BUILD INSTRUCTIONS

Old Key West Resort

A mid-size display model in LEGO® bricks

575
pieces

26 × 19 cm
32 × 24 studs

Unofficial fan design

An unofficial fan-designed model (MOC), inspired by Disney's Old Key West Resort at Walt Disney World. It is not affiliated with, sponsored or endorsed by The LEGO Group or Disney. LEGO® is a trademark of The LEGO Group.

About this model

The arrival front of Old Key West, facing the viewer: the Hospitality House as a big Key West house in pale yellow with white corner boards, raised on a white lattice skirt. A white porch with posts and railings wraps round the front and sides under a flat tin porch roof, and the entrance portico carries the balcony over the front door. Above them rise a steep light grey tin roof with white-trimmed gable ends, a front gable with a louvre and the louvred cupola on the ridge. Front steps and a sandy walk lead up from the street between lamp posts and flowering shrubs, and a smaller guest villa stands a little back on each side, one aqua and one pink, with white porches and front-gabled tin roofs, among palms.

Pieces	575 elements, 64 kinds, 12 colours
Size	32 × 24 studs (25.6 × 19.2 cm), 11 cm tall
Scale	about 1:250 (one storey = 4 plates, 1 stud ≈ 2 m), like the large resort models
Build time	about 2 to 2½ hours
Model files	`old_key_west_midsize.mpd` (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The display base, the walk and the lawns
2. The Hospitality House
3. The tin roof and the cupola
4. The aqua villa
5. The pink villa
6. The steps, the palms, the lamp posts and the shrubs

Every kit in the mid-size resort collection stands on the same 32×24 display base with a black front band. Each section starts with a list of the parts it needs.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- Each storey is one course of bricks (yellow, aqua or pink, with black bricks for the windows and white ones at the corners), then a layer of white plates. Keep the colours in separate trays.
- The porch railings are round 1×1 plates with tiles on top, between posts of round 1×1 bricks. The grey tiles on the porch ceiling are the porch roof.
- The tin roof is a module of its own: build it on the table, then set it on the upper walls. It goes up one row of slopes at a time; hidden grey bricks under the upper rows have a step of their own, just before the slopes that rest on them.
- The two villas are the same build in two colours.

Getting the parts

Every element is listed with its LEGO Element ID in the inventory at the back, and in `parts/` as CSV and BrickLink XML files. See “Ordering the parts” on the last pages.

1

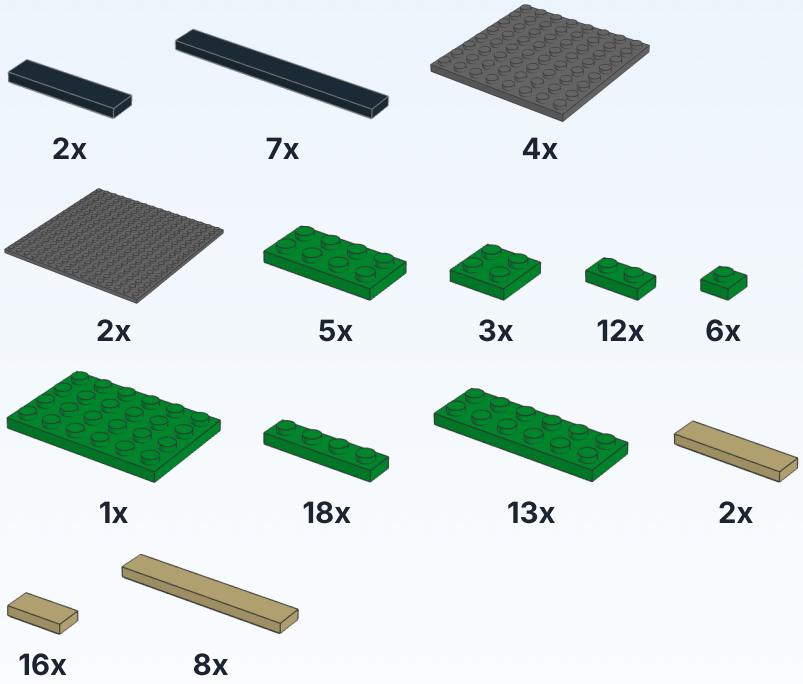

The display base

The base and the black band are the same for every mid-size kit. The walk and the lawns go on next.

