BUILD INSTRUCTIONS

Gable House

501
pieces

26 × 26 cm
32 × 32 studs

A one-and-a-half-storey house with a front gable and balcony, in LEGO® bricks

Unofficial fan design

An unofficial fan-designed model (MOC) of a generic house, designed from a photo. It is not affiliated with, sponsored or endorsed by The LEGO Group. LEGO® is a trademark of The LEGO Group.

About this model

A small one-and-a-half-storey house under one steep front gable. The roof is black with white trim along both rakes and the eaves. The half-storey in the roof is clad in warm wood, with a black balcony door and a white-trimmed window either side. Below it, charcoal siding, white double windows and a small entry porch on four white columns: its flat roof is the balcony, with a white spindle railing. The lot has the lawn, the walk and steps, flower beds with shrubs and daffodils, a wooden privacy fence, tall pines behind and a young tree at the front.

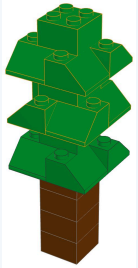

Pieces	501 elements, 62 kinds, 10 colours
Size	32 × 32 studs (25.6 × 25.6 cm), 13 cm tall
Scale	about 1:76 (1 stud = 2 ft, one storey = 4 bricks), like the Family Home
Build time	about 2 to 2½ hours
Model files	`gable_house.mpd` (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The lot: base, street, sidewalk, walk, steps and lawn
2. The house: walls, porch, balcony, gable and roof
3. The garden: shrubs, daffodils and fence
4. The pines (build 3) and the front tree

The house, the pines and the tree are built on their own and then set on the lot. Every section starts with a list of the parts it needs.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- Each storey is four courses of bricks. The corners swap between the two walls on every course, so follow the pictures closely where two walls meet.
- Slide the clear glass into each white window frame before you place it. The clear panels go in with their flat side facing out.
- The wood gable stands on the front wall, in front of the roof. Build it course by course up to its white peak before you start the roof behind it.
- The roof is built one row of slopes at a time. The white slopes at its ends and the white 1×1 slopes on the gable's end steps form the rake trim.
- A **“Build 3”** badge means you build that module three times.

Getting the parts

Every element is listed with its LEGO Element ID in the inventory at the back, and in `parts/` as CSV and BrickLink XML files. See “Ordering the parts” on the last pages.

1

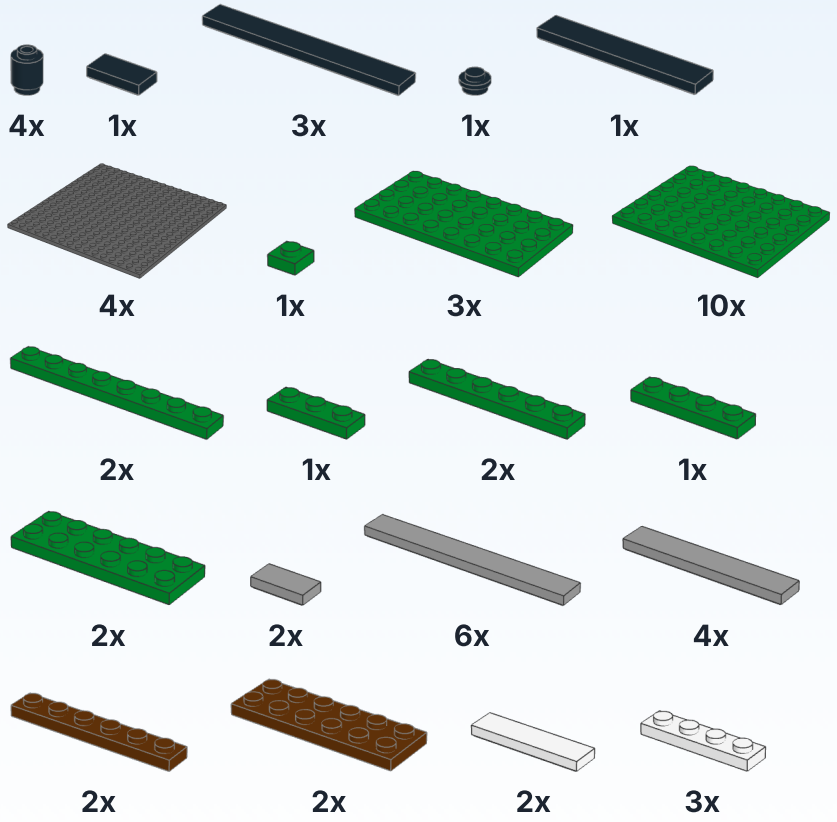

The lot

Four 16 × 16 plates make the base: the front two first, tied together by the street and the sidewalk, then the back two, tied on by the lawn.

