Beach Club Resort

A mid-size display model in LEGO® bricks

634
pieces

26 × 19 cm
32 × 24 studs

Unofficial fan design

An unofficial fan-designed model (MOC), inspired by Disney's Beach Club Resort at Walt Disney World. It is not affiliated with, sponsored or endorsed by The LEGO Group or Disney. LEGO® is a trademark of The LEGO Group.

About this model

The Beach Club's entrance front as a seaside Victorian beach cottage, facing the viewer: a four-storey centre of pale sea-green clapboard with crisp white trim under a steep light grey gable with a white fan window; two slim turrets flanking the entrance, each with an open white lookout and a pointed cap; lower wings with white porches and lattice railings under cross gables; and a white porte-cochere with a low pediment, a round window and a coral fascia over the walk. In front, a sandy beach strip with coral-topped umbrellas and a lifeguard chair, and two palms.

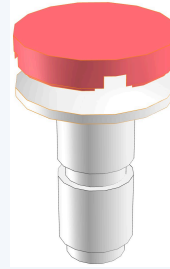

Pieces	634 elements, 70 kinds, 9 colours
Size	32 × 24 studs (25.6 × 19.2 cm), 11 cm tall
Scale	about 1:250 (one storey = 4 plates, 1 stud ≈ 2 m), like the large resort models
Build time	about 2 to 2½ hours
Model files	beach_club_midsize.mpd (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The display base, the walk, the lawns and the beach
2. The centre
3. The turrets (build 2)
4. The left wing
5. The right wing
6. The porte-cochere
7. The palms, the beach umbrellas and the lifeguard chair

Every kit in the mid-size resort collection stands on the same 32×24 display base with a black front band. Each section starts with a list of the parts it needs.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- Each storey is a course of sand green bricks, with black bricks for the windows and white bricks at the corners, then a ring of white plates. The rings take turns: on one storey the front and back rows hold the corners, on the next the side rows do, so the walls lock together.
- On the wings the porch goes up with the walls: a white column on the ground floor, a lattice fence on the balcony, each tied in by the 2-wide white plate above it.
- Roofs go up one row of slopes at a time. Hidden bricks under the gables and the ridges have a step of their own, just before the slopes that rest on them.
- The umbrella canopies and the lifeguard chair's sunshade sit on a single centre stud, half a stud off the grid.
- A **"Build 2"** badge means you build that module twice.

Getting the parts

Every element is listed with its LEGO Element ID in the inventory at the back, and in parts/ as CSV and BrickLink XML files. See "Ordering the parts" on the last pages.