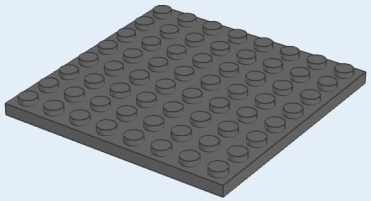

99 elements in this section

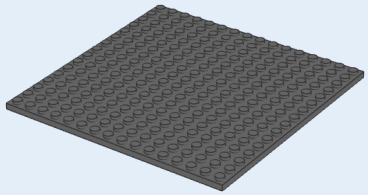

PARTS FOR THIS SECTION

2

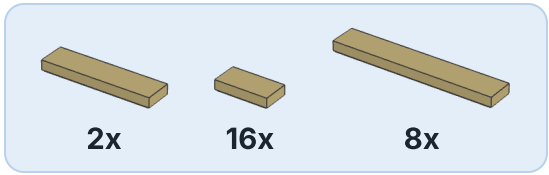

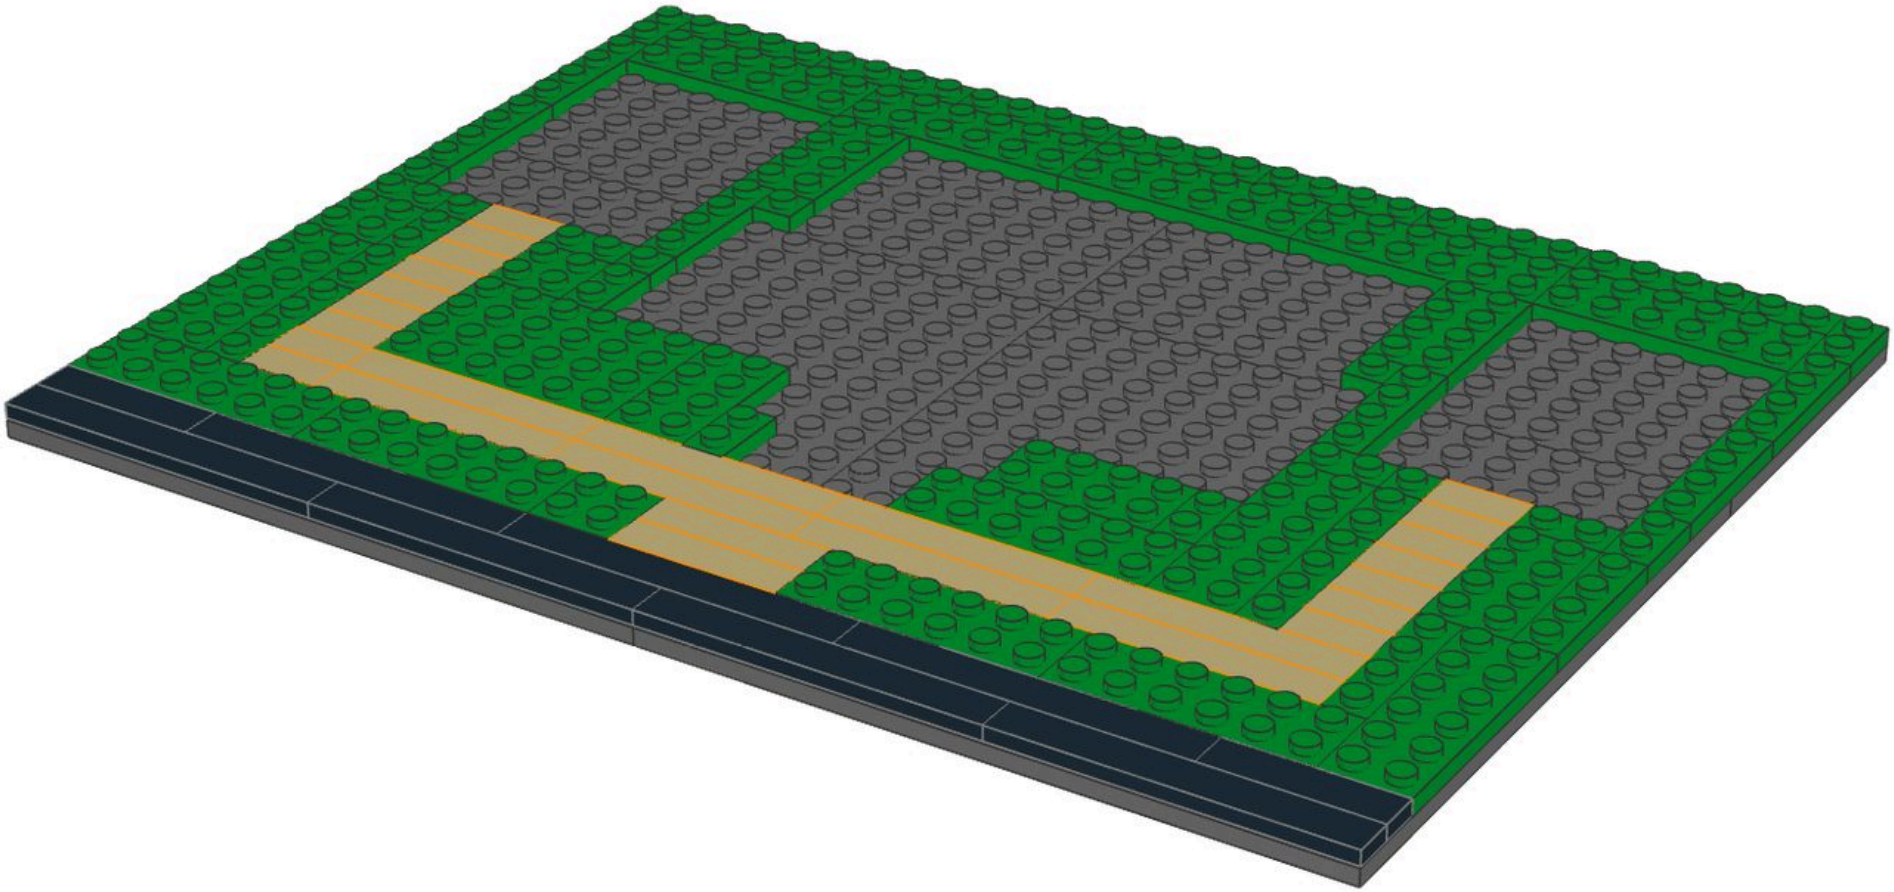

3

4

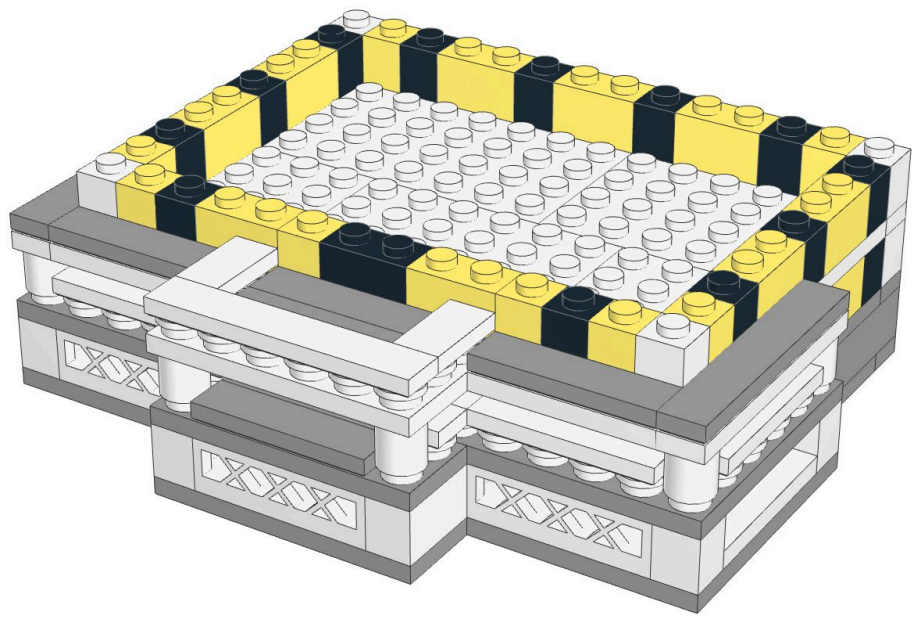

2

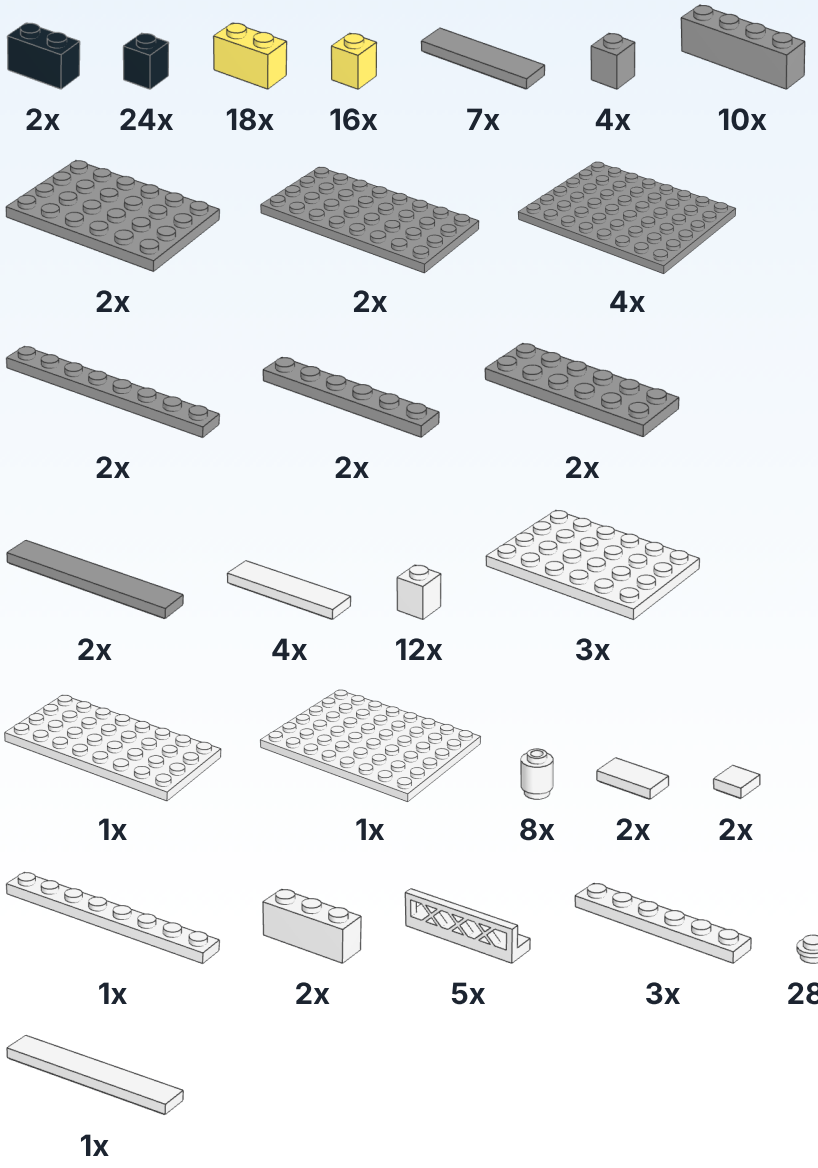

The Hospitality House

A grey foundation behind the white lattice skirt, then two yellow storeys with the white porch, its grey tin roof, the portico and the balcony over the front door.