The black downspout stands against the right wall, at its front corner. The eave of the roof rests on it.

2

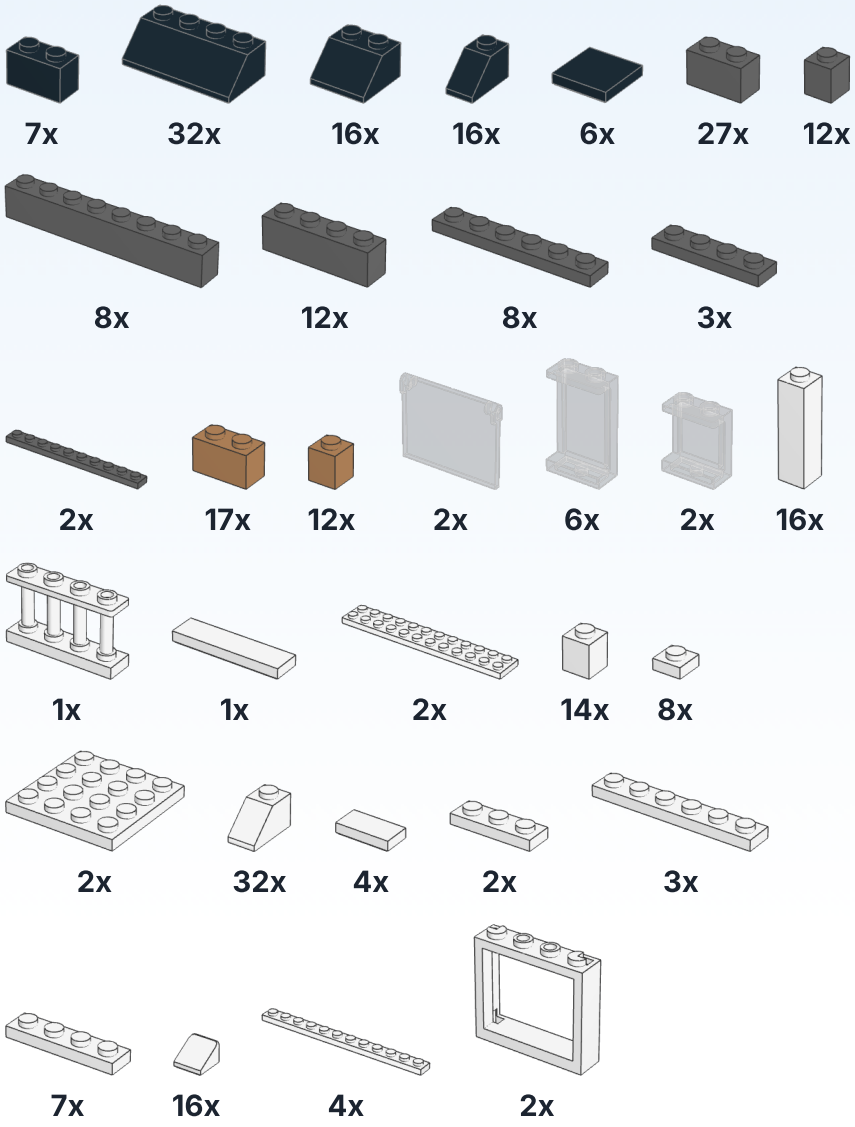

The house

Charcoal siding on a white skirt, white double windows and the black front door; the porch on four white columns with the balcony on its roof; the wood gable with the balcony door and two windows; and the steep black roof with white rake trim.

