

BUILD INSTRUCTIONS

Riviera Resort

A mid-size display model in LEGO® bricks

604
pieces

26 × 19 cm
32 × 24 studs

Unofficial fan design

An unofficial fan-designed model (MOC), inspired by Disney's Riviera Resort at Walt Disney World. It is not affiliated with, sponsored or endorsed by The LEGO Group or Disney. LEGO® is a trademark of The LEGO Group.

About this model

The entrance front of the Riviera, laid out like the large Riviera build on a smaller base: a symmetric white European facade with black window grids, the central pavilion under a steep grey mansard with oval dormers and a white centre dormer, two taller corner towers with square grey domes and white lanterns, and two lower guest wings with red awnings and flat grey roofs. In front, the arched porte-cochere with its own mansard and round dormers stands over the drive, behind a garden of clipped hedges and red flowers, with palms along the drive.

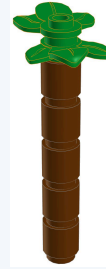

Pieces	604 elements, 66 kinds, 9 colours
Size	32 × 24 studs (25.6 × 19.2 cm), 14 cm tall
Scale	about 1:250 (one storey = 4 plates, 1 stud ≈ 2 m), like the large resort models
Build time	about 2½ to 3 hours
Model files	riviera_midsize.mpd (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The display base, the drive and the lawns
2. The central pavilion
3. The domed towers (build 2)
4. The guest wings (build 2)
5. The porte-cochere
6. The garden and the palms

Every kit in the mid-size resort collection stands on the same 32×24 display base with a black front band. Each section starts with a list of the parts it needs.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- Each storey is one course of white bricks with black bricks for the windows, then a band of white plates. Check the window pattern against the picture before you add the band, and keep black and white parts in separate trays.
- The red awnings are 1×1 slopes set into the top band, right above the top-floor windows. Point them outward.
- The mansards and the domes are rings of steep grey slopes. The oval dormers are white bricks with a hole, stacked between them.
- A **"Build 2"** badge means you build that module twice. Build both at the same time, one step at a time.

Getting the parts

Every element is listed with its LEGO Element ID in the inventory at the back, and in parts/ as CSV and BrickLink XML files. See "Ordering the parts" on the last pages.