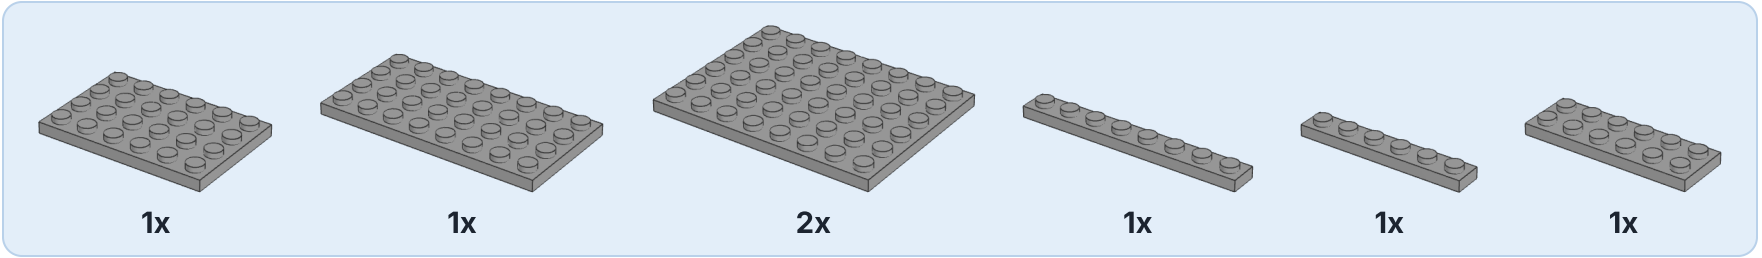

170 elements in this section

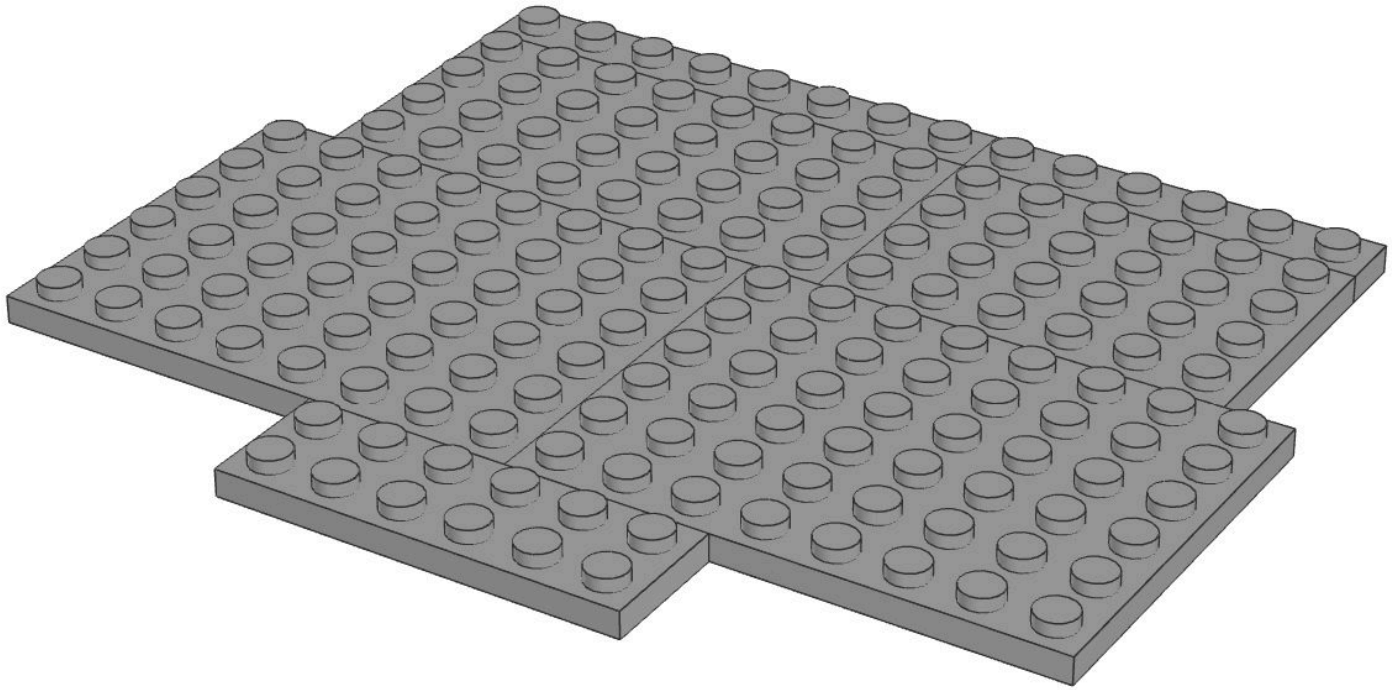

PARTS FOR THIS SECTION

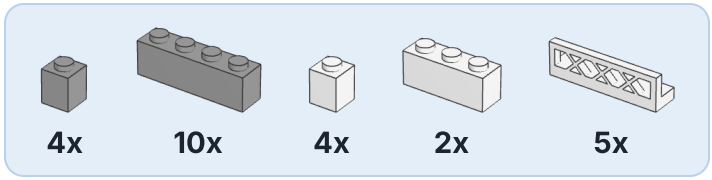

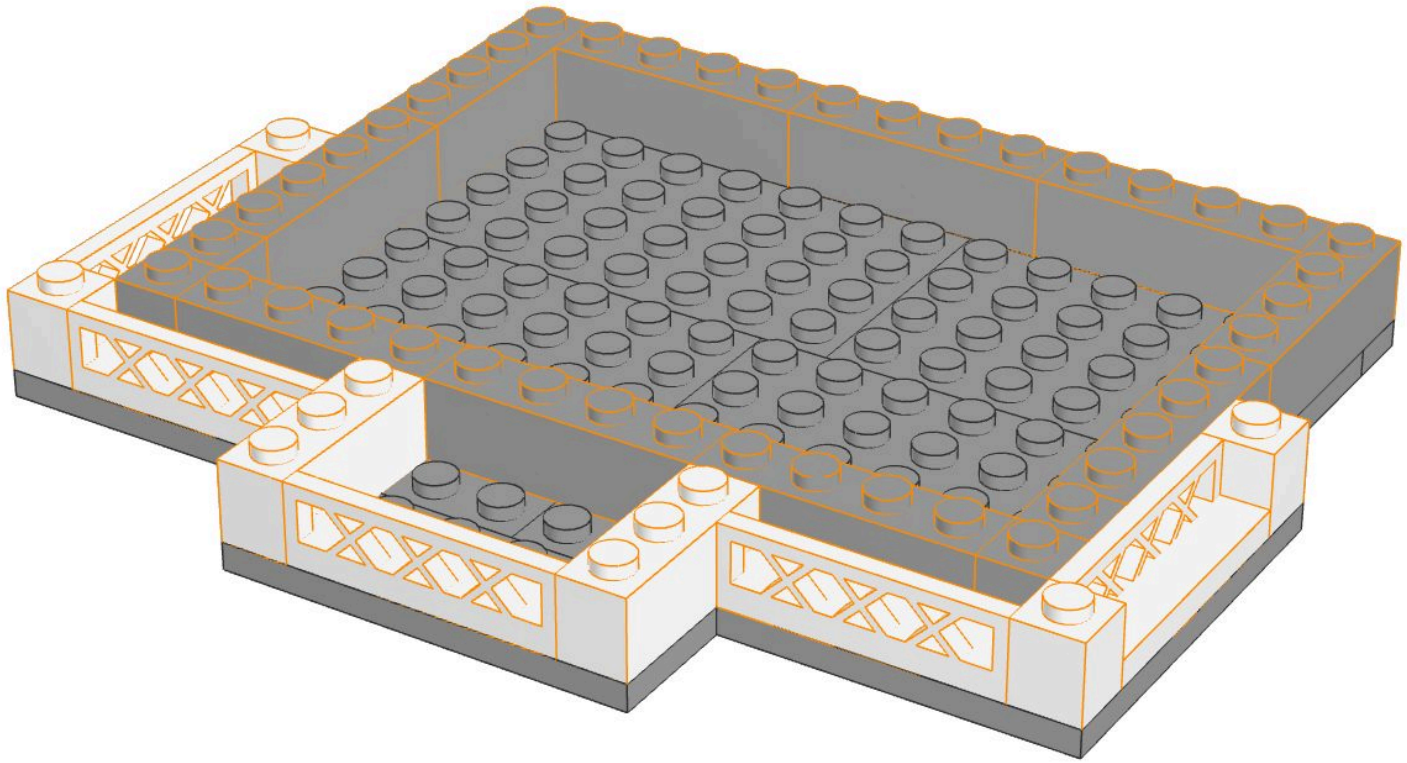

5

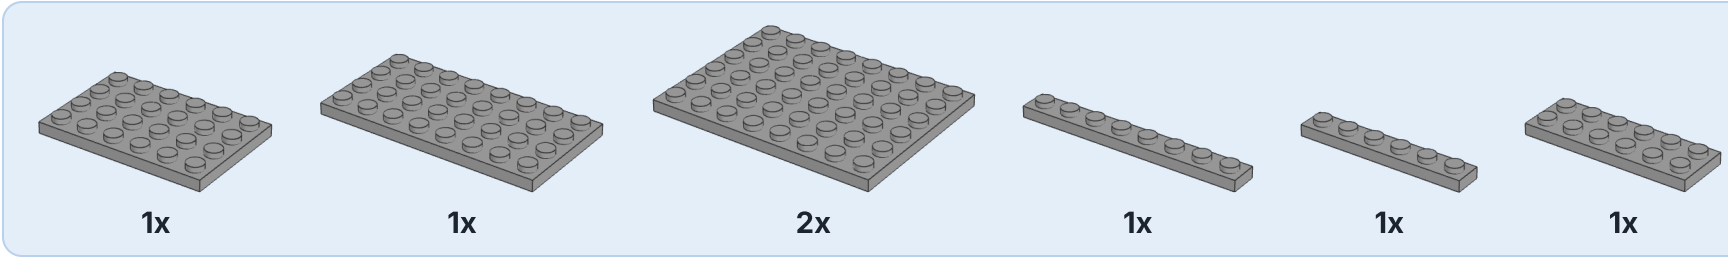

6

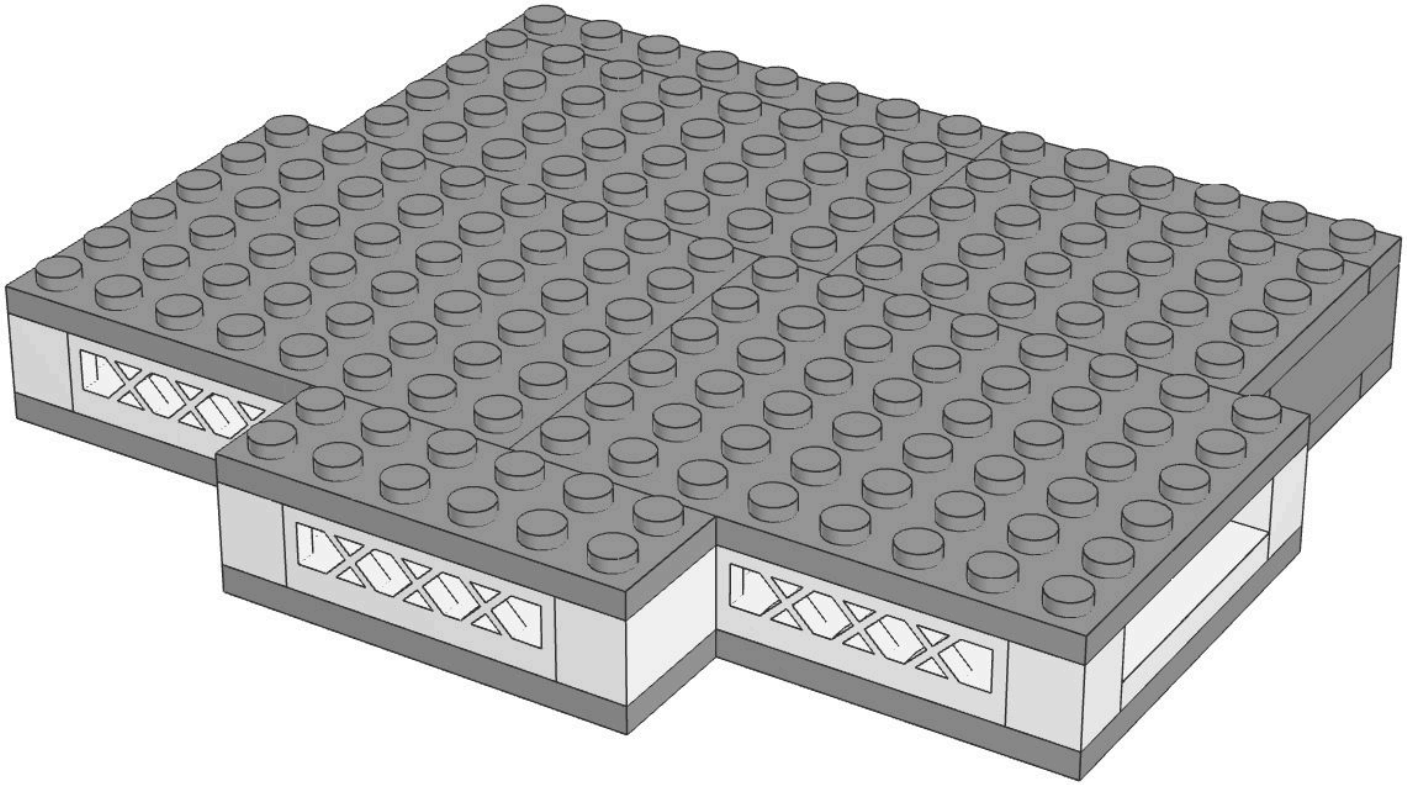

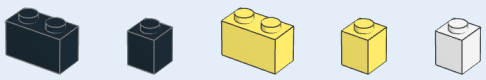

The white lattice skirt runs round the porch; the grey bricks behind it carry the walls.

