BUILD INSTRUCTIONS

Navy Craftsman House

739
pieces

38 × 26 cm
48 × 32 studs

A two-storey modern-craftsman house with a stone porch, in LEGO® bricks

Unofficial fan design

An unofficial fan-designed model (MOC), made from a photo of a house. It is not affiliated with, sponsored or endorsed by The LEGO Group. LEGO® is a trademark of The LEGO Group.

About this model

This model recreates the house in the photo: deep navy walls with crisp white trim, two steep front gables nested one behind the other, the one-storey garage with its light grey carriage door, and the covered porch with white columns on stacked-stone piers in front of a stone wall with the black front door and a big white window. The lot has the street, curb and sidewalk, the driveway with a bronze compact SUV, a curved paver walk, mulch beds with boxwoods, grasses and flowering shrubs, a young tree on the lawn and the mailbox by the driveway.

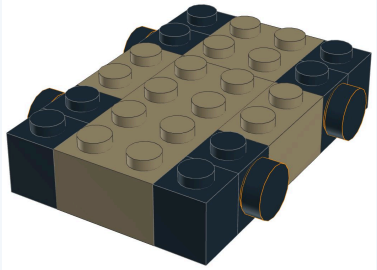

Pieces	739 elements, 101 kinds, 14 colours
Size	48 × 32 studs (38.4 × 25.6 cm), 15 cm tall to the ridge
Scale	about 1:76 (1 stud = 2 ft, one storey = 4 bricks)
Build time	about 4 to 5 hours
Model files	`navy_house.mpd` (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The lot: street, sidewalk, driveway, walk, beds and lawn
2. The garage
3. The house: stone front, porch, upper storey and roofs
4. The garden: shrubs, flowers, the tree and the mailbox
5. The car (inside the garden section)

The garage, the house and the car are built on their own and then set on the lot. Every section starts with a list of the parts it needs.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- Each storey is four courses of bricks, laid two at a time. The white corner boards are tall 1×1×3 bricks; set them in with the courses around them.
- The stone front uses masonry-profile 1×2 bricks in four colours. The exact colour order doesn't matter, so mix them as you like.
- Slide the clear glass into each white 1×4×3 window frame before you place it.
- The two upstairs gables are built together, one row of slopes at a time. Where they meet, the slopes step around each other to form the valley.

Getting the parts

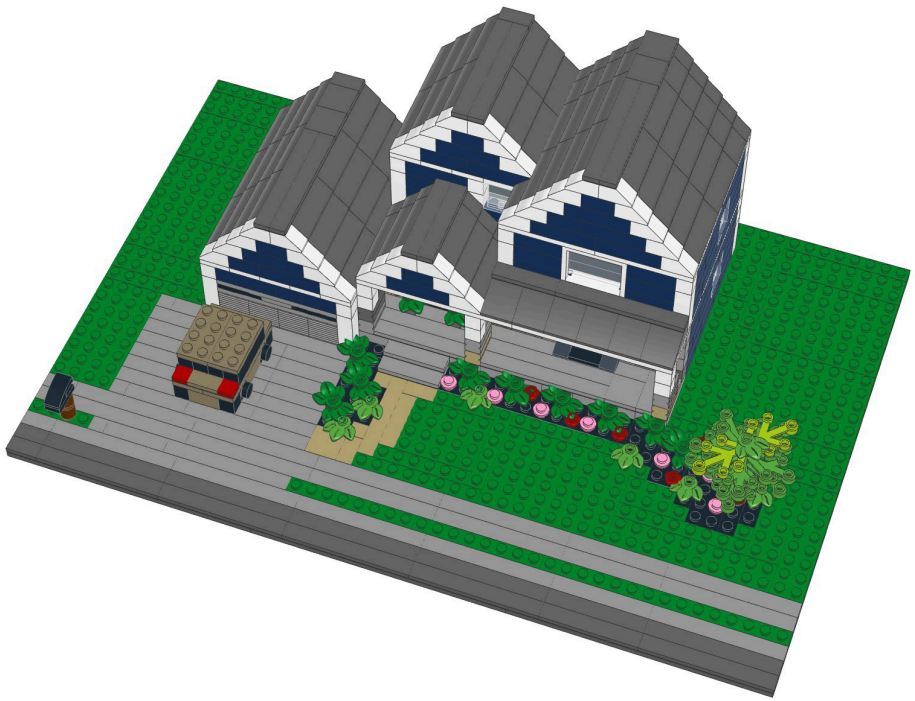

Every element is listed with its LEGO Element ID in the inventory at the back, and in `parts/` as CSV and BrickLink XML files. See “Ordering the parts” on the last pages.

