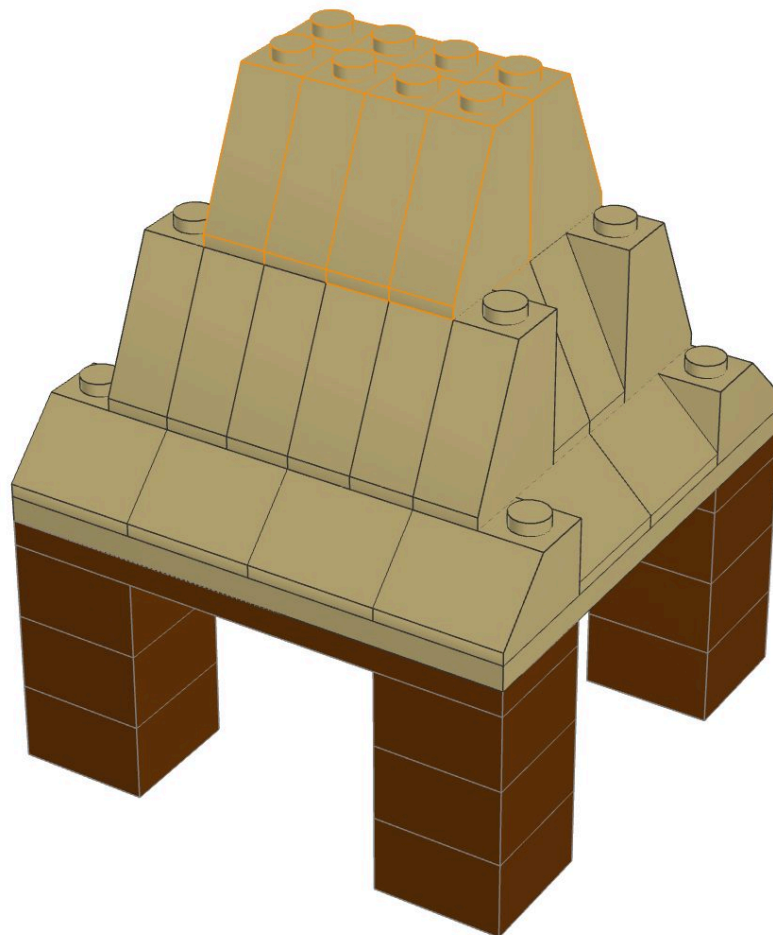

2x

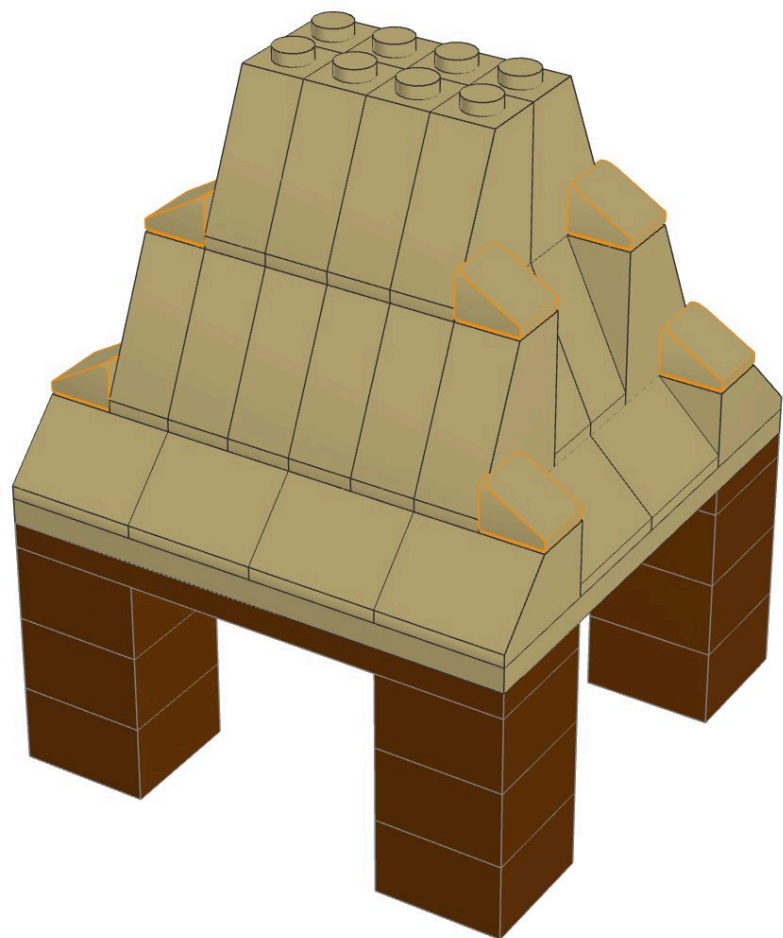

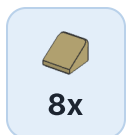

58

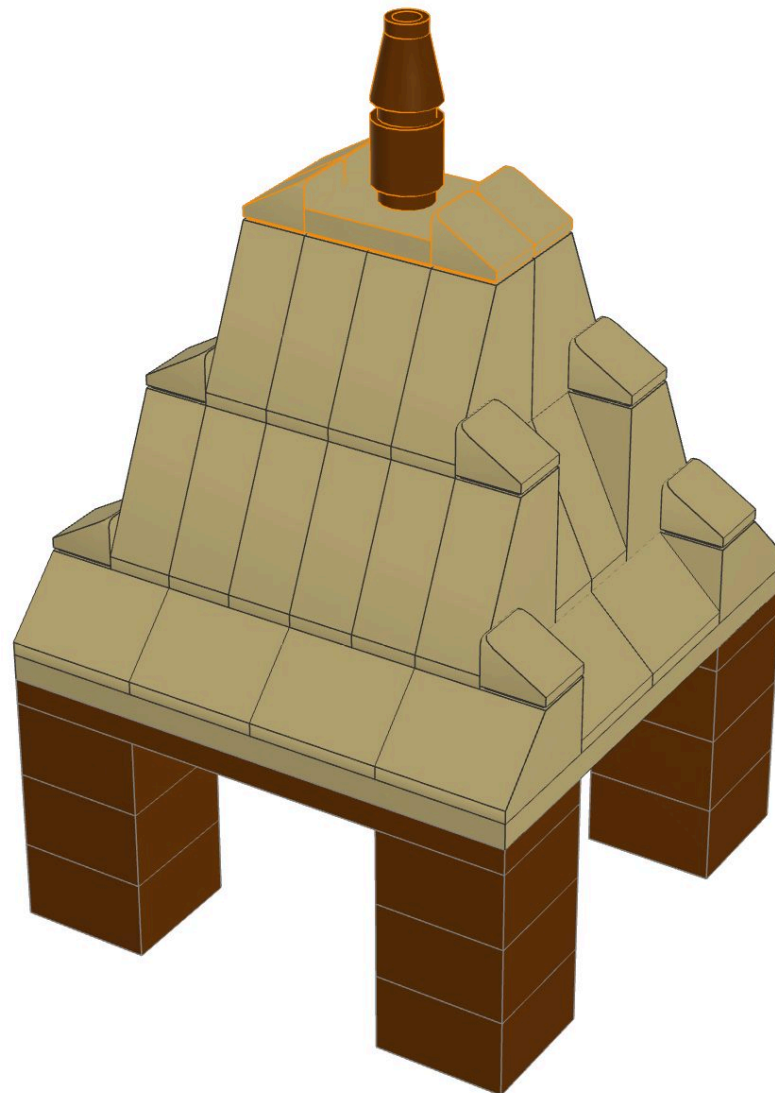

8x

59

60

The finial: a timber pole and cone on the plate with one stud.