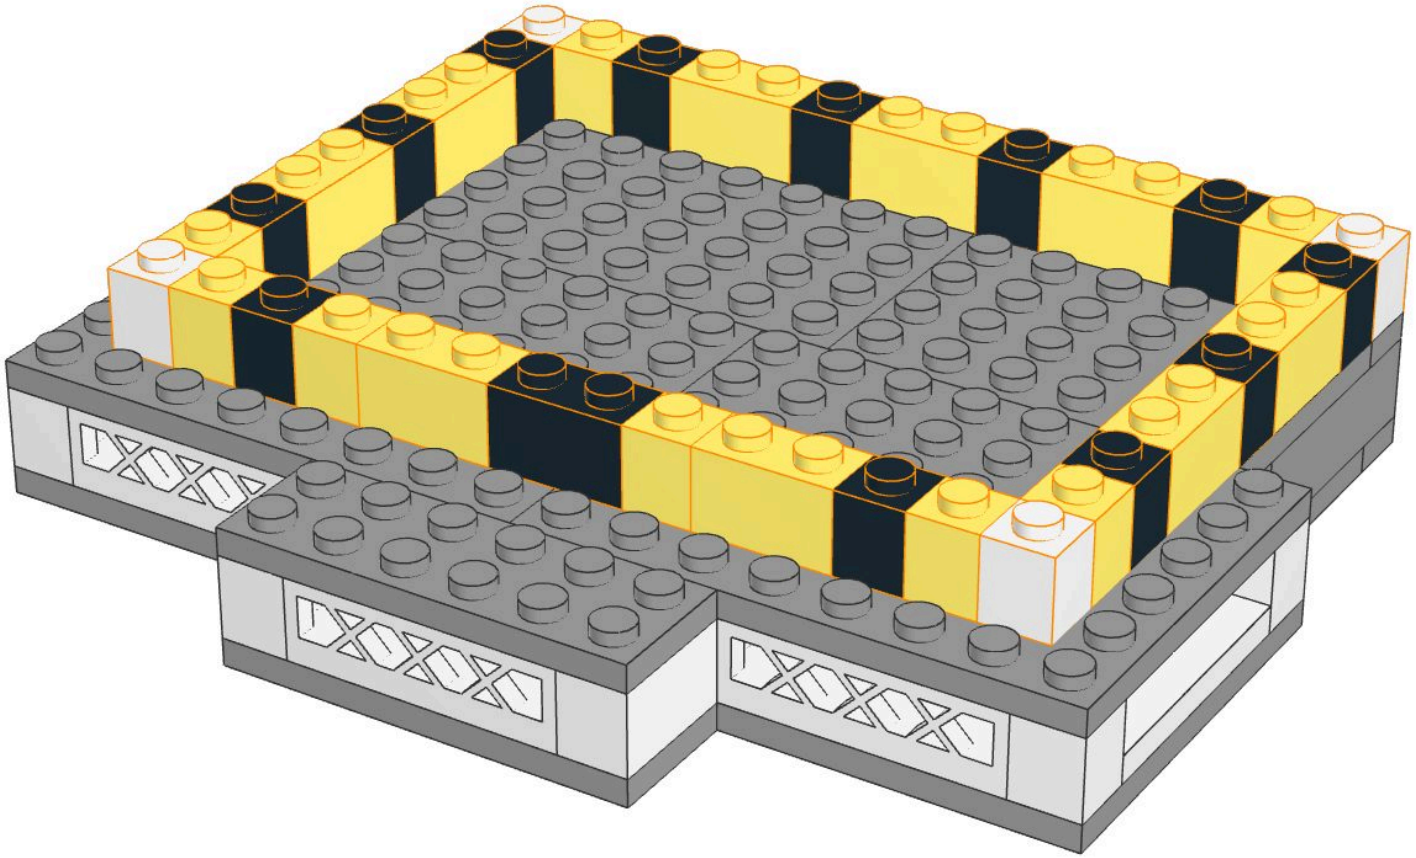

7

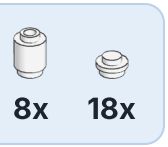

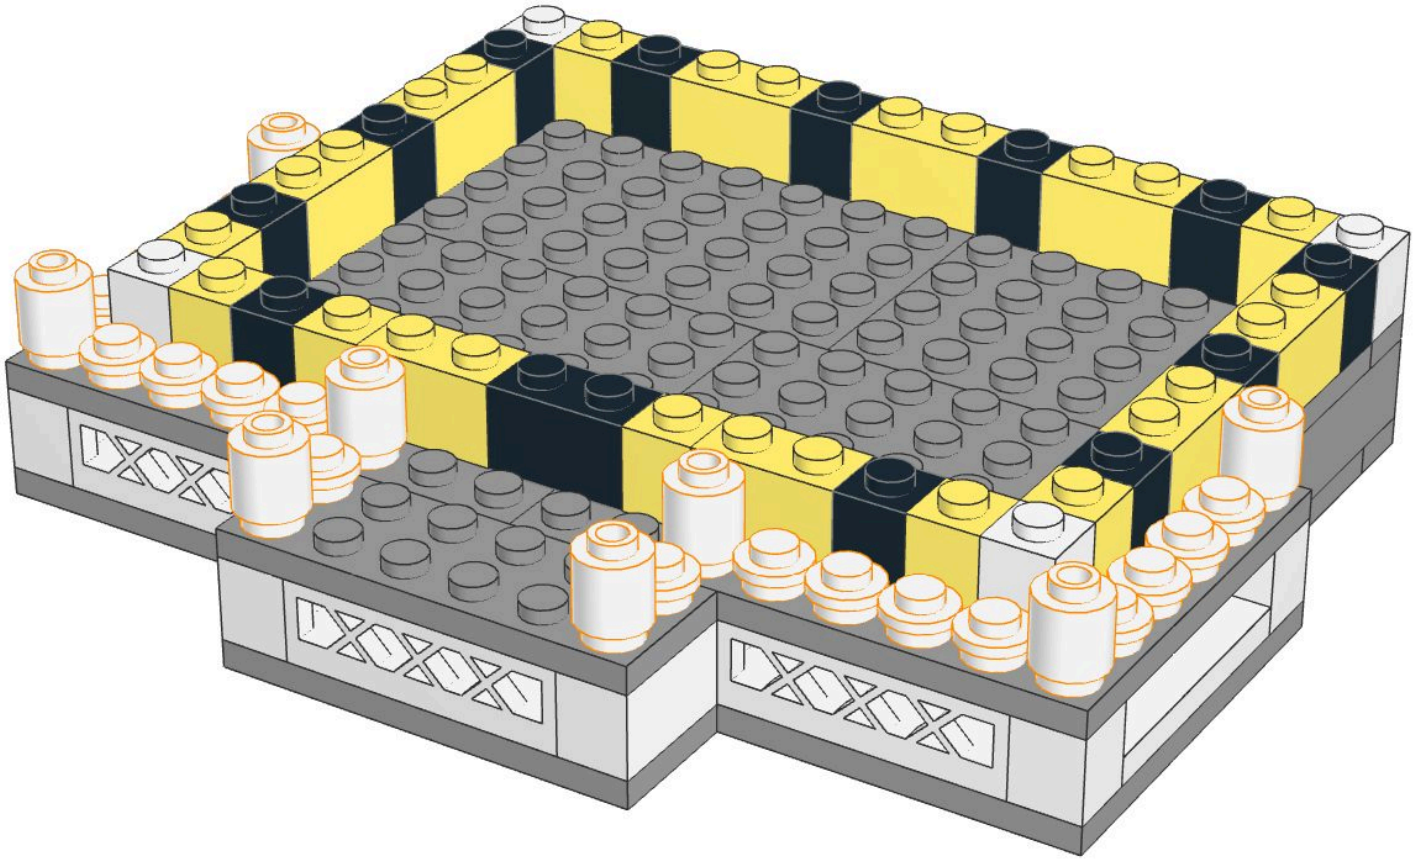

8

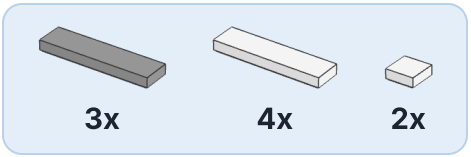

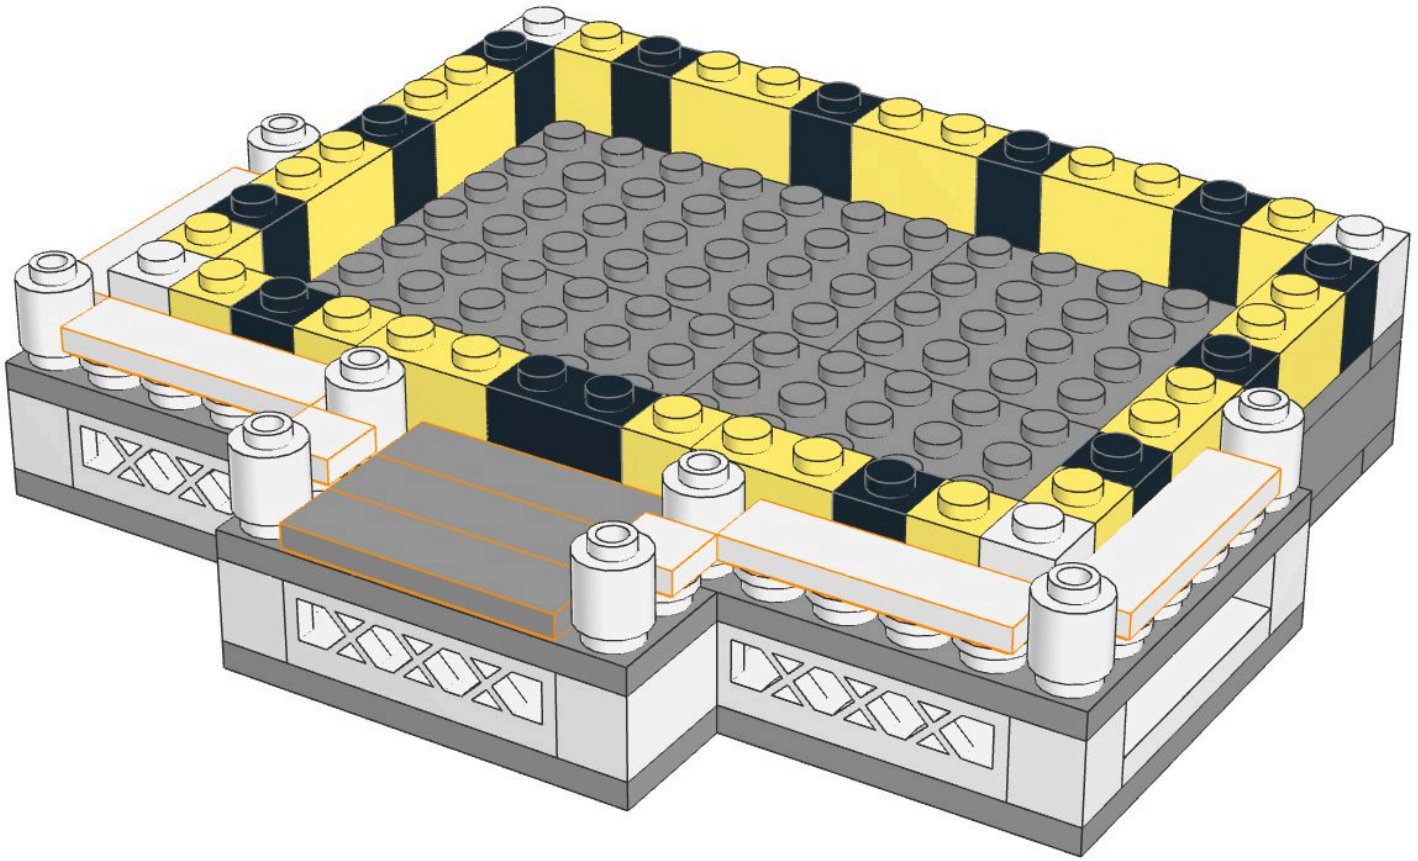

9