1

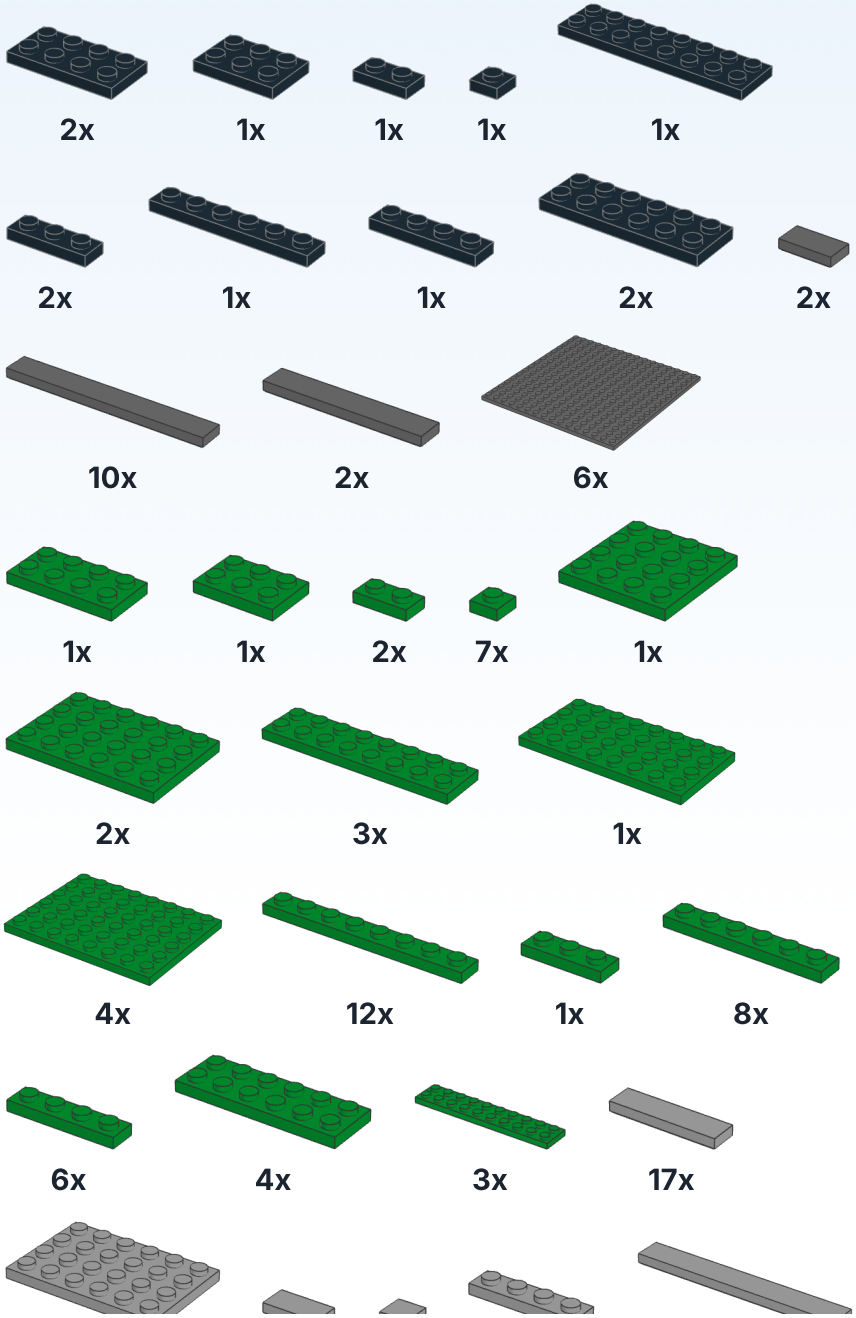

The lot

Six 16 × 16 plates make the base. The street, the sidewalk and the lawn plates lock them together.