61

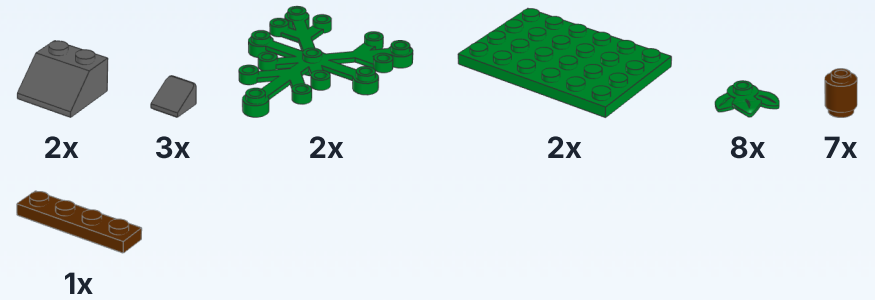

6

The acacia, the rocks and the grasses

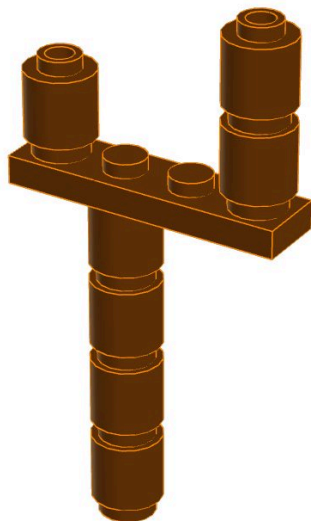

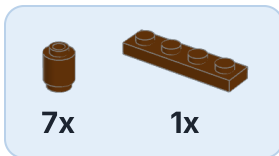

An acacia, a rock outcrop and tufts of grass finish the lawn.