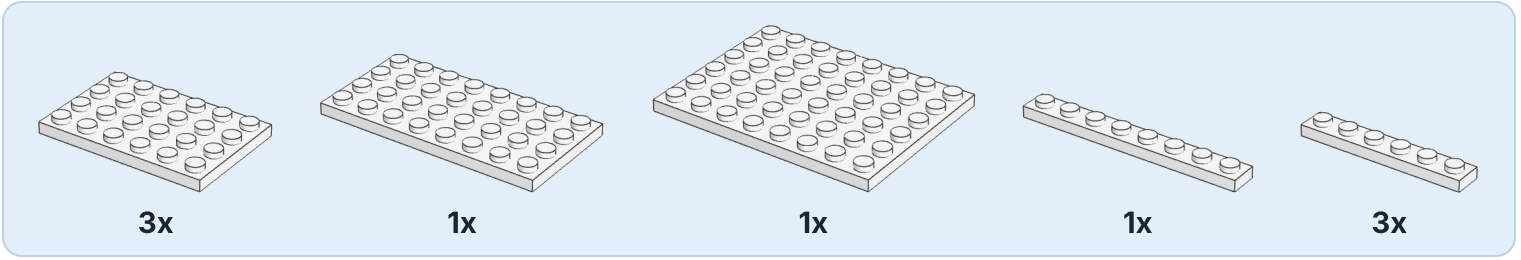

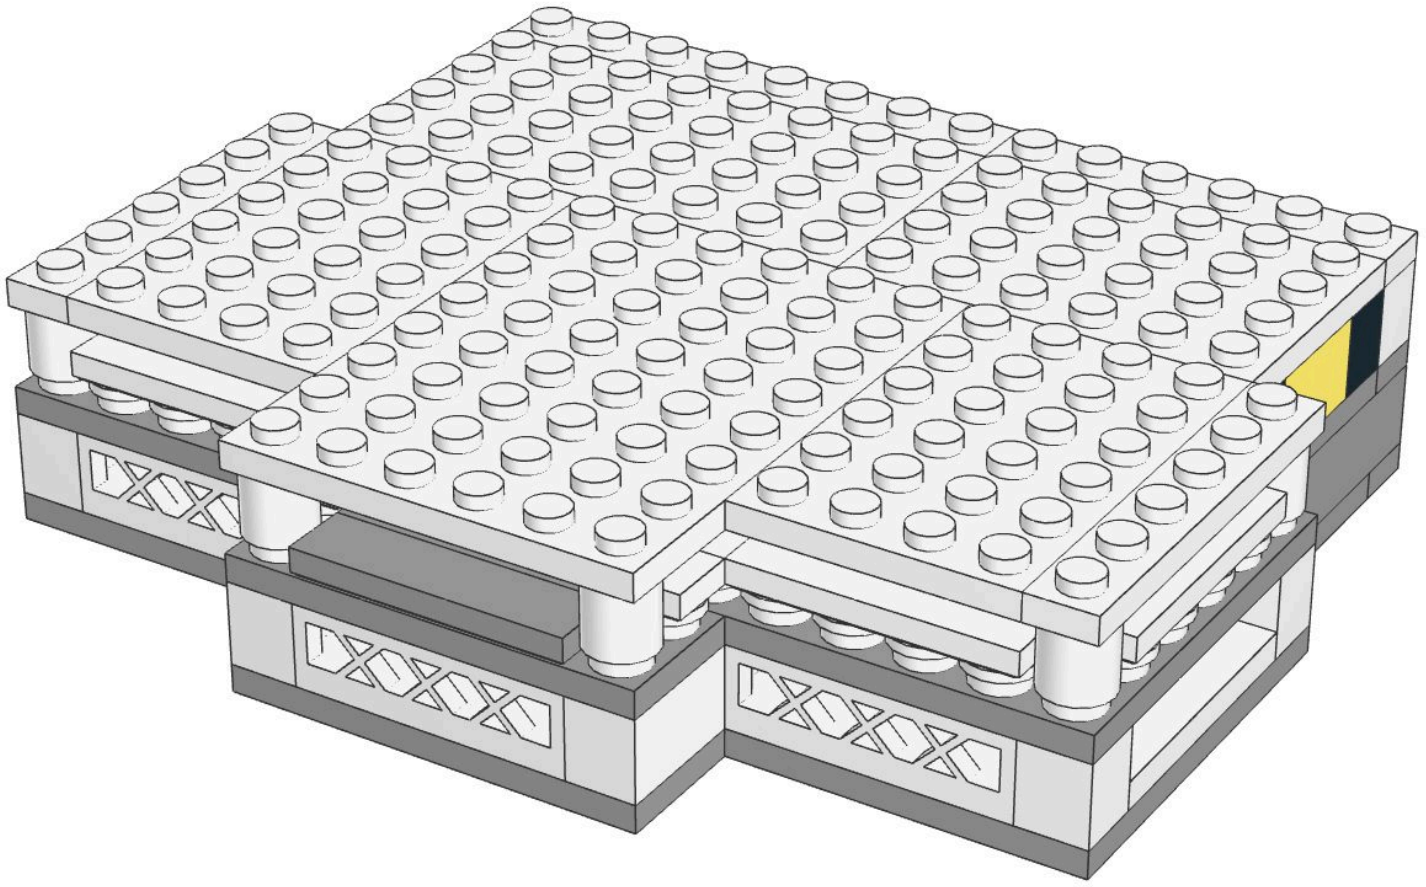

10

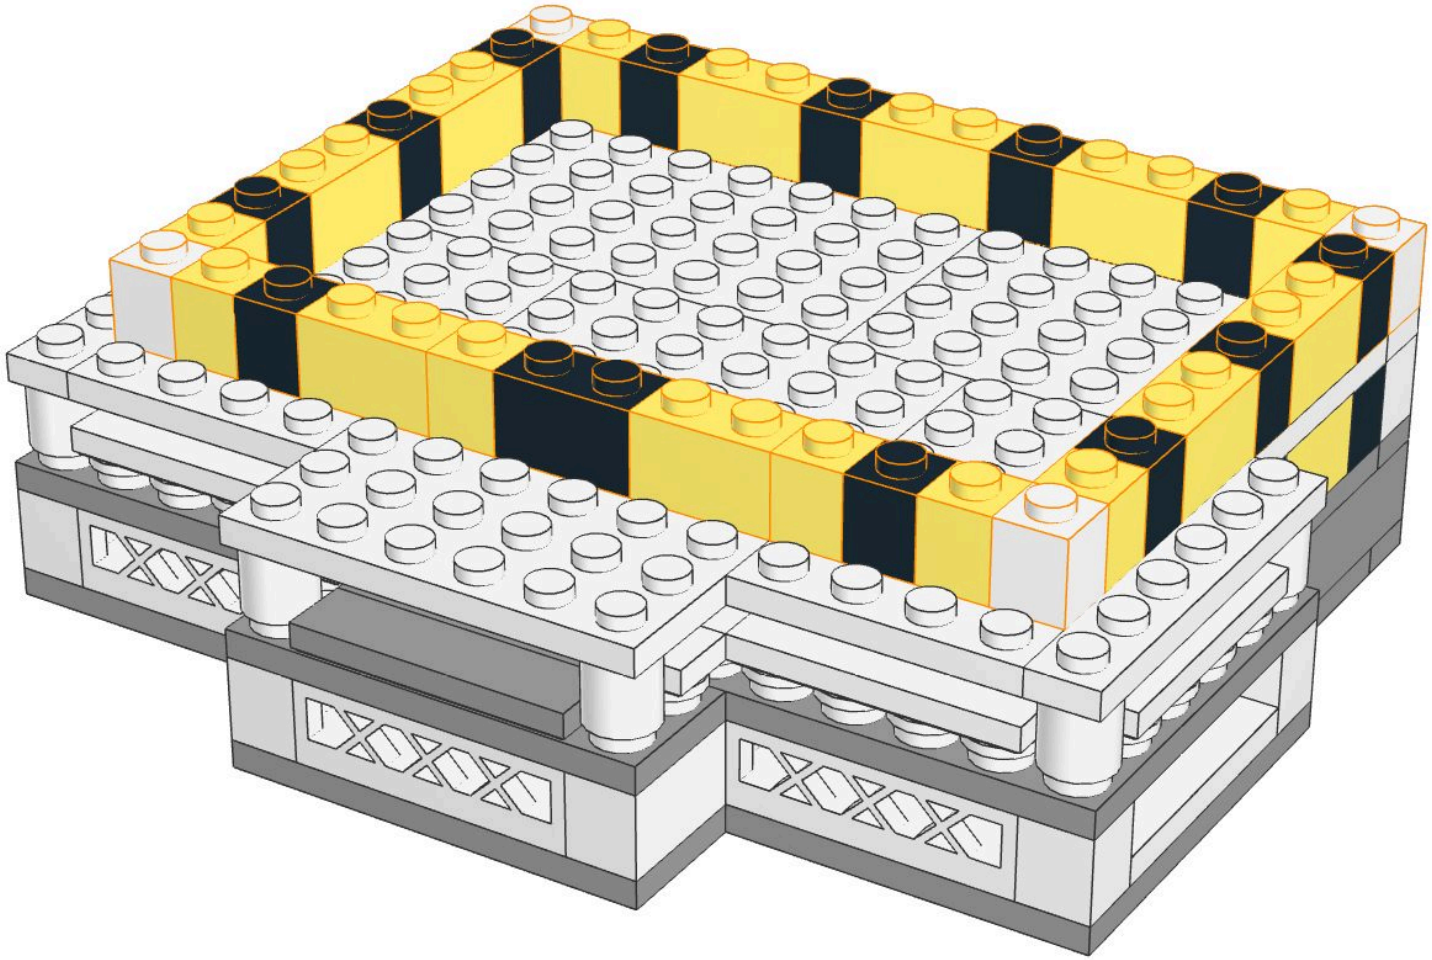

11

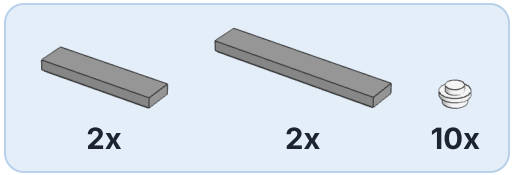

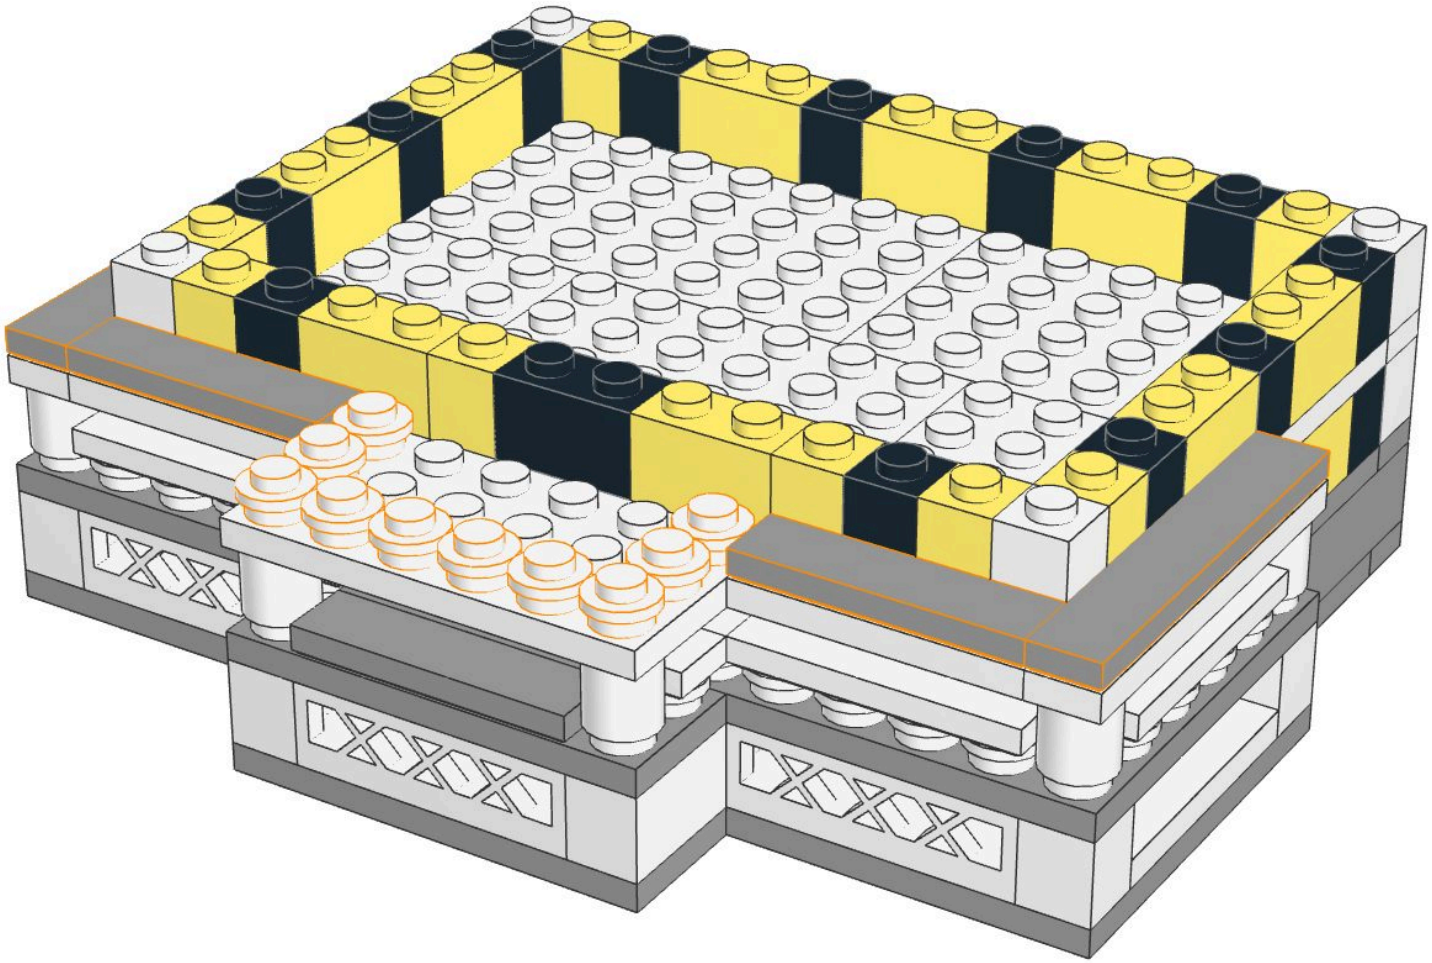

12