The house

The stacked-stone ground floor with the black front door and a big white window, the porch with stone piers and white columns under a small gable and a shed roof, the navy upper storey and the two nested front gables.

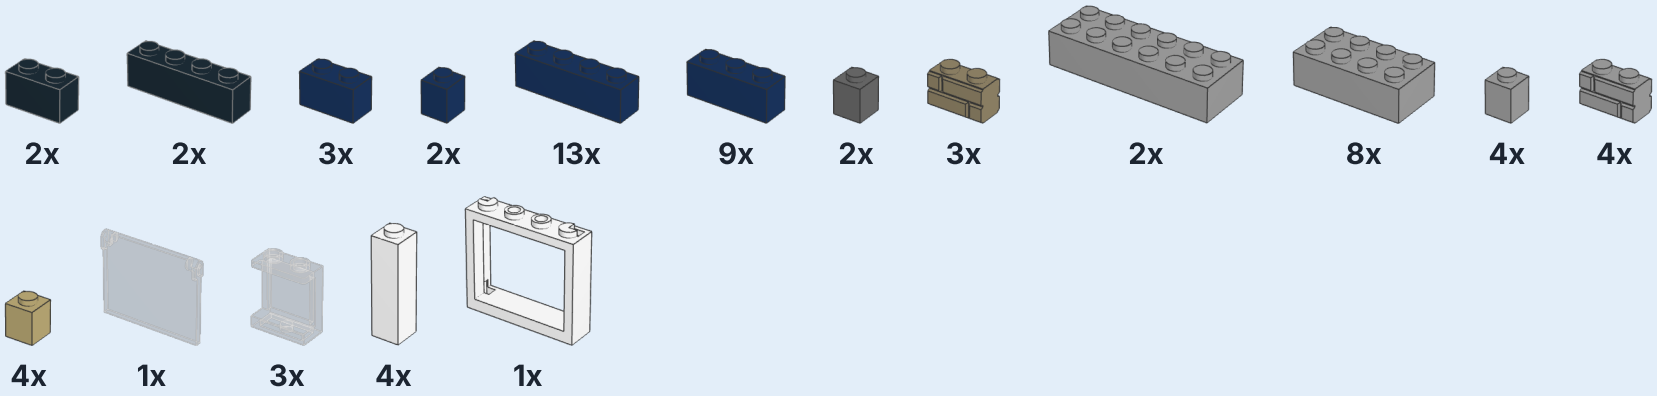

396 elements in this section