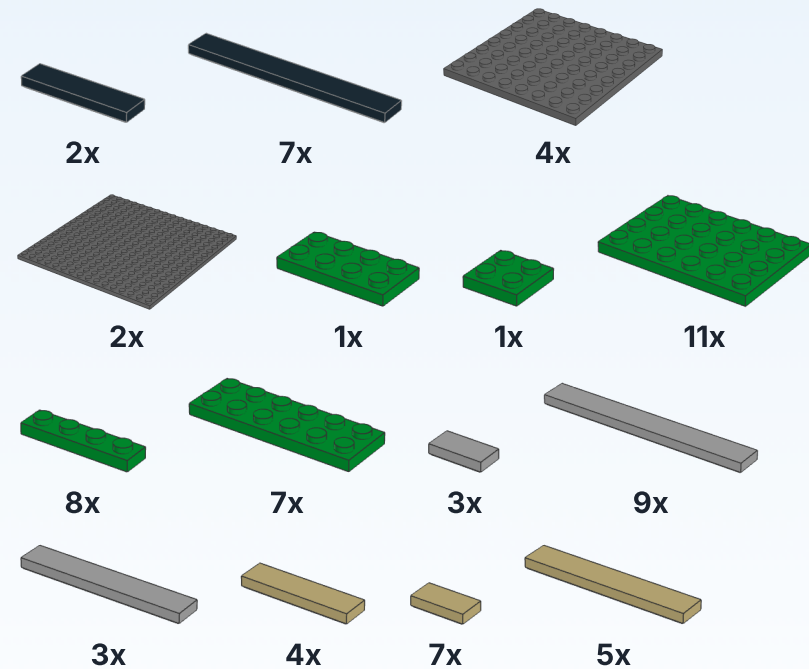

1

The display base

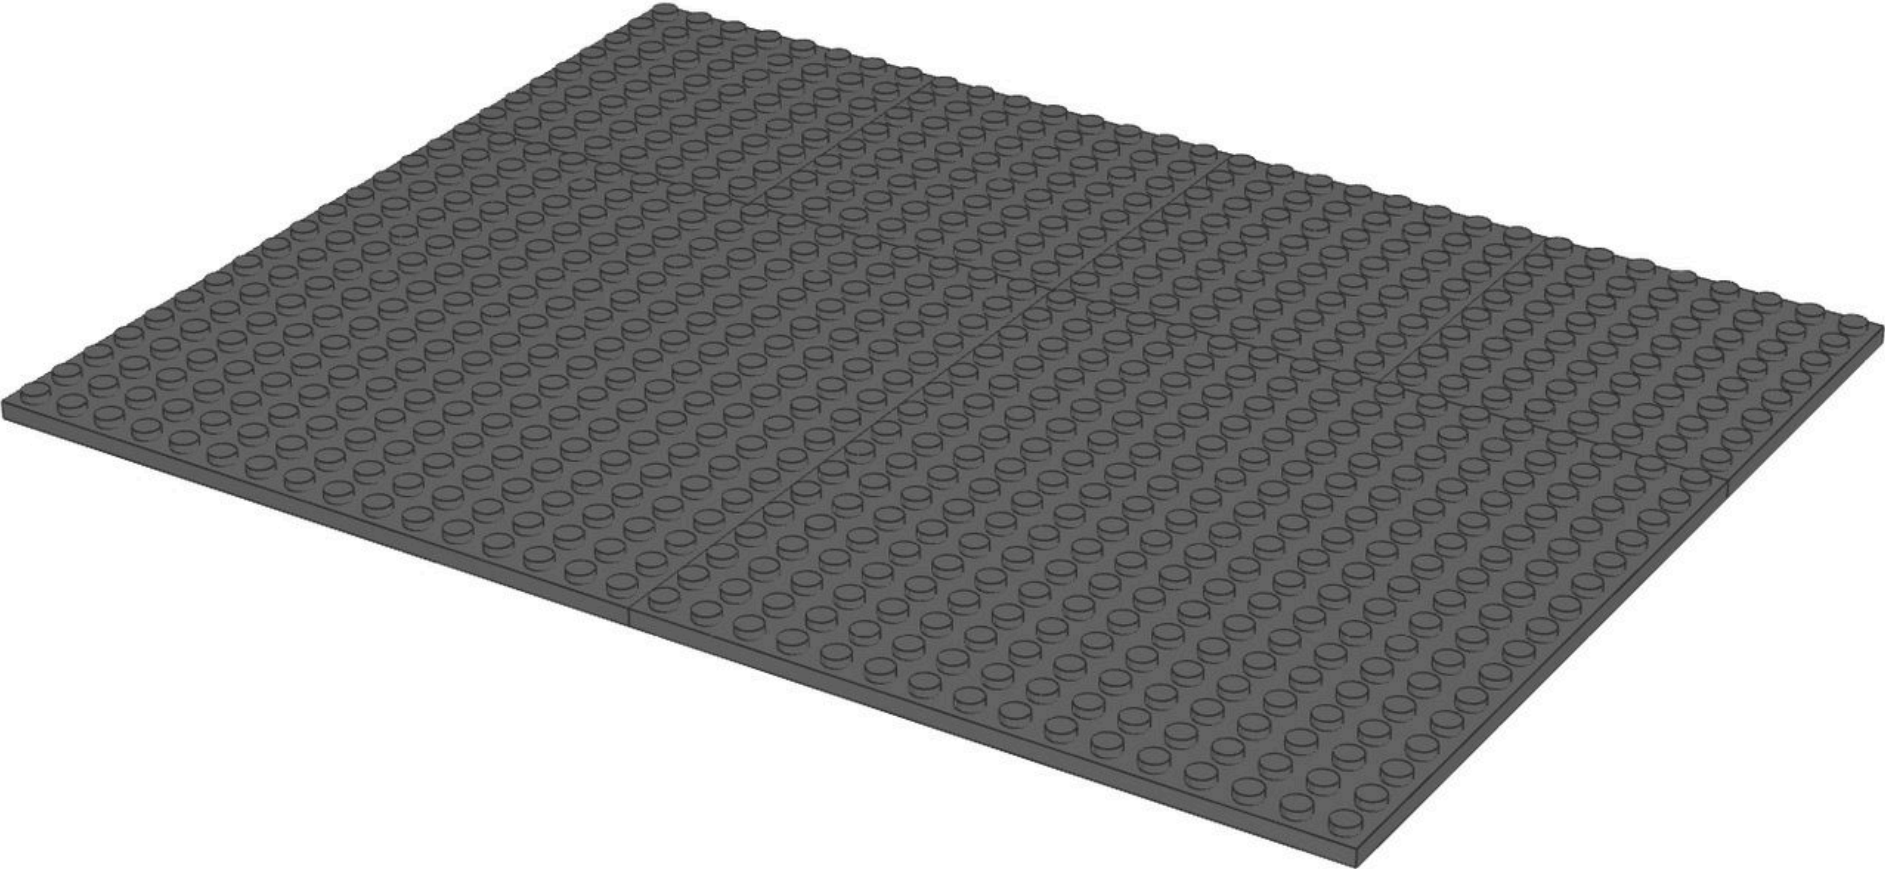

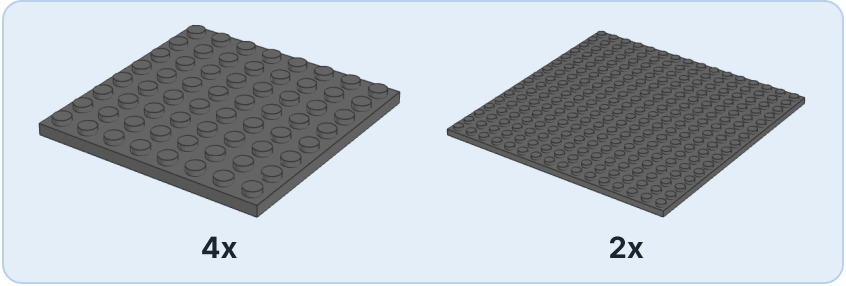

The base and the black band are the same for every mid-size kit. The drive, the walks and the lawns go on next; the drive tiles tie the base plates together.