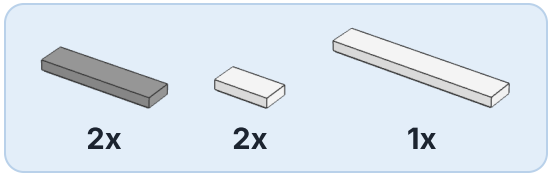

13

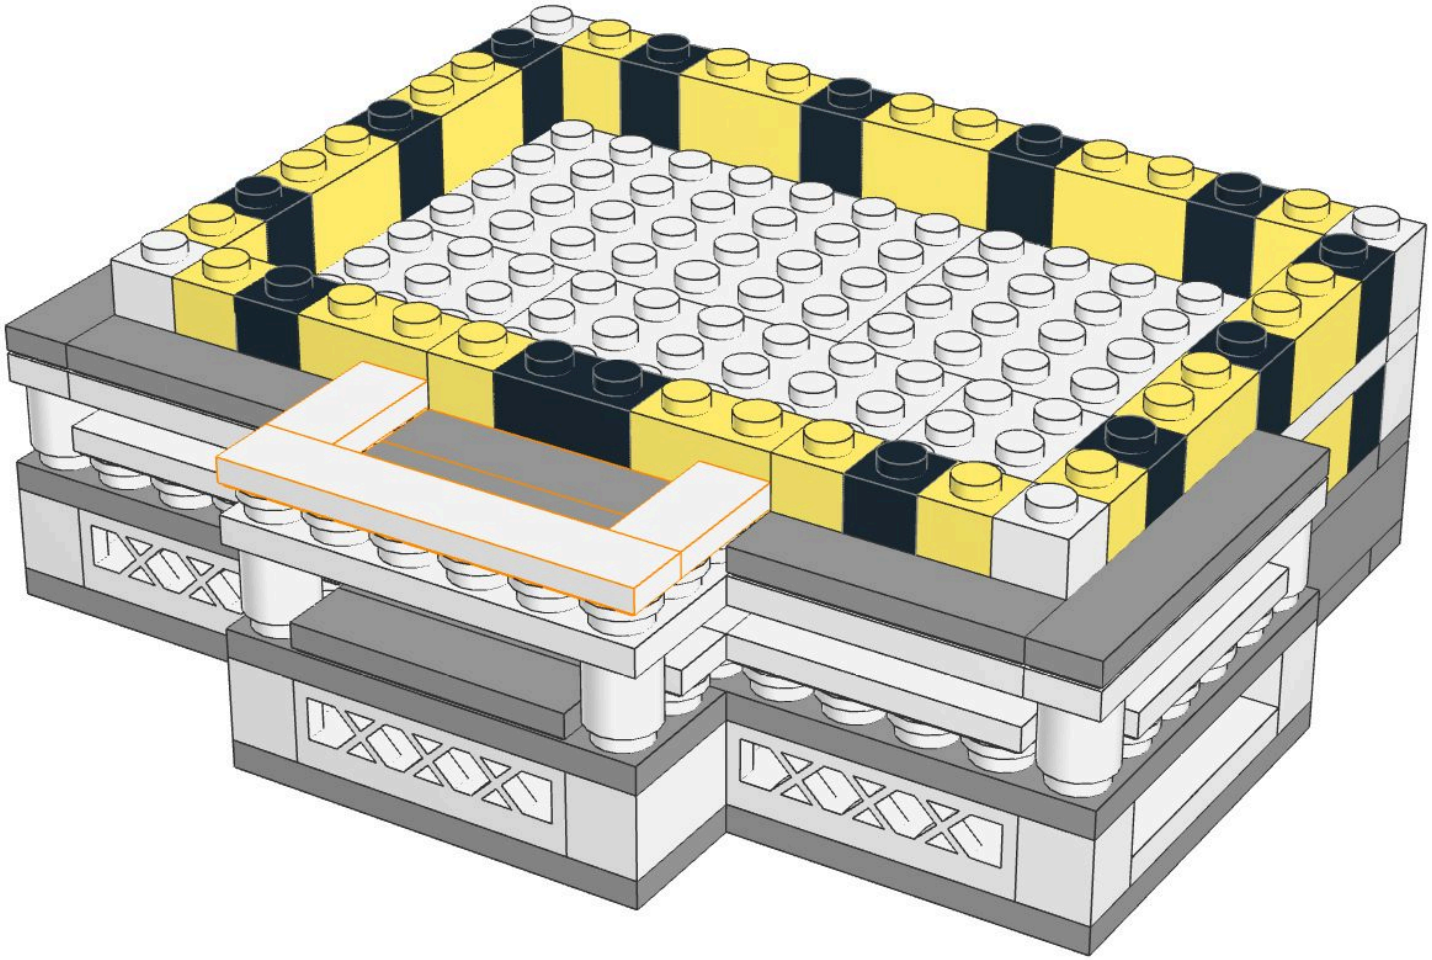

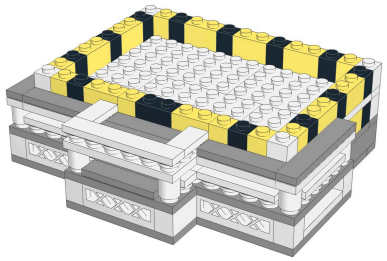

The grey tiles are the porch roof. The balcony over the front door has a white railing all round.