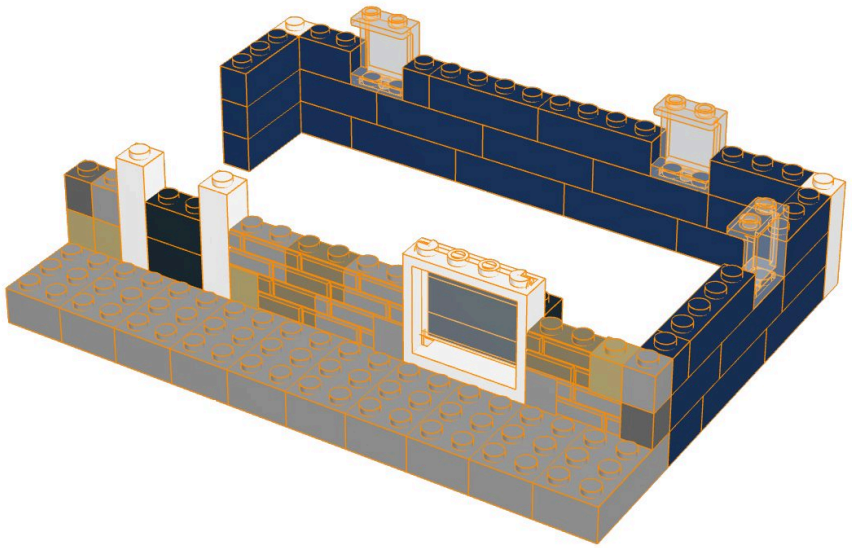

PARTS FOR THIS SECTION

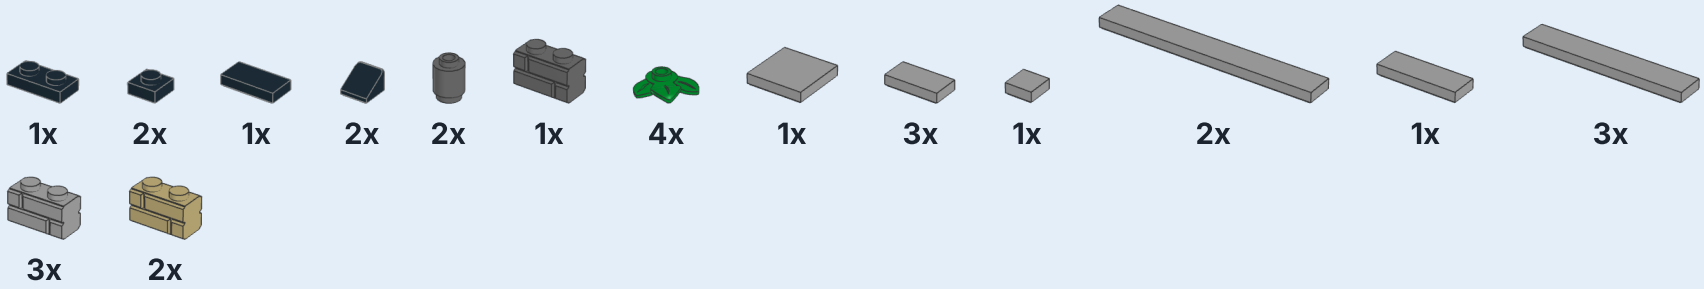

16

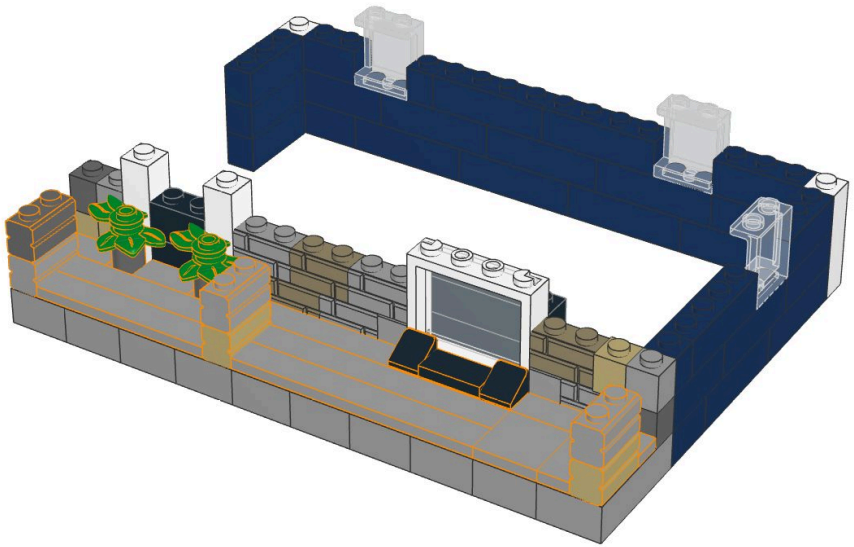

The porch base and the first courses. Its light grey bricks run back under the stone front. Slide the glass into the window frame first.