51

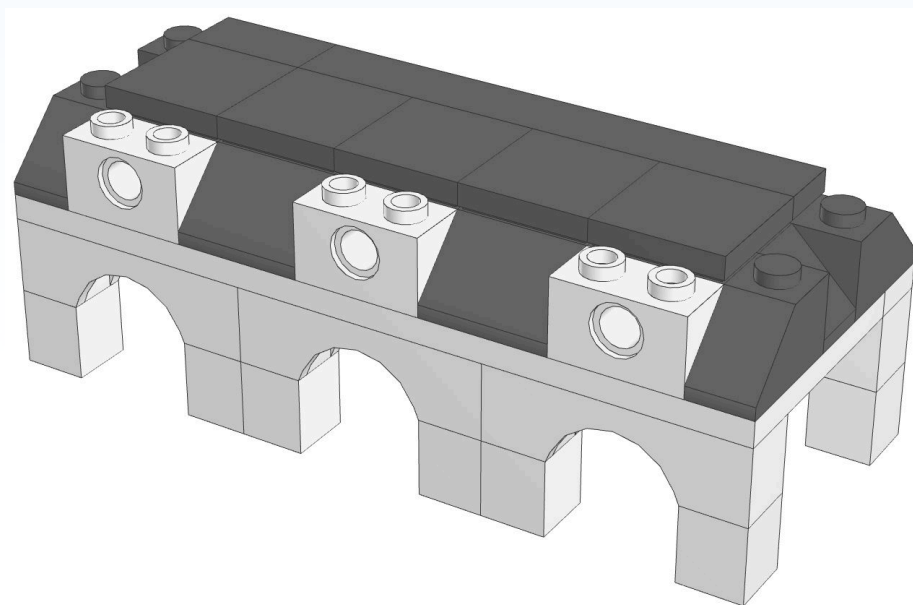

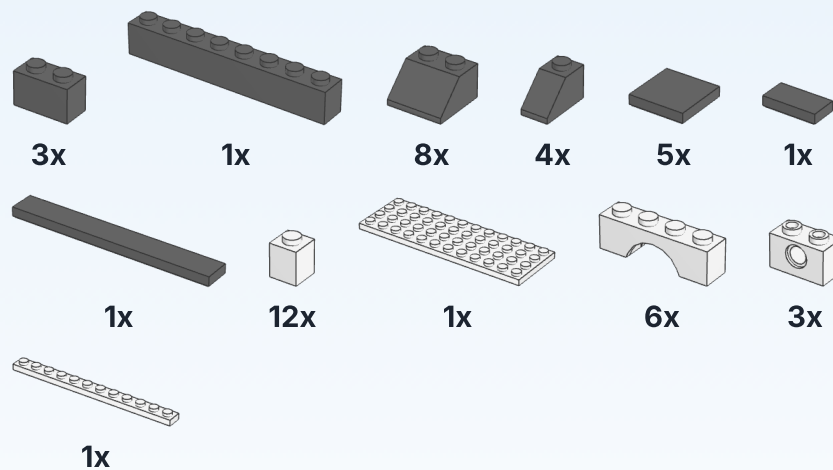

5

The porte-cochere

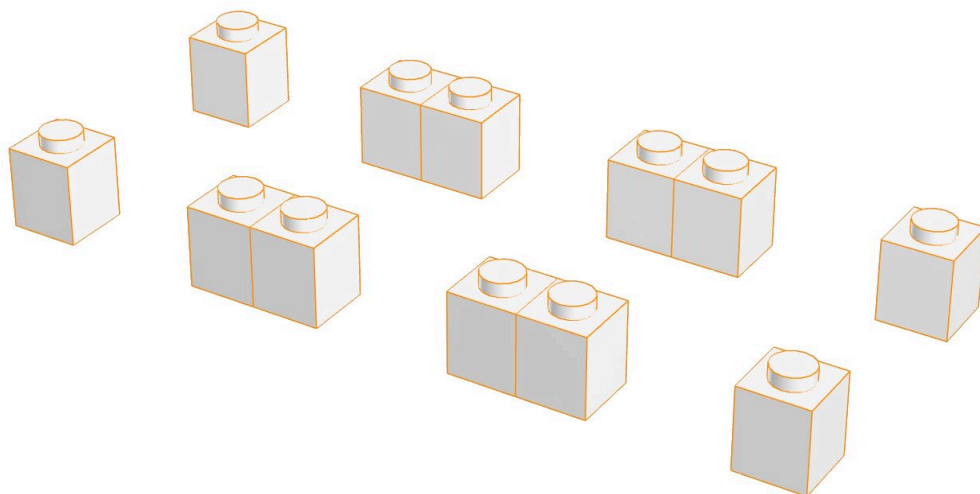

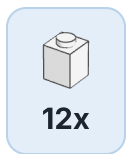

Three white arches at the front and three at the back carry a deck and a grey mansard with three round dormers. It stands over the drive in front of the central pavilion.