25 elements in this section

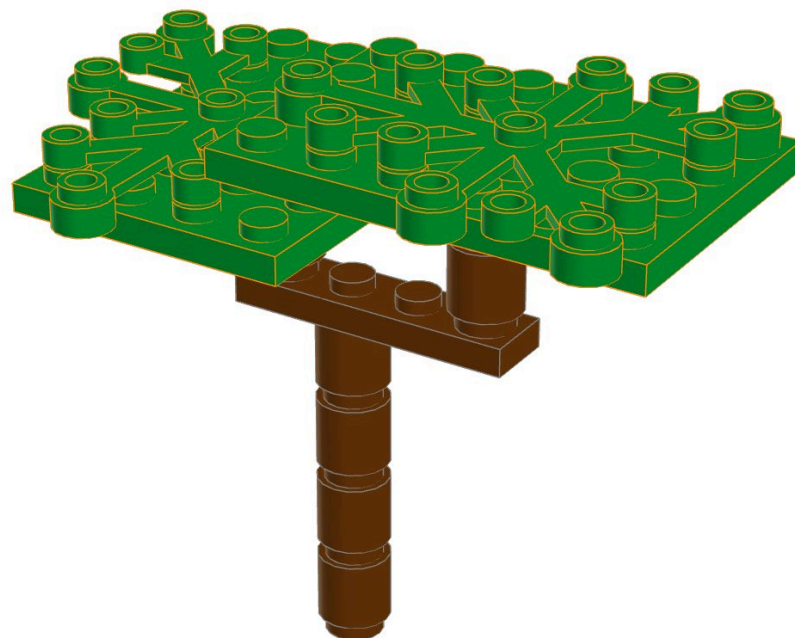

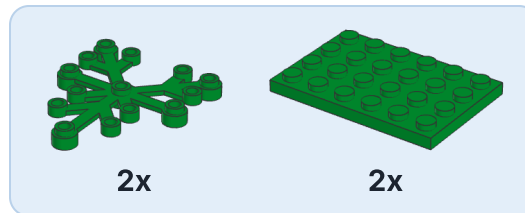

PARTS FOR THIS SECTION

62