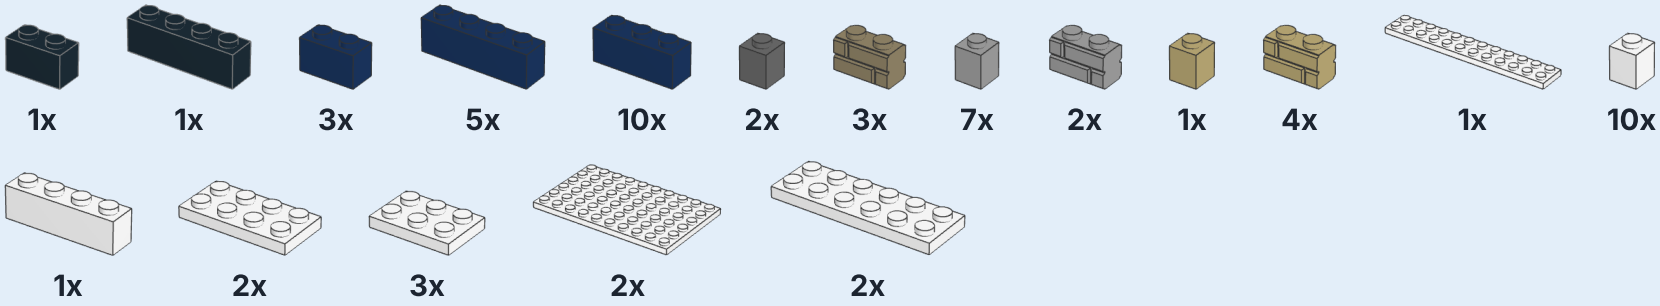

17

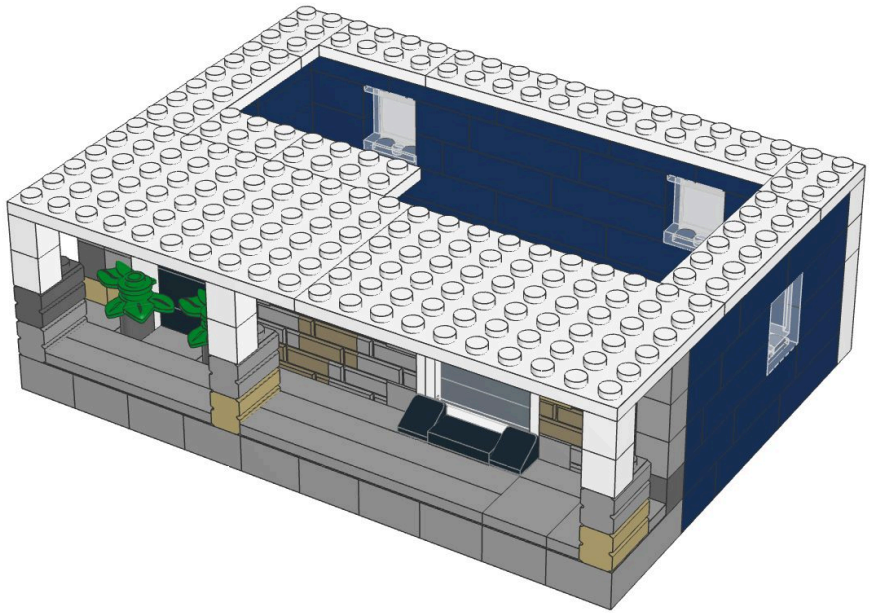

The porch: stone piers, a light grey floor, two pots, two chairs and a table.

