

BUILD INSTRUCTIONS

Riviera Resort

A micro-scale display model in LEGO® bricks

1,771
pieces

38 × 26 cm
48 × 32 studs

Unofficial fan design

An unofficial fan-designed model (MOC), inspired by Disney's Riviera Resort at Walt Disney World. It is not affiliated with, sponsored or endorsed by The LEGO Group or Disney. LEGO® is a trademark of The LEGO Group.

About this model

This model shows the grand entrance of the Riviera Resort: the arched porte-cochere, the mansard-roofed central pavilion with its oval dormers, two domed corner pavilions, and the guest wings with red awnings, all set in a lawn lined with palms.

Pieces	1,771 elements, 87 kinds, 10 colours
Size	48 × 32 studs (38.4 × 25.6 cm), 16 cm tall at the domes
Scale	about 1:250 (one storey = 4 plates)
Build time	about 6 to 8 hours
Model files	riviera_resort.mpd (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The grounds: base, drive, lawn and hedges
2. The central pavilion
3. The domed pavilions (build 2)
4. The guest wings (build 2)
5. The porte-cochere
6. Palms, flowers and flags

Each building is built on its own and then set on the base. Every section starts with a list of the parts it needs, so you can sort them before you start.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- The facades use a lot of 1×1 bricks: 1 black brick for every window and 1 white brick for every pillar between windows. Keep black and white in separate trays.
- Each floor is one course of bricks topped with a band of white plates. Check the window pattern against the picture before you add the band.
- A **"Build 2"** badge means you build that module twice. Build both at the same time, one step at a time.
- Push the palms and flags down firmly. The flags clip onto the black bars.

Getting the parts

Every element is listed with its LEGO Element ID in the inventory at the back, and in parts/ as CSV and BrickLink XML files. See "Ordering the parts" on the last pages.

1

The grounds

Six 16 × 16 plates form the base. The drive, pavements, lawn and gardens then lock them together.

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

- 1. Go to **lego.com** → **Pick and Build** → **Pick a Brick** and choose **Upload list**.
- 2. Upload parts/pick_a_brick_upload.csv. It lists all 87 kinds of element by Element ID with their quantities, and fills your bag in one go.
- 3. If anything isn't matched, upload pick_a_brick_upload_retry.csv. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
- 4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element this model needs more than 10 of was in the Bestseller range.

2 · BrickLink or Rebrickable (backup)

The files in parts/ cover anything Pick a Brick does not stock:

- bricklink_wanted_list.xml: BrickLink → Want → Upload.
- rebrickable_parts.csv: import it as a Rebrickable part list, then compare stores.
- pick_a_brick_mapping.csv: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 1,769 elements with a known price come to about **US\$228**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Base:** six 16×16 plates. You can swap in any plates that cover 48×32 studs, or a 48×48 grey baseplate.
- **Lawn:** any green plates. Keep the joints away from the joints in the base plates below.
- **Hidden plates:** the plates inside the buildings can be any colour.
- **Flags:** any colour. The current 2×2 flag (design 80326) wasn't on the Pick a Brick listings checked; BrickLink has it.