15

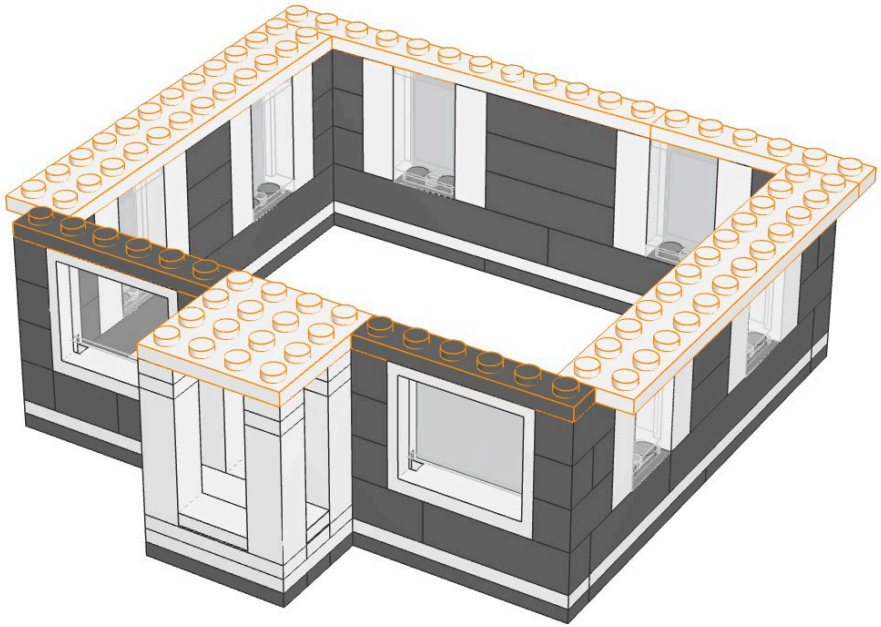

The four white columns stand on the porch. Two are at the front corners, two against the wall either side of the door.

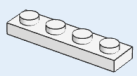

16

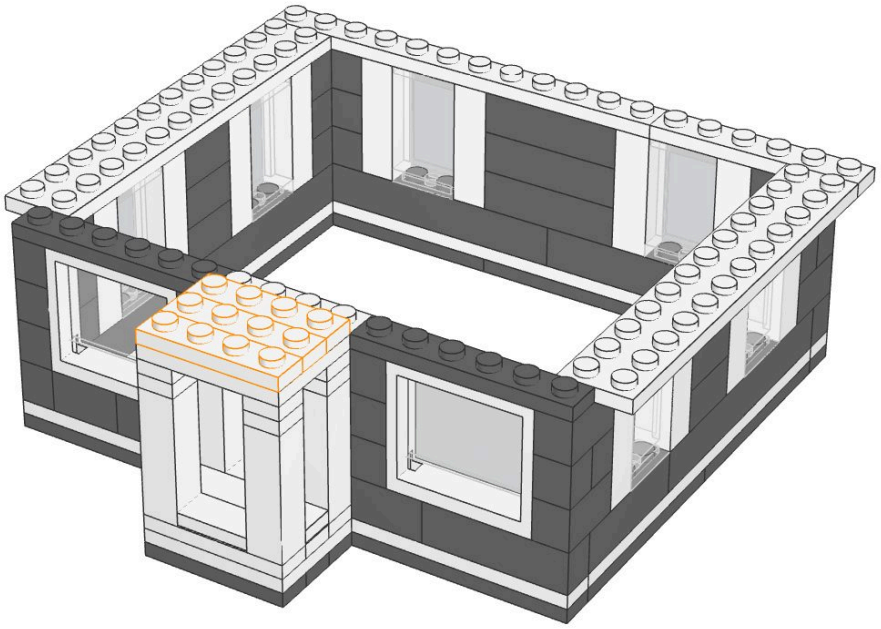

The white 4×4 plate is the porch roof. It reaches back onto the front wall, which ties the porch to the house.

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

1. Go to **lego.com → Pick and Build → Pick a Brick** and choose **Upload list**.
2. Upload `parts/pick_a_brick_upload.csv`. It lists all 62 kinds of element by Element ID with their quantities, and fills your bag in one go.
3. If anything isn't matched, upload `pick_a_brick_upload_retry.csv`. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in Pick a Brick's Bestseller range, which sells up to 999 of an element per order.

2 · BrickLink or Rebrickable (backup)

The files in `parts/` cover anything Pick a Brick does not stock:

- `bricklink_wanted_list.xml`: BrickLink → Want → Upload.
- `rebrickable_parts.csv`: import it as a Rebrickable part list, then compare stores.
- `pick_a_brick_mapping.csv`: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 501 elements with a known price come to about **US$79**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Base:** four 16×16 plates. Any plates that cover 32×32 studs will do.
- **Hidden parts:** the floor plates and the deck under the roof can be any colour.
- **Wood:** the gable is Medium Nougat; Tan or Dark Tan bricks give a lighter wood.

Colour names

In this booklet	LEGO name	BrickLink
White	White	White