46 elements in this section

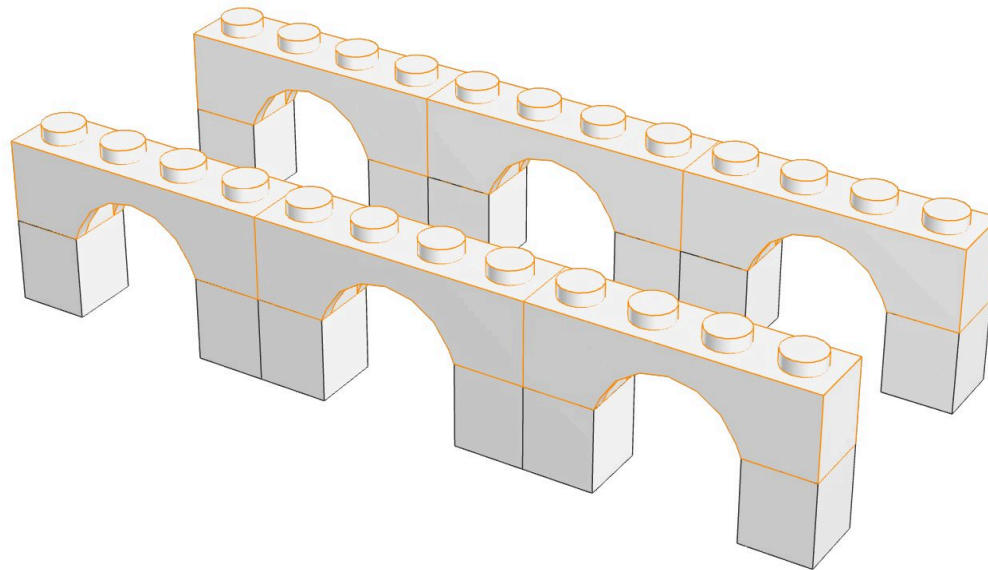

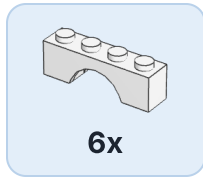

PARTS FOR THIS SECTION

52

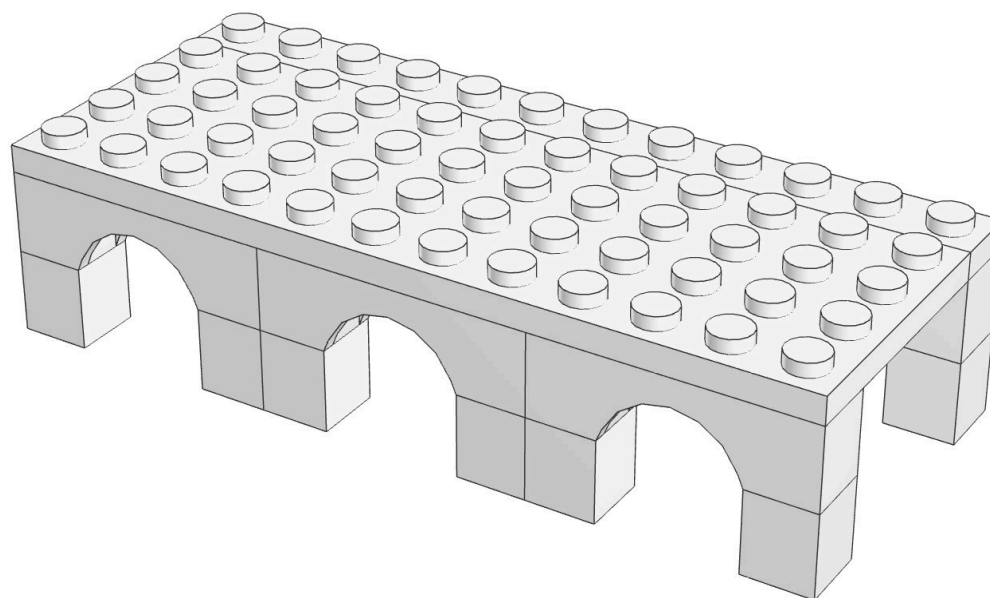

