BUILD INSTRUCTIONS

Saratoga Springs Resort

A mid-size display model in LEGO® bricks

660
pieces

26 × 19 cm
32 × 24 studs

Unofficial fan design

An unofficial fan-designed model (MOC), inspired by Disney's Saratoga Springs Resort & Spa at Walt Disney World. It is not affiliated with, sponsored or endorsed by The LEGO Group or Disney. LEGO® is a trademark of The LEGO Group.

About this model

The arrival front of the Carriage House at Saratoga Springs, in the colours the resort wears today: mint-green shingle with tan trim, a deeper green under the porch, red-and-white striped awnings and warm brown roofs. The round lobby tower stands at the centre, built as an octagon with clipped corners: a tan band runs up its front to a white louvre that pokes into the brown cone roof, under a tan cornice and a black finial. A porch on slim tan posts curves round the foot of the tower behind a red-and-white striped edge, and a white picket fence between chunky river-stone pillars runs along the sidewalk. On the left, a two-storey mint-green wing has a front gable, a balcony with a brown railing beside the tower, a green awning over the shop front and a grey roof with a chimney; on the right, a cream building has red awnings over its windows and a small white-trimmed gable and a white cupola with a spire on its terracotta roof. Two trees stand behind.

Pieces	660 elements, 87 kinds, 12 colours
Size	32 × 24 studs (25.6 × 19.2 cm), 13 cm tall
Scale	about 1:250 (one storey = 4 plates, 1 stud ≈ 2 m), like the large resort models
Build time	about 2 to 2½ hours
Model files	`saratoga_springs_midsize.mpd` (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The display base, the sidewalk and the lawns
2. The Carriage House tower
3. The mint-green wing
4. The cream building
5. The fence and the garden: the stone pillars, the picket fence, shrubs and trees

Every kit in the mid-size resort collection stands on the same 32×24 display base with a black front band. Each section starts with a list of the parts it needs.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- The tower is an octagon: its walls step in at the corners. Lay each course side by side with the picture; its joints cross those of the course below.
- The porch's tan deck plates reach from the posts onto the tower walls and tie the porch to the tower. The striped edge alternates red and white, a plate and a slope on each.
- The cone roof goes up one ring of slopes at a time. Hidden brown bricks under a few slopes hold up the ring above; they have a step of their own.
- The tower's finial and the cupola's spire sit on the centre stud of a 2×2 dish, half a stud off the grid. The cupola's white bar pushes into the top of its cone.
- A **“Build 6”** or **“Build 2”** badge means you build that module that many times.

Getting the parts

Every element is listed with its LEGO Element ID in the inventory at the back, and in `parts/` as CSV and BrickLink XML files. See “Ordering the parts” on the last pages.