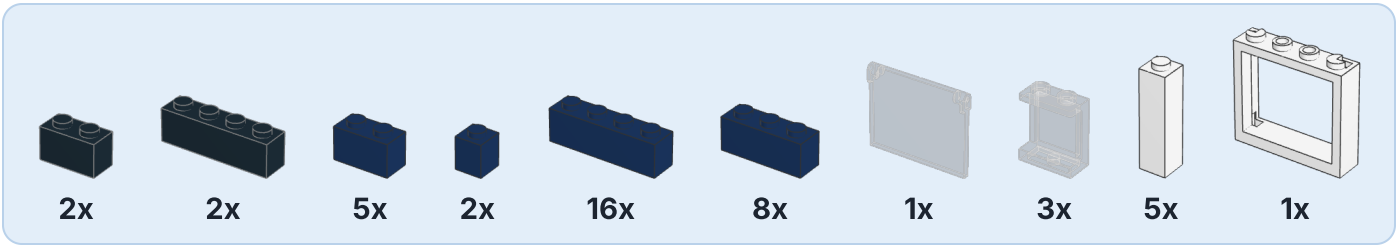

18

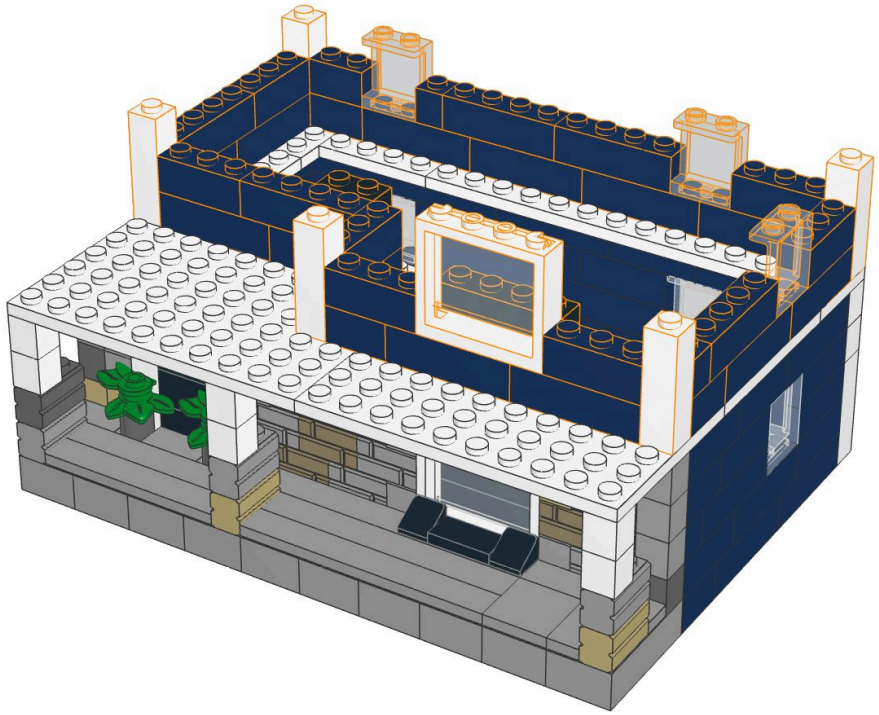

The white columns, the last courses and the floor: white plates over the porch and round the walls make the white band between the storeys.

19

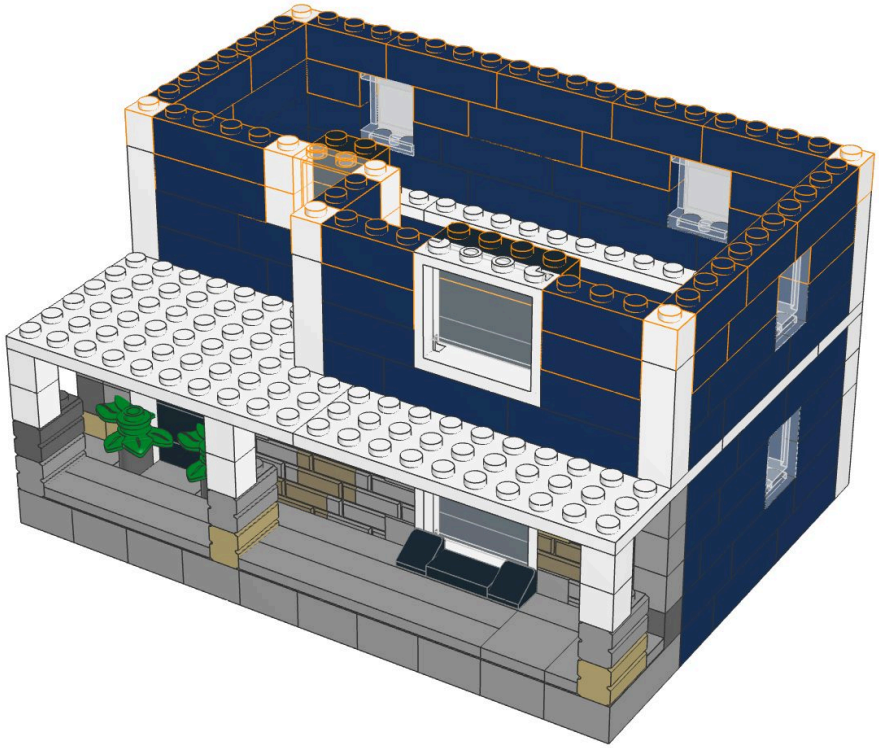

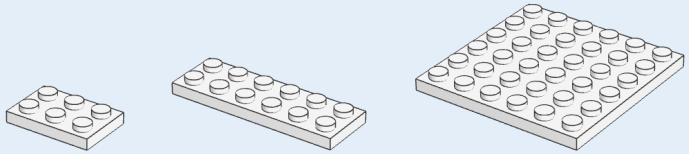

The upper storey: navy walls with white corner boards. Black bricks behind the windows make the glass look dark.

