

BUILD INSTRUCTIONS

Iced Pumpkin Spice Latte

A tall iced autumn latte in LEGO® bricks

137
pieces
10 cm
tall

Custom kit

A custom model built from genuine LEGO® elements. It is not affiliated with, sponsored or endorsed by The LEGO Group. LEGO® is a trademark of The LEGO Group.

About this model

A tall glass of iced latte: dark coffee at the bottom fading to milky latte at the top, clear ice cubes, a thick layer of pumpkin cream cold foam with a dusting of cinnamon, and a red straw with white stripes. It stands on a slate board with a little pumpkin, a bundle of cinnamon sticks, autumn leaves and two ice cubes.

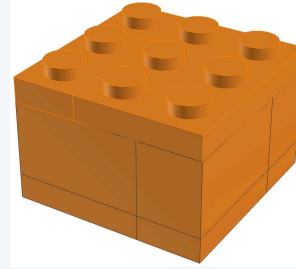

Pieces	137 elements, 39 kinds, 8 colours
Size	10 × 8 studs (8 × 6.4 cm), 10 cm tall to the top of the straw; the glass is 4 cm wide and 6.4 cm tall
Build time	about 30 to 45 minutes
Model files	iced_pumpkin_latte.mpd (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The board
2. The glass
3. The pumpkin
4. Cinnamon sticks, leaves and ice

The glass and the pumpkin are built on their own and then set on the board. Every section starts with a list of the parts it needs.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- The glass walls are clear panels with a thin wall on one side. Turn each one so the smooth wall faces out, as in the pictures.
- Build the drink one layer at a time. The clear pieces inside are the ice cubes, and the red round bricks in the back corner make the straw.
- The upper ring of panels turns the other way from the lower ring, so every panel covers a corner and locks the walls together.

Getting the parts

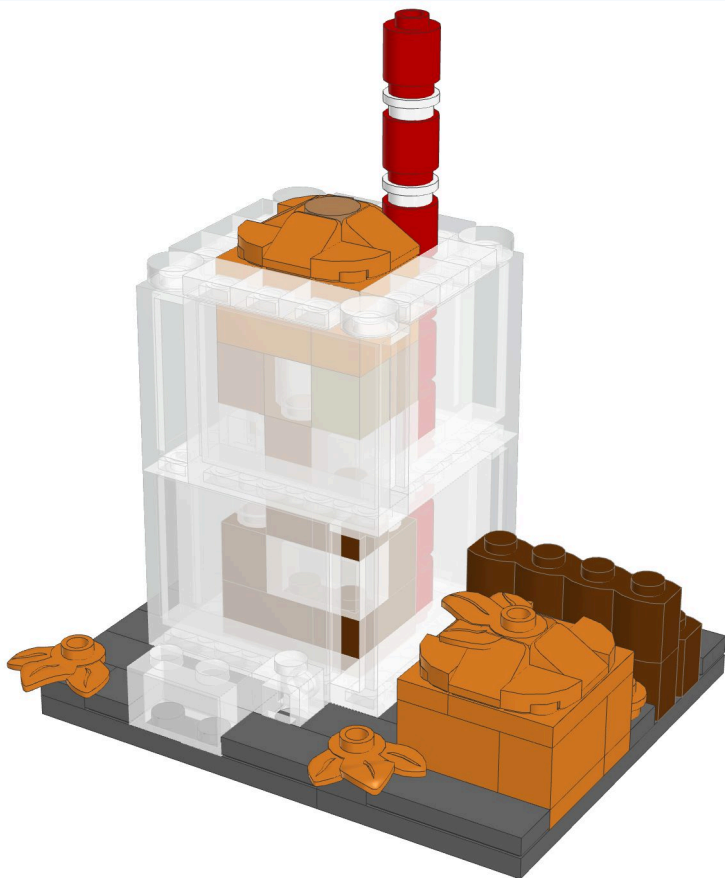

Every element is listed with its LEGO Element ID in the inventory at the back, and in parts/ as CSV and BrickLink XML files. See “Ordering the parts” on the last pages.

1

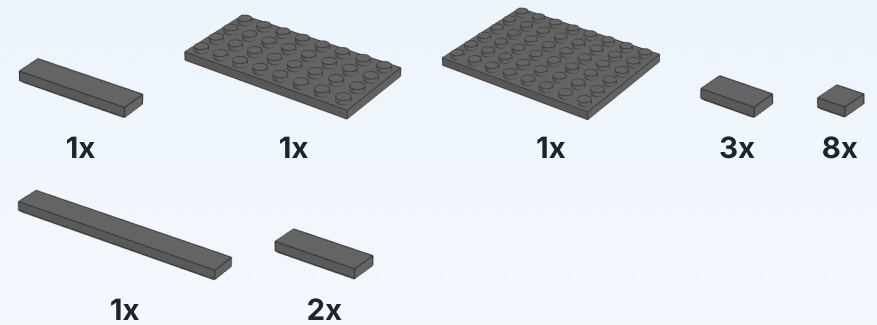

The board

Two dark grey plates make a slate board, and tiles make its smooth top. Leave the gaps open: the glass, the pumpkin, the cinnamon sticks, the leaves and the ice cubes go there.

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

1. Go to **lego.com** → **Pick and Build** → **Pick a Brick** and choose **Upload list**.
2. Upload parts/pick_a_brick_upload.csv. It lists all 39 kinds of element by Element ID with their quantities, and fills your bag in one go.
3. If anything isn't matched, upload pick_a_brick_upload_retry.csv. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in the Bestseller range, which ships from the US warehouse.

2 · BrickLink or Rebrickable (backup)

The files in parts/ cover anything Pick a Brick does not stock:

- bricklink_wanted_list.xml: BrickLink → Want → Upload.
- rebrickable_parts.csv: import it as a Rebrickable part list, then compare stores.
- pick_a_brick_mapping.csv: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 137 elements with a known price come to about **US\$14**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Board:** any colour of plates and tiles works. Tan or reddish brown makes a wooden board.
- **Hidden parts:** the 1×1 plate in the middle of the glass's base can be any colour.
- **Straw:** white round bricks with red round plates make a white straw with red stripes. Avoid green.
- **Ice:** any clear 1×1 or 1×2 bricks work as ice cubes.

Colour names