1

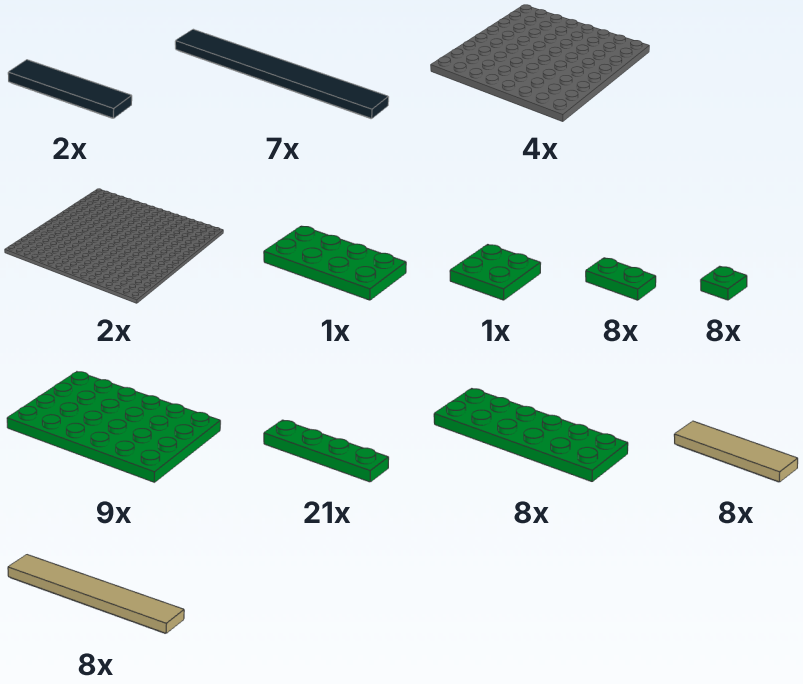

The display base

The base and the black band are the same for every mid-size kit. The sidewalk, the entrance walk and the lawns go on next; the sidewalk tiles tie the base plates together.