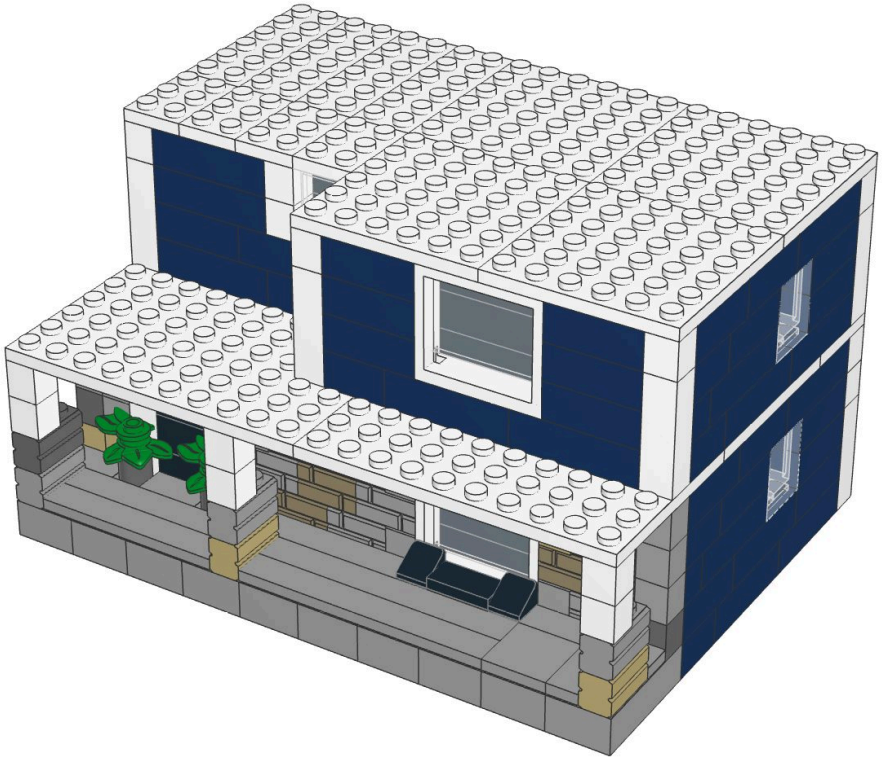

20

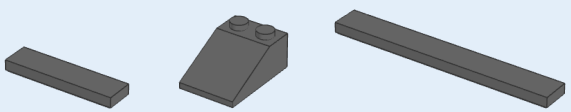

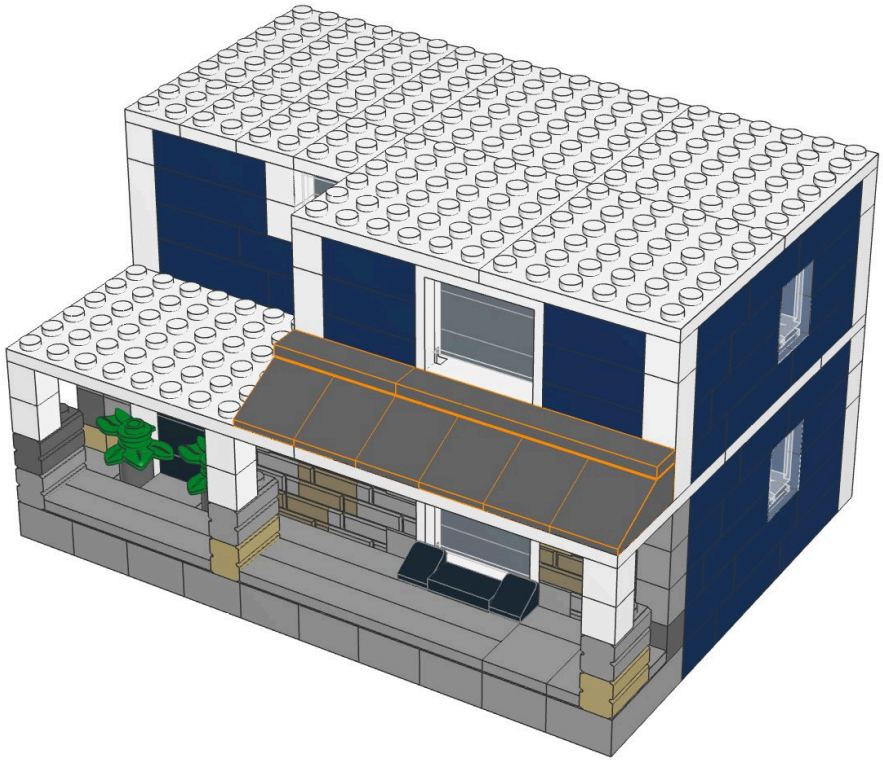

21

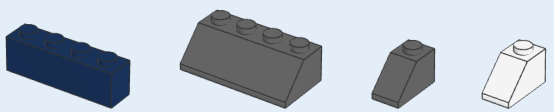

22

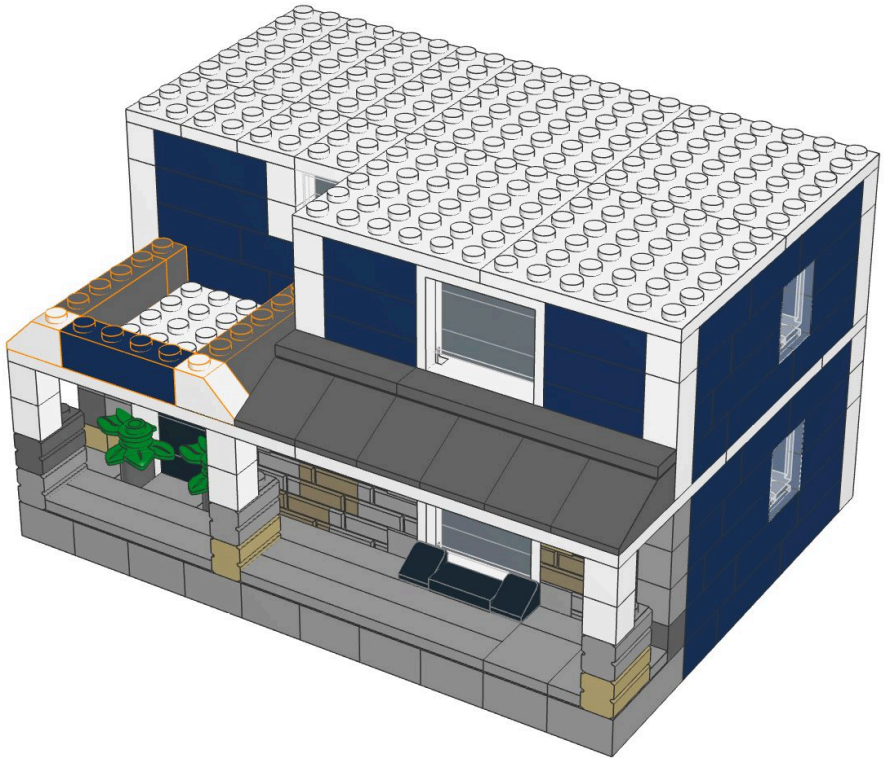

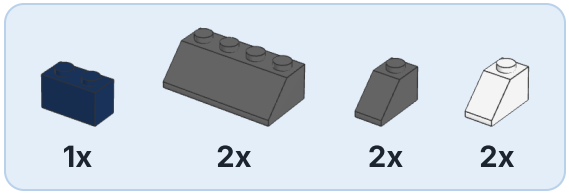

The porch roofs: a shed roof over the window and a small gable over the door.

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

1. Go to **lego.com → Pick and Build → Pick a Brick** and choose **Upload list**.
2. Upload `parts/pick_a_brick_upload.csv`. It lists all 101 kinds of element by Element ID with their quantities, and fills your bag in one go.
3. If anything isn't matched, upload `pick_a_brick_upload_retry.csv`. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in Pick a Brick's Bestseller range, which sells up to 999 of an element per order.

2 · BrickLink or Rebrickable (backup)

The files in `parts/` cover anything Pick a Brick does not stock:

- `bricklink_wanted_list.xml`: BrickLink → Want → Upload.
- `rebrickable_parts.csv`: import it as a Rebrickable part list, then compare stores.
- `pick_a_brick_mapping.csv`: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 739 elements with a known price come to about **US$118**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Base:** six 16×16 plates. Any plates that cover 48×32 studs will do.
- **Stone:** mix the four colours of masonry bricks freely; plain bricks work too.
- **Hidden parts:** the floor plates inside the house and the fillers under the roofs can be any colour.
- **Car:** pick any colour to match your own car.
