# Wilderness Lodge

A compact display model in LEGO® bricks

416  
pieces

19 × 13 cm  
24 × 16 studs

**Unofficial fan design**

An unofficial fan-designed model (MOC), inspired by Disney's Wilderness Lodge at Walt Disney World. It is not affiliated with, sponsored or endorsed by The LEGO Group or Disney. LEGO® is a trademark of The LEGO Group.

## About this model

The great lodge of the Wilderness Lodge, in the Pacific Northwest style: a grey stone base under storeys of reddish-brown logs, a steep green front gable with the tall lobby window, a log porte-cochere at the entrance, two lower wings with their own green gables, the tall stone chimney and the two totem poles that guard the way in.

|--------------------|------------------------------------------------------------------------------------|
| <b>Pieces</b>      | 416 elements, 47 kinds, 9 colours                                                  |
| <b>Size</b>        | 24 × 16 studs (19.2 × 12.8 cm), 11 cm tall                                         |
| <b>Scale</b>       | about 1:250 (one storey = 4 plates, 1 stud ≈ 2 m), like the large resort models    |
| <b>Build time</b>  | about 1½ to 2 hours                                                                |
| <b>Model files</b> | wilderness_lodge_compact.mpd (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad. |

### How the build is organised

1. The display base and the lawn
2. The great lodge
3. The wings (build 2)
4. The chimney
5. The totem poles (build 2)

Every kit in the compact resort collection stands on the same 24×16 display base with a black front band. Each section starts with a list of the parts it needs.

## Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

### Tips

- The walls are log bricks: 1×4 and 1×2 logs, with a plain 1×1 brick where a run needs one more stud. The ground storey is stone: masonry bricks in two greys, mixed freely.
- The log posts of the porte-cochere go in early; the deck over them is part of the third-storey floor band.
- Roofs go up one row of slopes at a time. A few reddish-brown bricks hidden under the gables have a step of their own, just before the slopes that rest on them.
- A **"Build 2"** badge means you build that module twice.

### Getting the parts

Every element is listed with its LEGO Element ID in the inventory at the back, and in parts/ as CSV and BrickLink XML files. See "Ordering the parts" on the last pages.

# Ordering the parts

## 1 · LEGO Pick a Brick (lego.com)

- 1. Go to **lego.com** → **Pick and Build** → **Pick a Brick** and choose **Upload list**.
- 2. Upload parts/pick\_a\_brick\_upload.csv. It lists all 47 kinds of element by Element ID with their quantities, and fills your bag in one go.
- 3. If anything isn't matched, upload pick\_a\_brick\_upload\_retry.csv. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
- 4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in Pick a Brick's Bestseller range, which ships from the US warehouse.

## 2 · BrickLink or Rebrickable (backup)

The files in parts/ cover anything Pick a Brick does not stock:

- bricklink\_wanted\_list.xml: BrickLink → Want → Upload.
- rebrickable\_parts.csv: import it as a Rebrickable part list, then compare stores.
- pick\_a\_brick\_mapping.csv: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

## What it costs

At Pick a Brick prices seen in 2022–2025, the 416 elements with a known price come to about **US\$53**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

# Substitutions

- **Ground:** any colour of tiles works for the base around the building.
- **Hidden parts:** bricks and plates inside the building can be any colour.