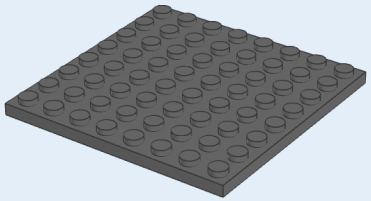

87 elements in this section

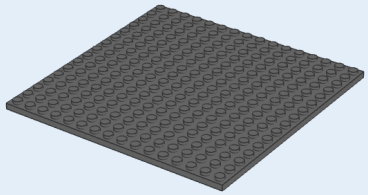

PARTS FOR THIS SECTION

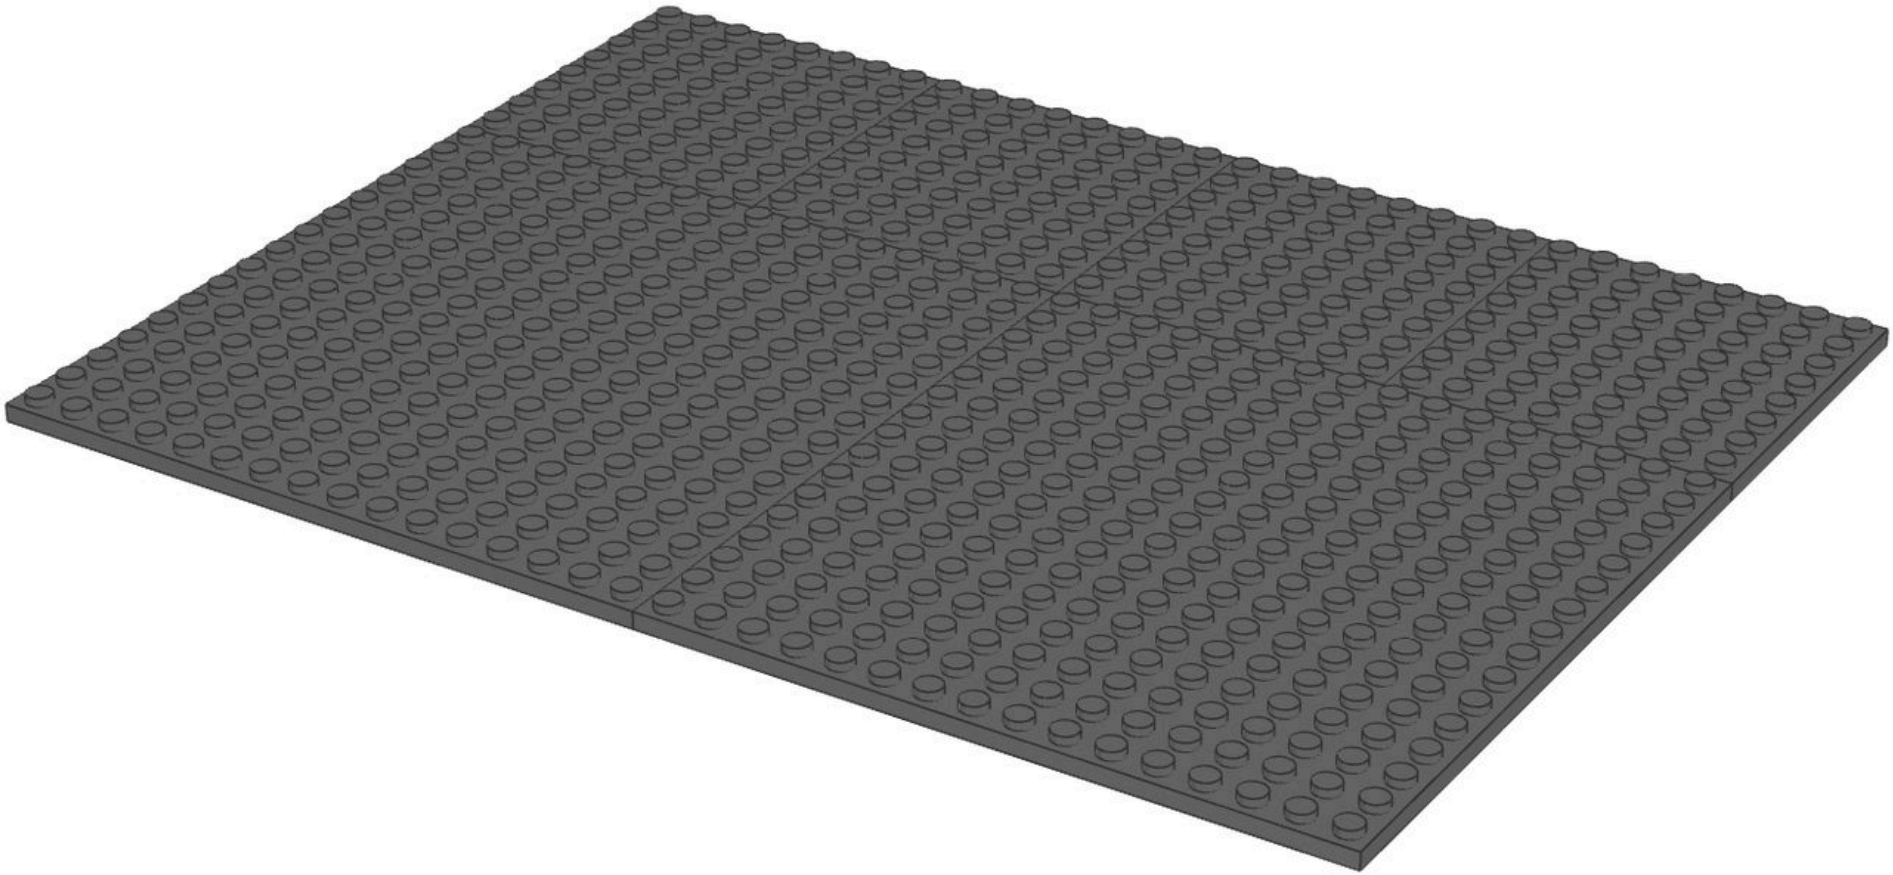

1

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

1. Go to **lego.com → Pick and Build → Pick a Brick** and choose **Upload list**.
2. Upload `parts/pick_a_brick_upload.csv`. It lists all 87 kinds of element by Element ID with their quantities, and fills your bag in one go.
3. If anything isn't matched, upload `pick_a_brick_upload_retry.csv`. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in Pick a Brick's Bestseller range, which ships from the US warehouse.

2 · BrickLink or Rebrickable (backup)

The files in `parts/` cover anything Pick a Brick does not stock:

- `bricklink_wanted_list.xml`: BrickLink → Want → Upload.
- `rebrickable_parts.csv`: import it as a Rebrickable part list, then compare stores.
- `pick_a_brick_mapping.csv`: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 660 elements with a known price come to about **US$76**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Ground:** any colour of tiles works for the base around the building.
- **Hidden parts:** bricks and plates inside the building can be any colour.