14

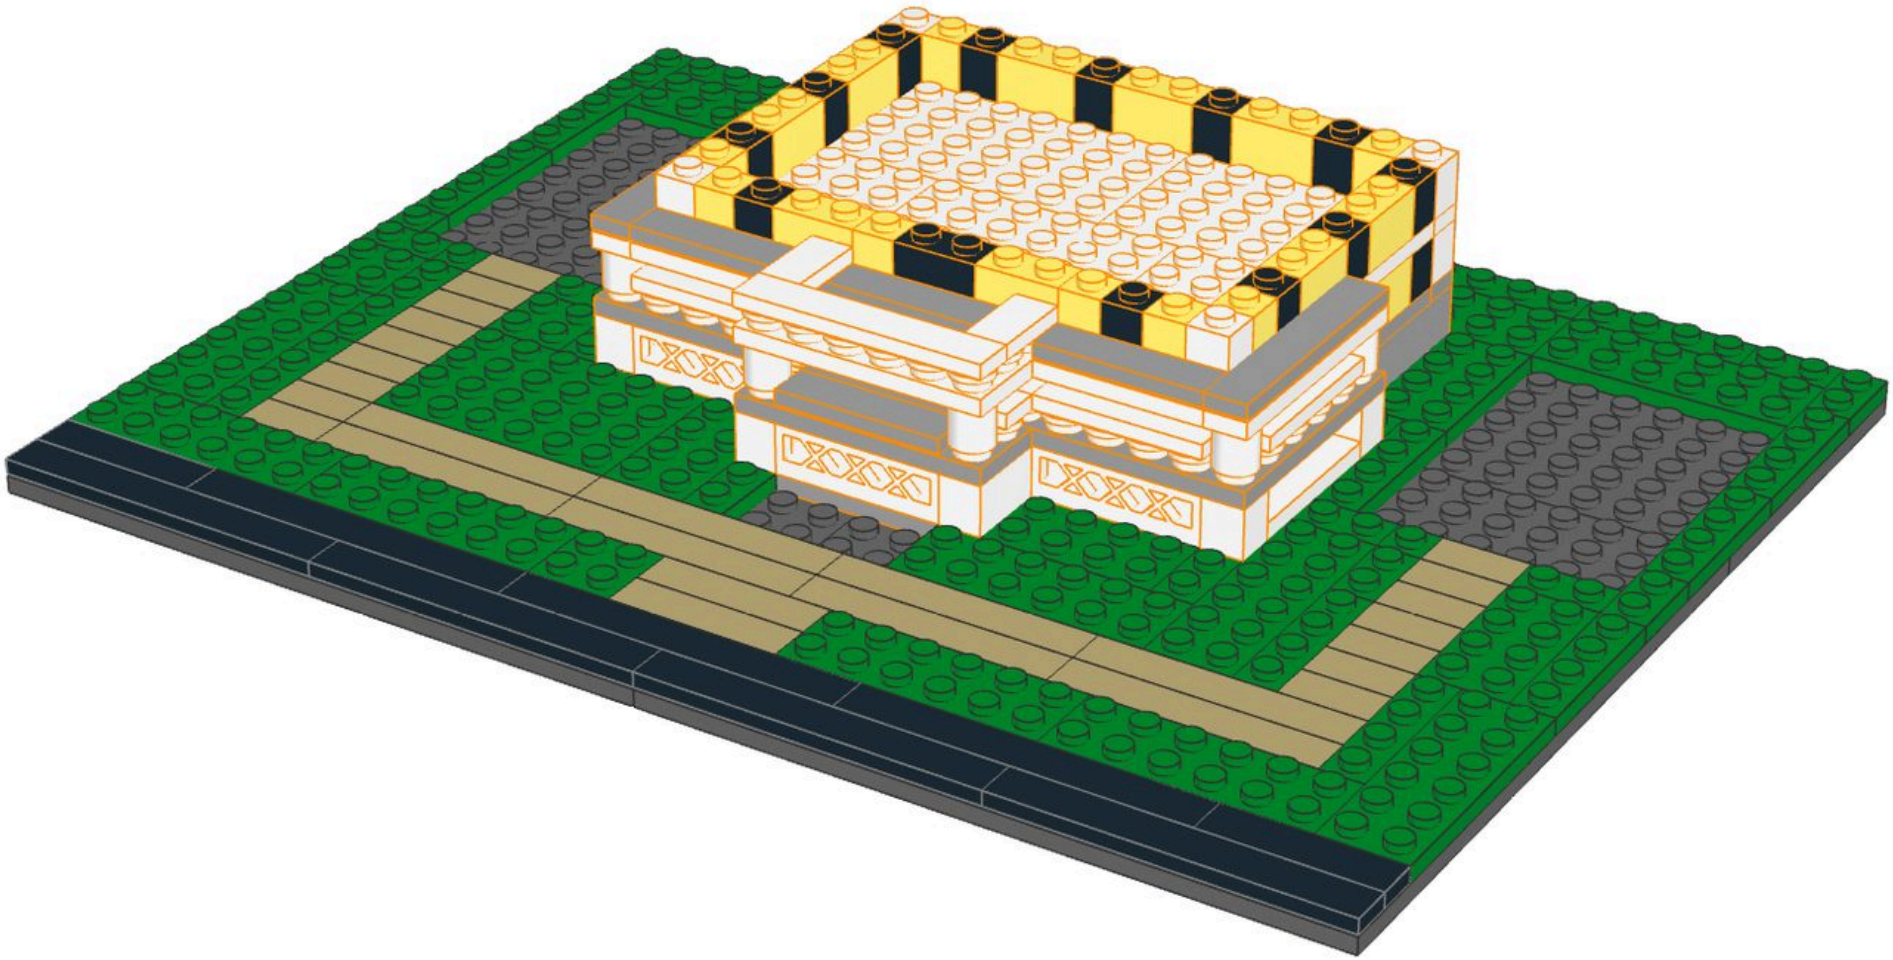

15

1x

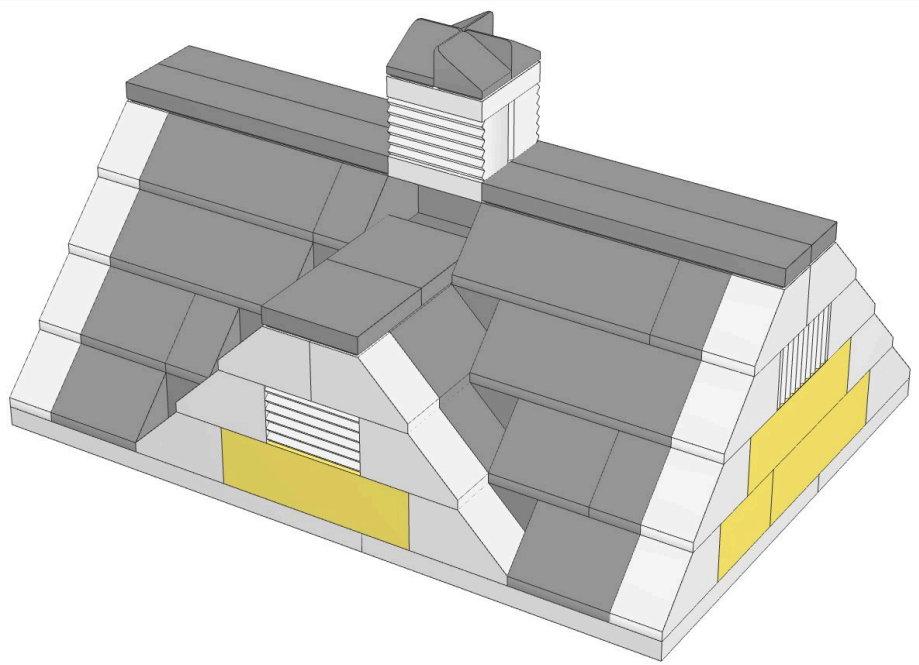

3

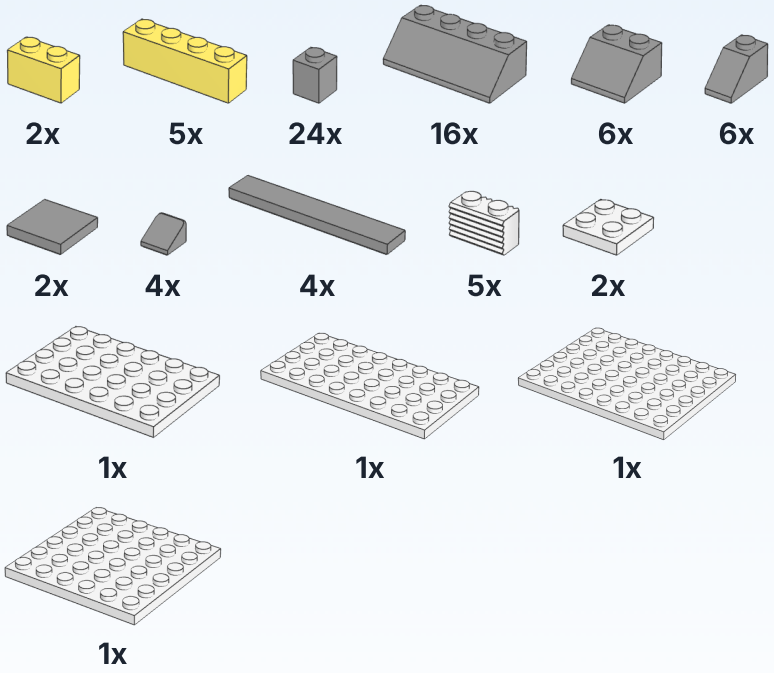

The tin roof and the cupola

The roof is built on its own, on a white eave band: steep grey slopes with yellow gable ends, white trim