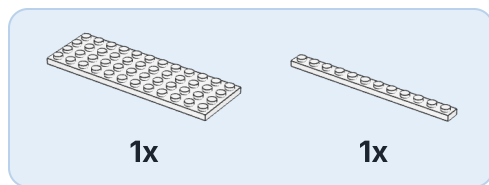

53

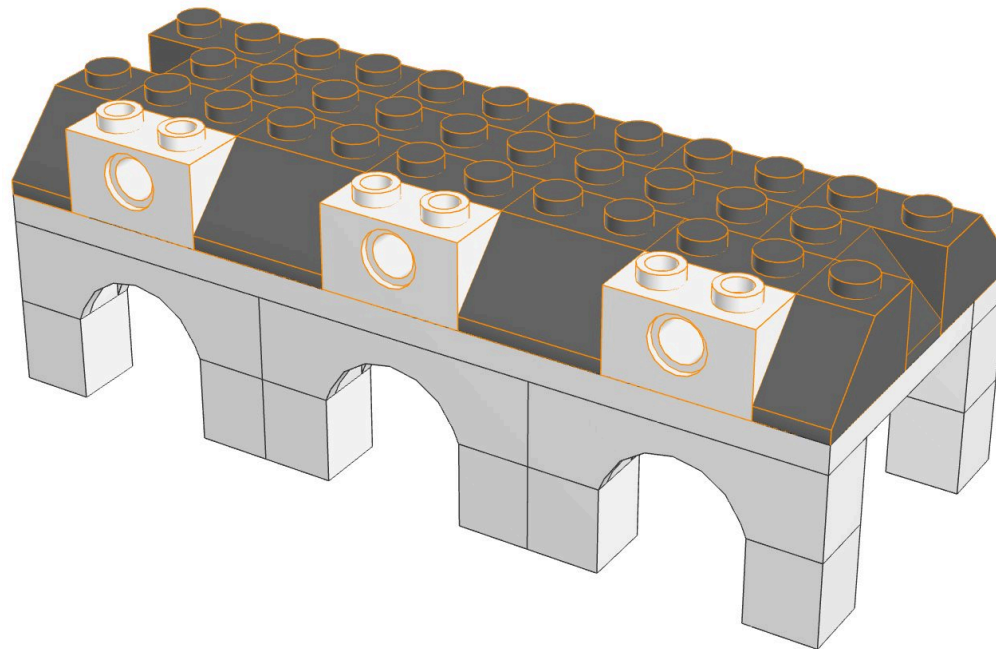

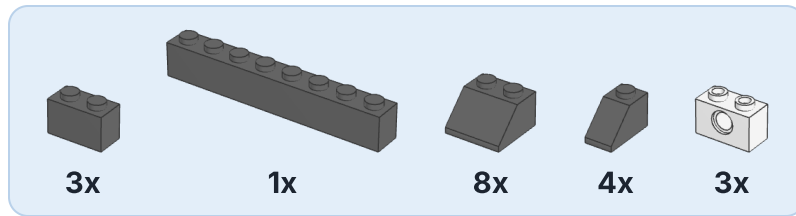

Each arch stands on two of the white bricks.

