12 × 10 studs

A glass mug of pumpkin spice latte in LEGO® bricks

Custom kit

A custom model built from genuine LEGO® elements. It is not affiliated with, sponsored or endorsed by The LEGO Group. LEGO® is a trademark of The LEGO Group.

About this model

A clear glass mug of pumpkin spice latte with a foamy top, a swirl of whipped cream dusted with cinnamon and a cinnamon stick, on a white marble board with a little bowl of pumpkin purée, whole cloves and a scattering of cinnamon and nutmeg.

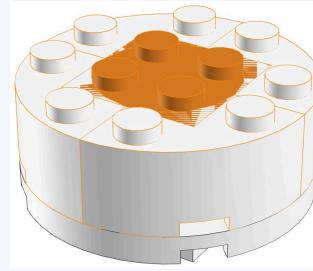

Pieces	149 elements, 30 kinds, 6 colours
Size	12 × 10 studs (9.6 × 8 cm), 9 cm tall to the top of the cinnamon stick
Build time	about 30 to 45 minutes
Model files	whipped_latte.mpd (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The board and spices
2. The glass mug
3. The pumpkin bowl

The glass mug and the bowl are built on their own and then set on the board. Every section starts with a list of the parts it needs.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- Each clear panel has a thin wall along one long side. Turn it so the wall faces out, as in the pictures.
- Build the latte a few courses at a time, then slide the panels down around it.
- The handle hangs from the rim. Press the clear 1×2 plate onto the underside of the handle plate, then add the round bricks below it.
- Keep the clear parts in their own bag, so they don't get scratched.

Getting the parts

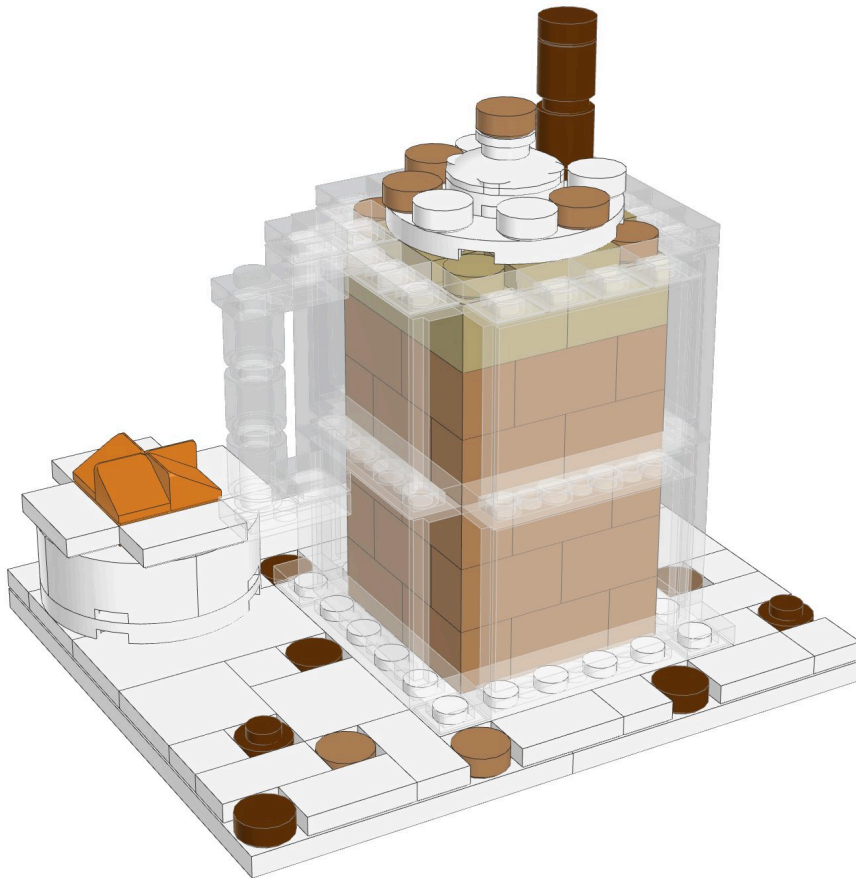

Every element is listed with its LEGO Element ID in the inventory at the back, and in parts/ as CSV and BrickLink XML files. See “Ordering the parts” on the last pages.

1

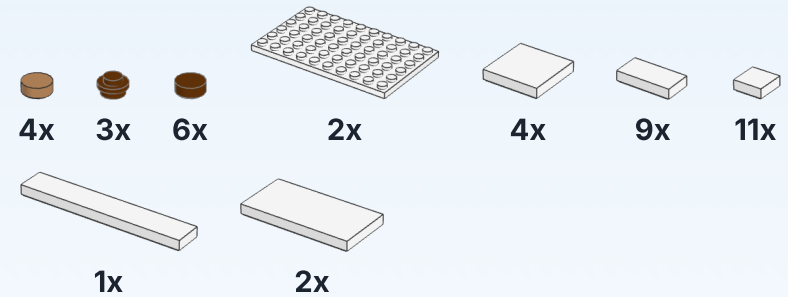

The board and spices

Two big plates make the marble board, and tiles make its top, with cinnamon, nutmeg and whole cloves scattered on it. Leave the big gaps open: the glass and the bowl go there.

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

1. Go to **lego.com** → **Pick and Build** → **Pick a Brick** and choose **Upload list**.
2. Upload parts/pick_a_brick_upload.csv. It lists all 30 kinds of element by Element ID with their quantities, and fills your bag in one go.
3. If anything isn't matched, upload pick_a_brick_upload_retry.csv. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in the Bestseller range, which ships from the US warehouse.

2 · BrickLink or Rebrickable (backup)

The files in parts/ cover anything Pick a Brick does not stock:

- bricklink_wanted_list.xml: BrickLink → Want → Upload.
- rebrickable_parts.csv: import it as a Rebrickable part list, then compare stores.
- pick_a_brick_mapping.csv: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 149 elements with a known price come to about **US\$16**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Board:** any colour of plates and tiles makes a different table top.
- **Hidden parts:** the 6×6 plate under the glass and the 2×2 plate under the bowl can be any colour.
- **Latte colour:** the 1×2 bricks inside the glass can be any colour; tan makes a lighter latte.

Colour names

In this booklet	LEGO name	BrickLink