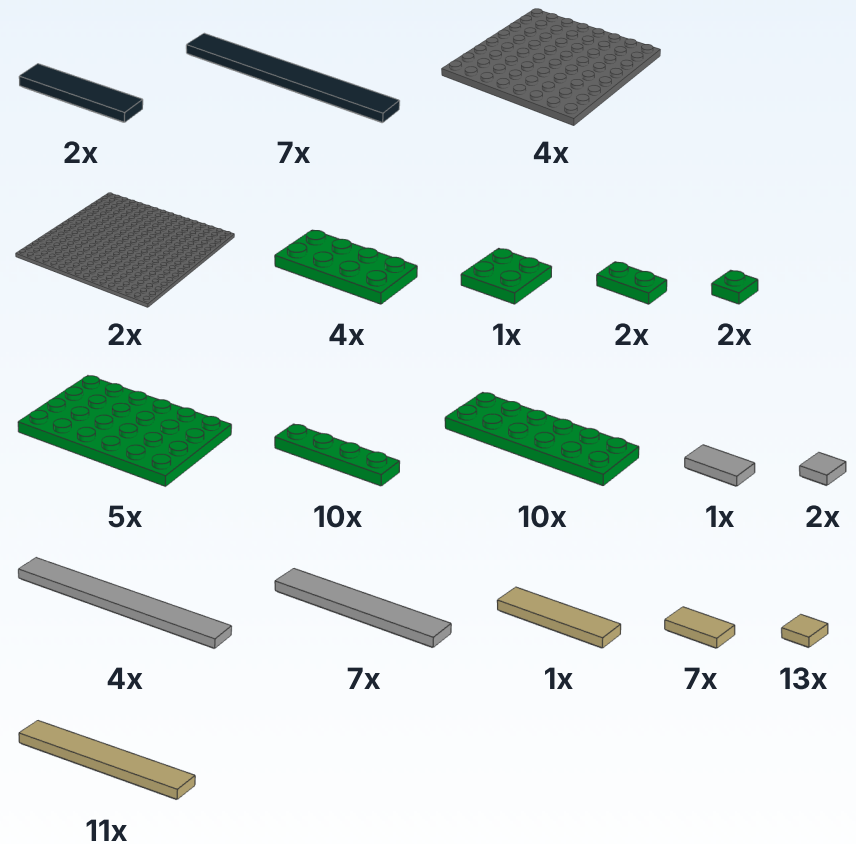

1

The display base

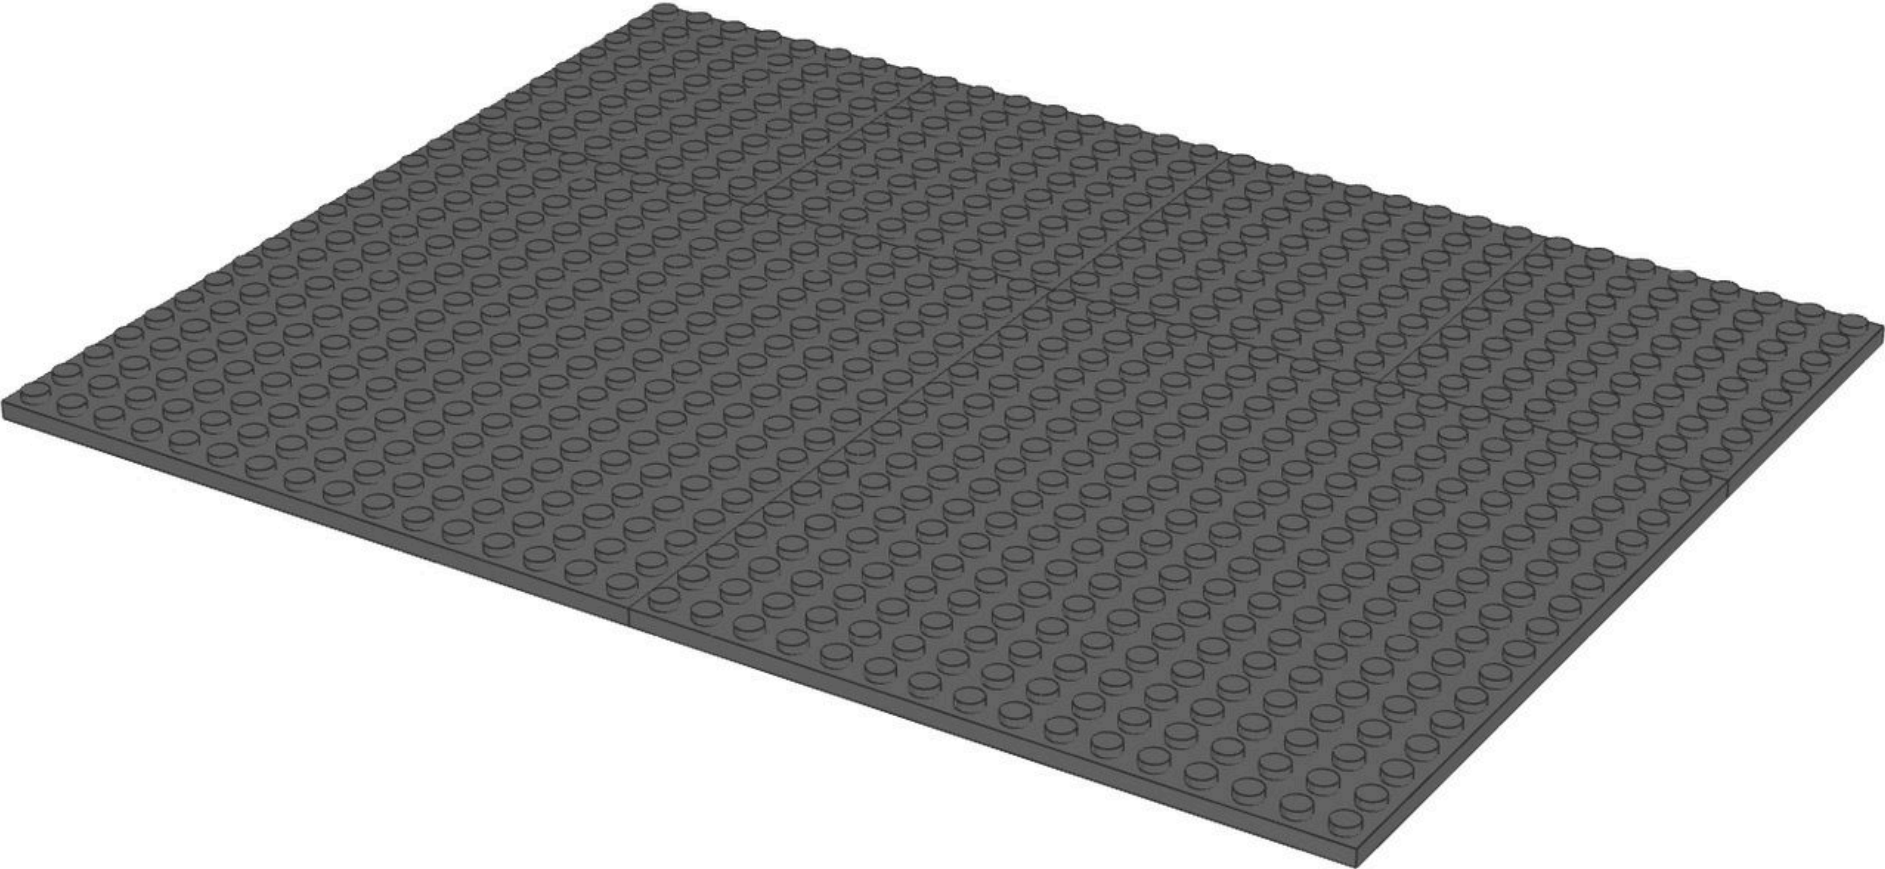

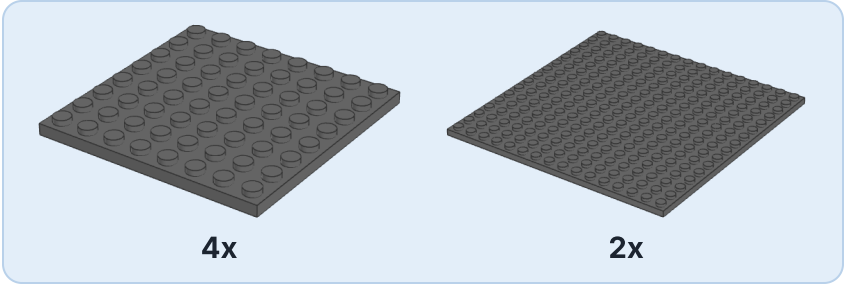

The base and the black band are the same for every mid-size kit. The walk, the lawns and the beach go on next.

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

1. Go to **lego.com** → **Pick and Build** → **Pick a Brick** and choose **Upload list**.
2. Upload parts/pick_a_brick_upload.csv. It lists all 70 kinds of element by Element ID with their quantities, and fills your bag in one go.
3. If anything isn't matched, upload pick_a_brick_upload_retry.csv. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in Pick a Brick's Bestseller range, which ships from the US warehouse.

2 · BrickLink or Rebrickable (backup)

The files in parts/ cover anything Pick a Brick does not stock:

- bricklink_wanted_list.xml: BrickLink → Want → Upload.
- rebrickable_parts.csv: import it as a Rebrickable part list, then compare stores.
- pick_a_brick_mapping.csv: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 634 elements with a known price come to about **US\$76**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Walls:** sand green bricks are used as 1×1, 1×2 and 1×4 only; the 1×6 is a Bestseller too, but rarer.
- **Coral:** the kit uses only coral 2×4 plates and 2×2 round tiles; bright pink or red ones give a similar accent.
- **Ground:** any colour of tiles works for the base around the building.
- **Hidden parts:** bricks and plates inside the building can be any colour.