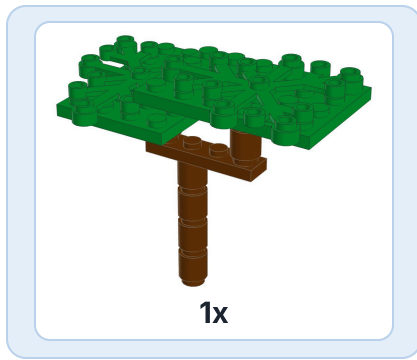

63

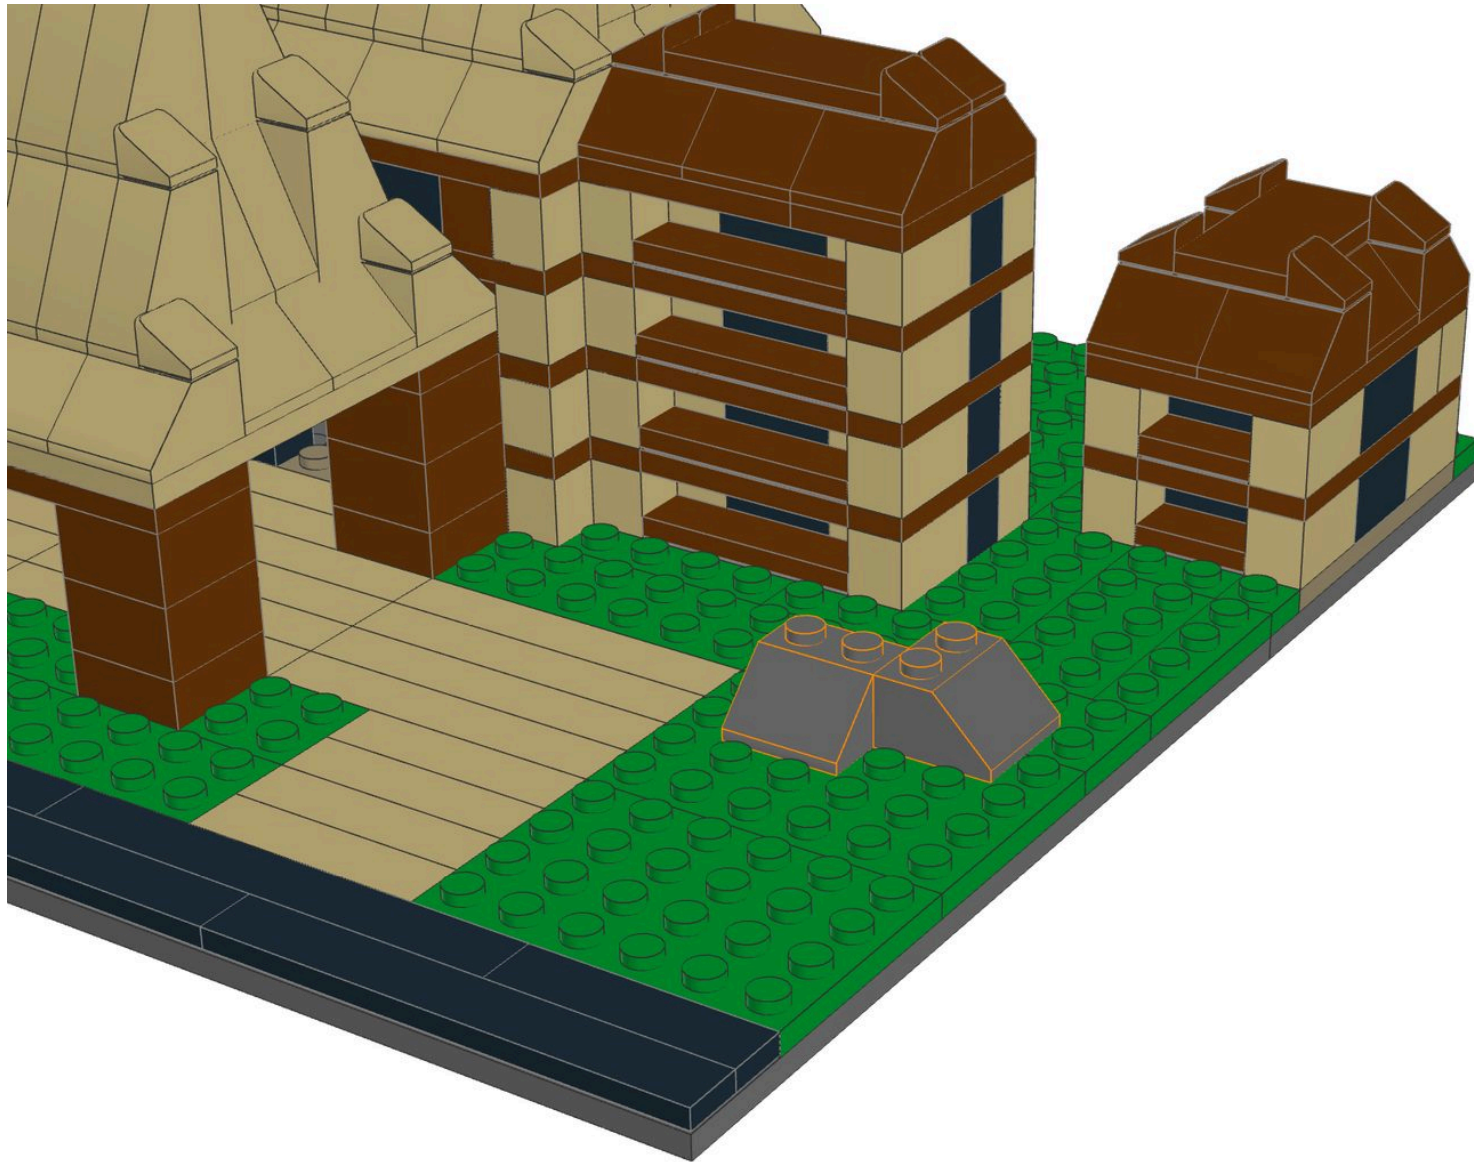

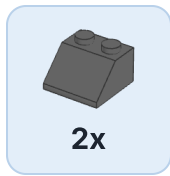

Two flat layers of canopy, one on each branch.