54

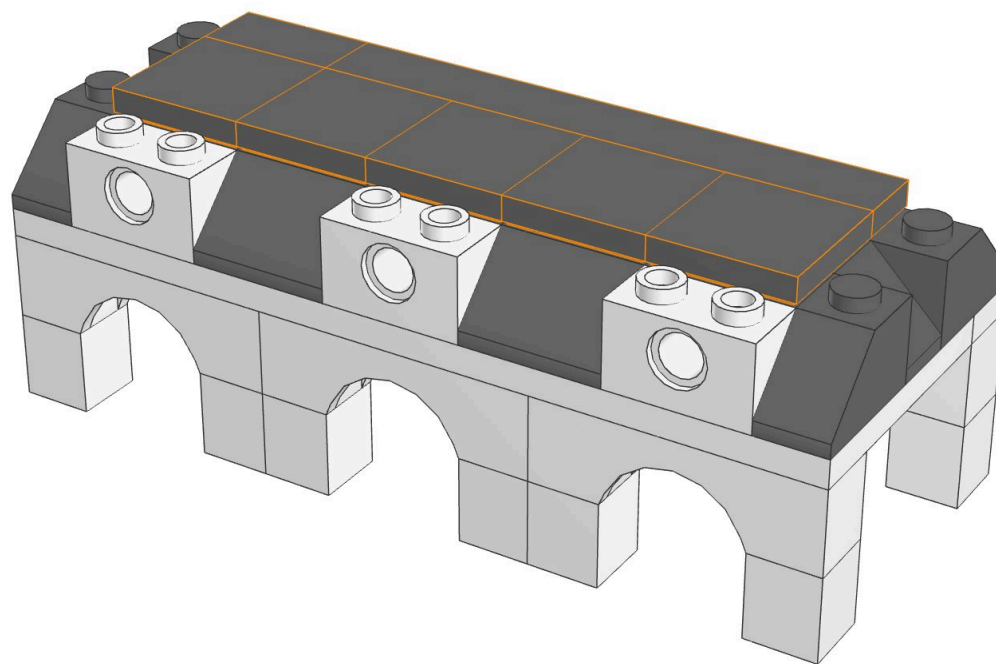

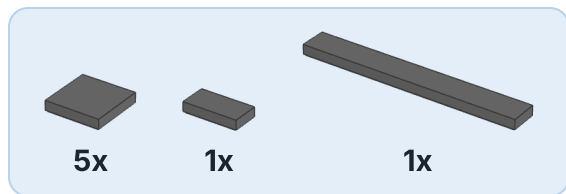

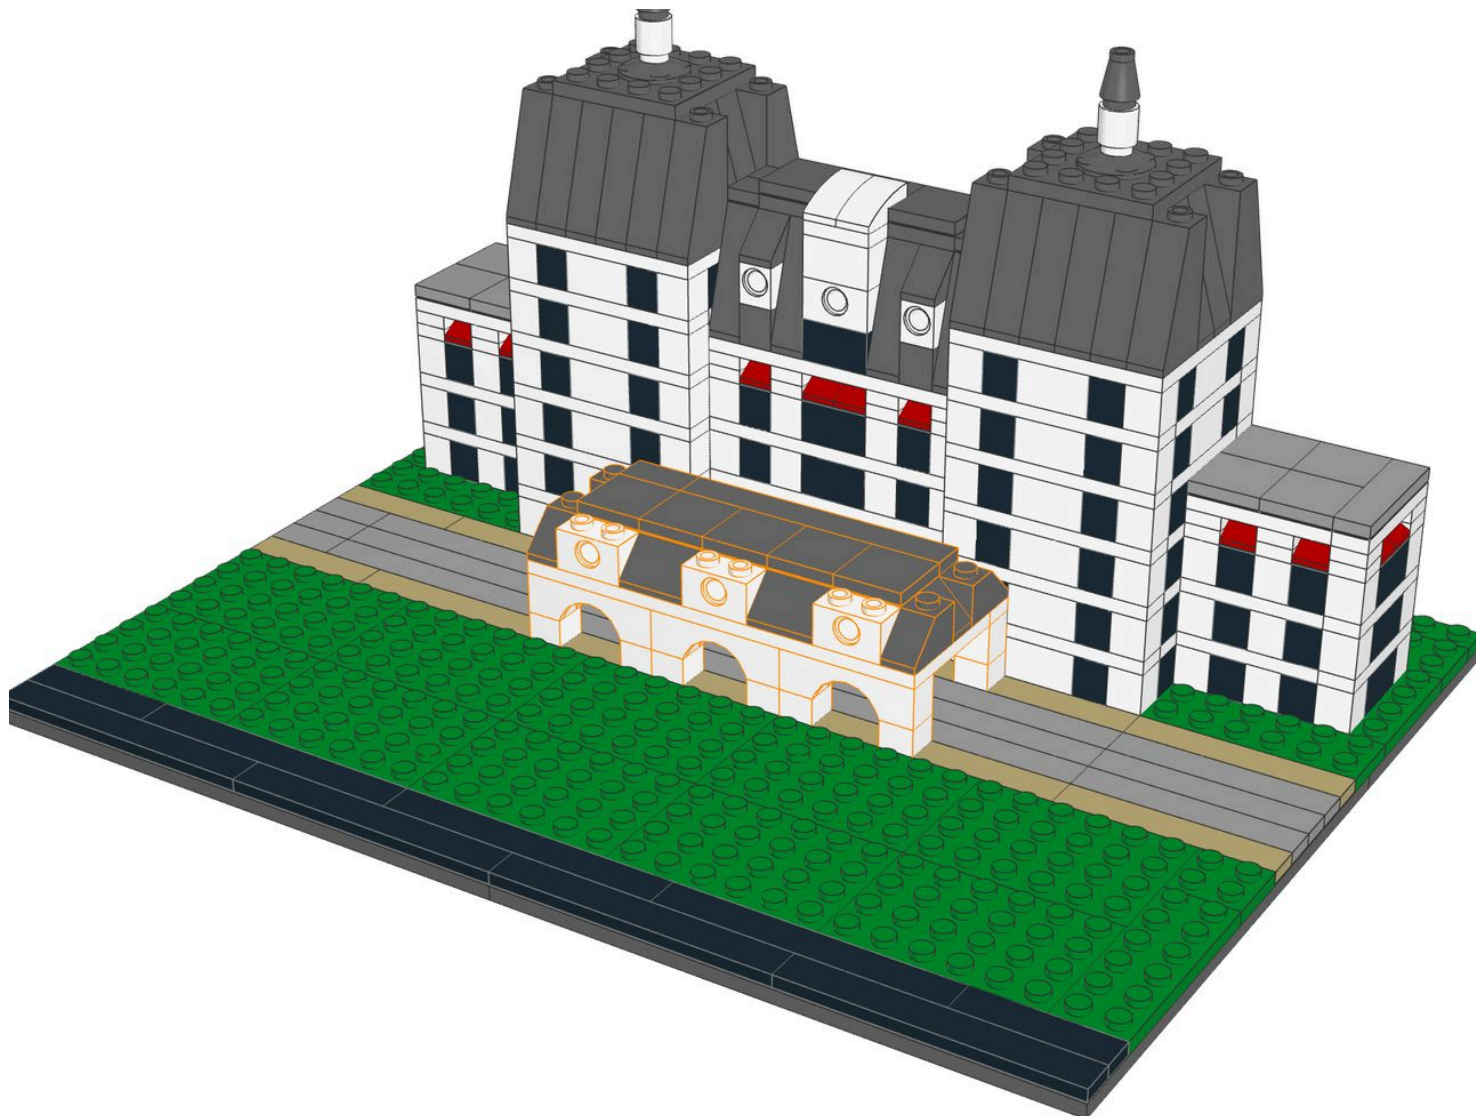

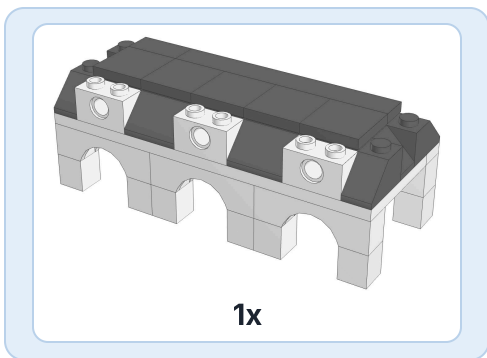

55

The round dormers are white bricks with a hole. A row of grey bricks hidden in the middle holds up the roof tiles.

56

6

The garden and the palms

Clipped hedges and red flowers in front of the portecochere, and palms along the drive.

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

- 1. Go to **lego.com** → **Pick and Build** → **Pick a Brick** and choose **Upload list**.
- 2. Upload parts/pick_a_brick_upload.csv. It lists all 66 kinds of element by Element ID with their quantities, and fills your bag in one go.
- 3. If anything isn't matched, upload pick_a_brick_upload_retry.csv. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
- 4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in Pick a Brick's Bestseller range, which ships from the US warehouse.

2 · BrickLink or Rebrickable (backup)

The files in parts/ cover anything Pick a Brick does not stock:

- bricklink_wanted_list.xml: BrickLink → Want → Upload.
- rebrickable_parts.csv: import it as a Rebrickable part list, then compare stores.
- pick_a_brick_mapping.csv: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 604 elements with a known price come to about **US\$78**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Ground:** any colour of tiles works for the base around the building.
- **Hidden parts:** bricks and plates inside the building can be any colour.
