BoardWalk Inn

A compact display model in LEGO® bricks

383
pieces

19 × 13 cm
24 × 16 studs

Unofficial fan design

An unofficial fan-designed model (MOC), inspired by Disney's BoardWalk Inn at Walt Disney World. It is not affiliated with, sponsored or endorsed by The LEGO Group or Disney. LEGO® is a trademark of The LEGO Group.

About this model

The entrance of the BoardWalk Inn: the white gatehouse with its big round arch, a ring of gold dots where the sign's letters run over it and a curved roofline, two towers with dark pyramid roofs and white spires, and the drive with its red-and-blue painted curb between two topiaries.

Pieces	383 elements, 53 kinds, 10 colours
Size	24 × 16 studs (19.2 × 12.8 cm), 17 cm tall
Scale	about 1:250 (one storey = 4 plates, 1 stud ≈ 2 m), like the large resort models
Build time	about 1 to 1½ hours
Model files	boardwalk_compact.mpd (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The display base, the lawn and the drive
2. The gatehouse
3. The towers (build 2)
4. The topiaries (build 2)

Every kit in the compact resort collection stands on the same 24×16 display base with a black front band. Each section starts with a list of the parts it needs.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- The front wall is two studs thick, so the arch has a deep reveal. Around the arch it is two rows of 1-wide bricks; elsewhere 2-wide bricks tie the rows together.
- Each gold dot is a gold round brick on the side stud of a white brick in the inner row; it fills the gap left in the outer row. The two dark portholes are made the same way with black round bricks.
- The arch steps in with inverted slopes, then the raised 1×6 arch closes it. The sloped side of each inverted slope faces the middle of the arch.
- A **"Build 2"** badge means you build that module twice.

Getting the parts

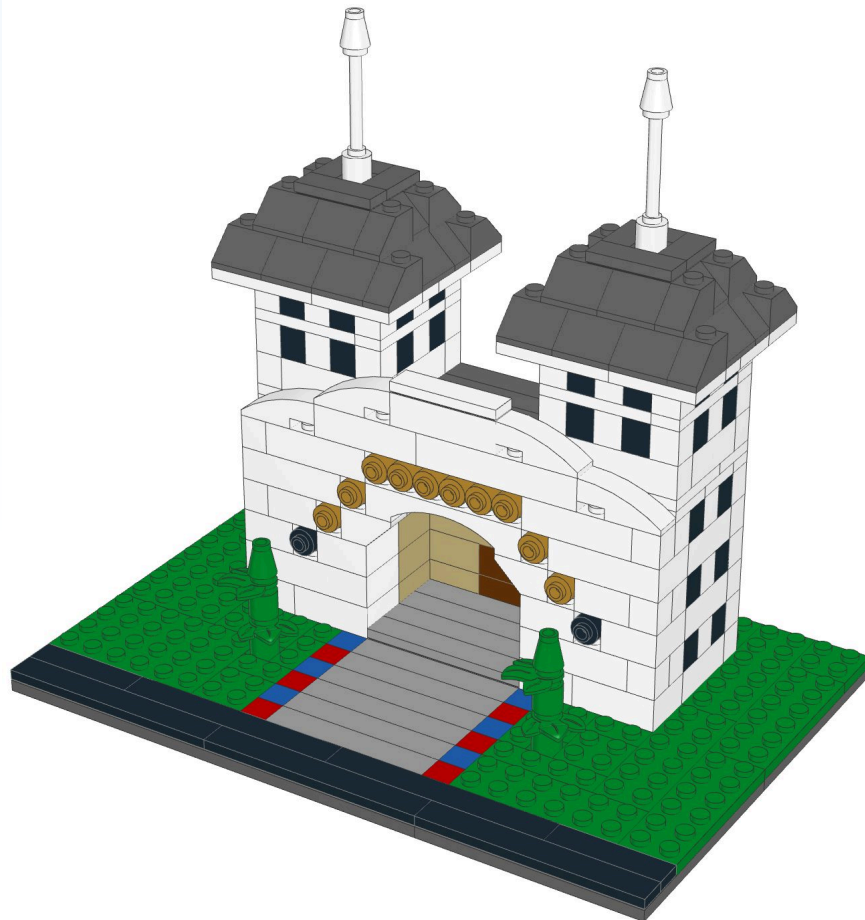

Every element is listed with its LEGO Element ID in the inventory at the back, and in parts/ as CSV and BrickLink XML files. See "Ordering the parts" on the last pages.

The display base

The base and the black band are the same for every kit in the collection. The lawn, the drive and its painted curb go on next.

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

- 1. Go to **lego.com** → **Pick and Build** → **Pick a Brick** and choose **Upload list**.
- 2. Upload parts/pick_a_brick_upload.csv. It lists all 53 kinds of element by Element ID with their quantities, and fills your bag in one go.
- 3. If anything isn't matched, upload pick_a_brick_upload_retry.csv. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
- 4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in Pick a Brick's Bestseller range, which ships from the US warehouse.

2 · BrickLink or Rebrickable (backup)

The files in parts/ cover anything Pick a Brick does not stock:

- bricklink_wanted_list.xml: BrickLink → Want → Upload.
- rebrickable_parts.csv: import it as a Rebrickable part list, then compare stores.
- pick_a_brick_mapping.csv: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 383 elements with a known price come to about **US\$49**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Ground:** any colour of tiles works for the base around the building.
- **Hidden parts:** bricks and plates inside the building can be any colour.