64

65

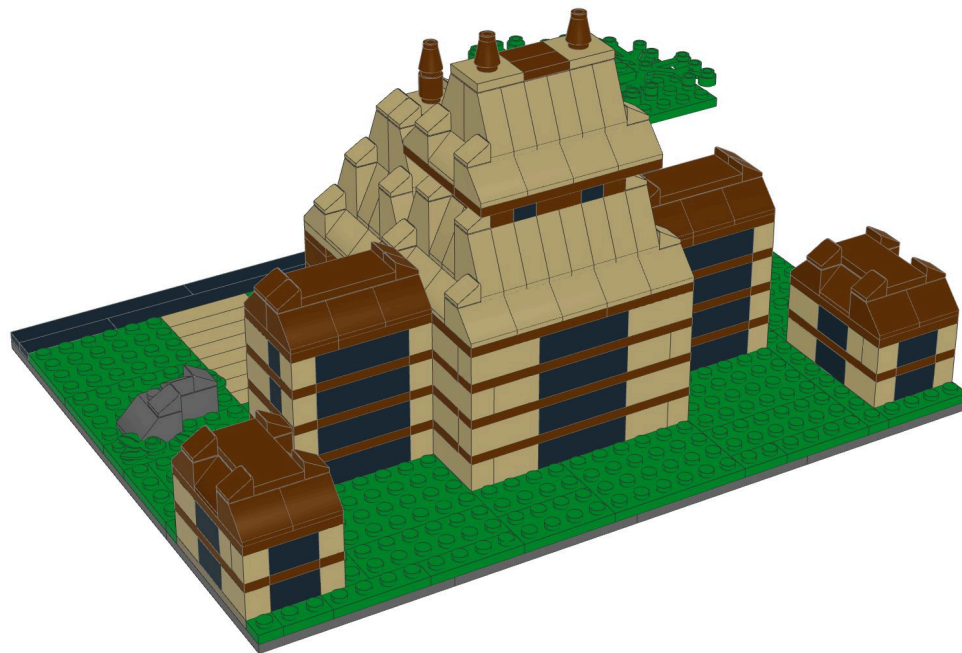

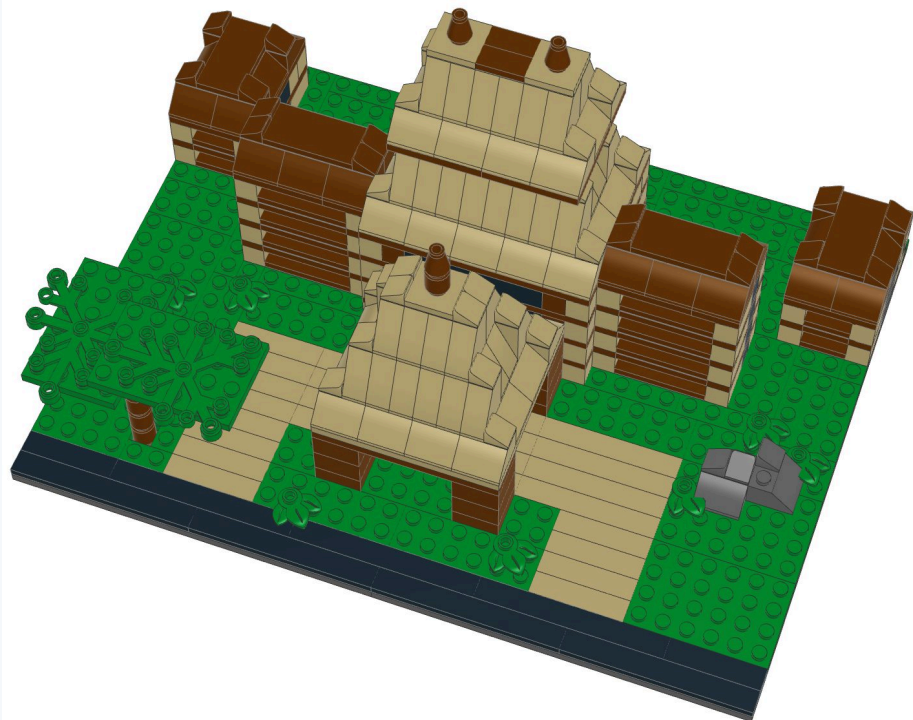

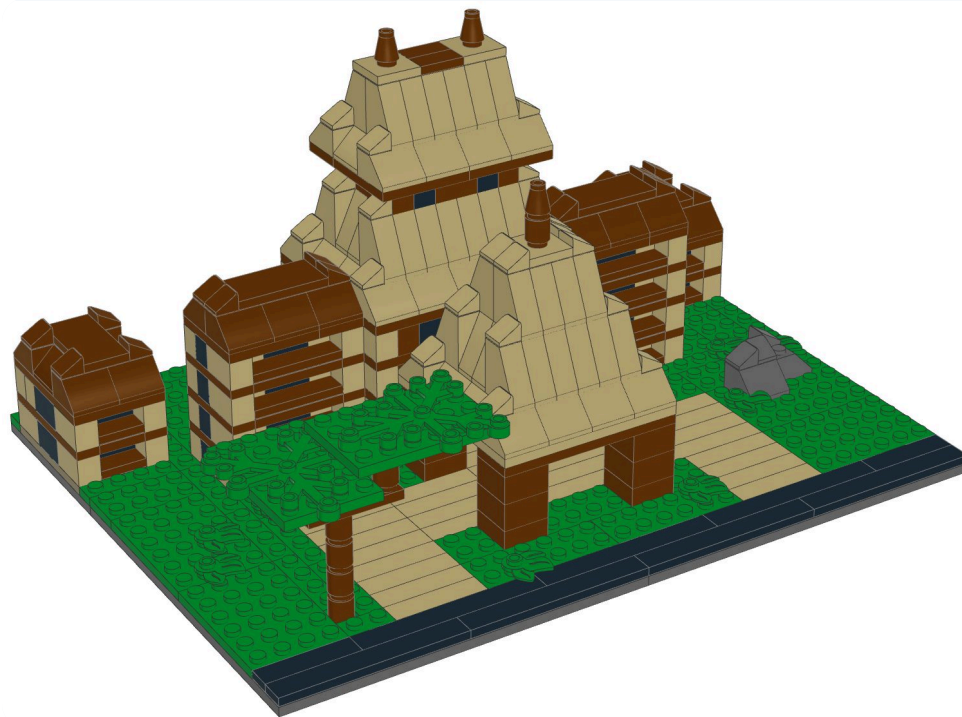

A rock outcrop: two big grey slopes, with small slopes on their studs.

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

1. Go to **lego.com** → **Pick and Build** → **Pick a Brick** and choose **Upload list**.
2. Upload parts/pick_a_brick_upload.csv. It lists all 56 kinds of element by Element ID with their quantities, and fills your bag in one go.
3. If anything isn't matched, upload pick_a_brick_upload_retry.csv. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in Pick a Brick's Bestseller range, which ships from the US warehouse.

2 · BrickLink or Rebrickable (backup)

The files in parts/ cover anything Pick a Brick does not stock:

- bricklink_wanted_list.xml: BrickLink → Want → Upload.
- rebrickable_parts.csv: import it as a Rebrickable part list, then compare stores.
- pick_a_brick_mapping.csv: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 560 elements with a known price come to about **US\$78**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Ground:** any colour of tiles works for the base around the building.
- **Hidden parts:** bricks and plates inside the building can be any colour.

Colour names

In this booklet	LEGO name	BrickLink
Tan	Brick Yellow	Tan
Dark Tan	Sand Yellow	Dark Tan
Reddish Brown	Reddish Brown	Reddish Brown
Black	Black	Black
Dark Bluish Gray	Dark Stone Grey	Dark Bluish Gray
Green	Dark Green	Green