and louvres, the front gable, then the louvred cupola on the ridge. It goes on top of the house.

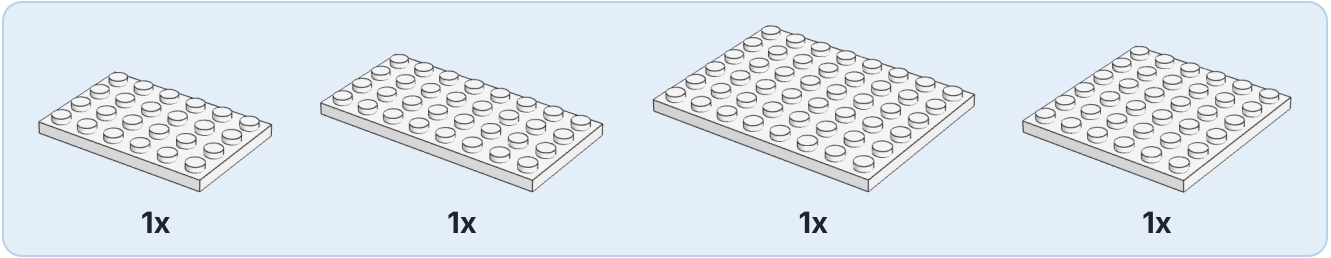

102 elements in this section

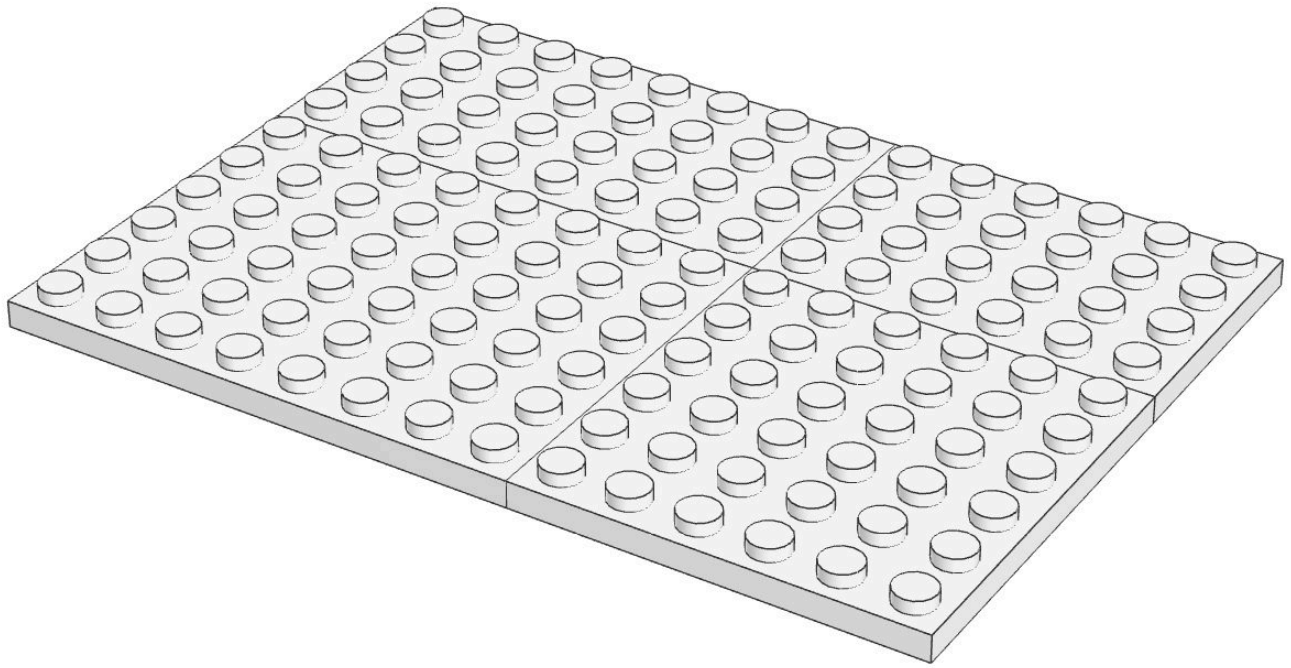

PARTS FOR THIS SECTION

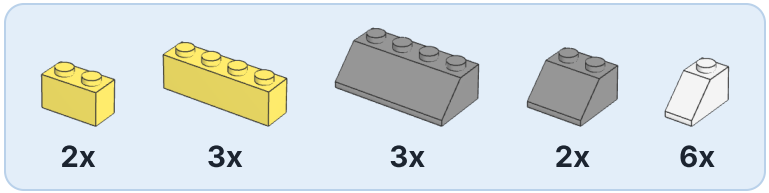

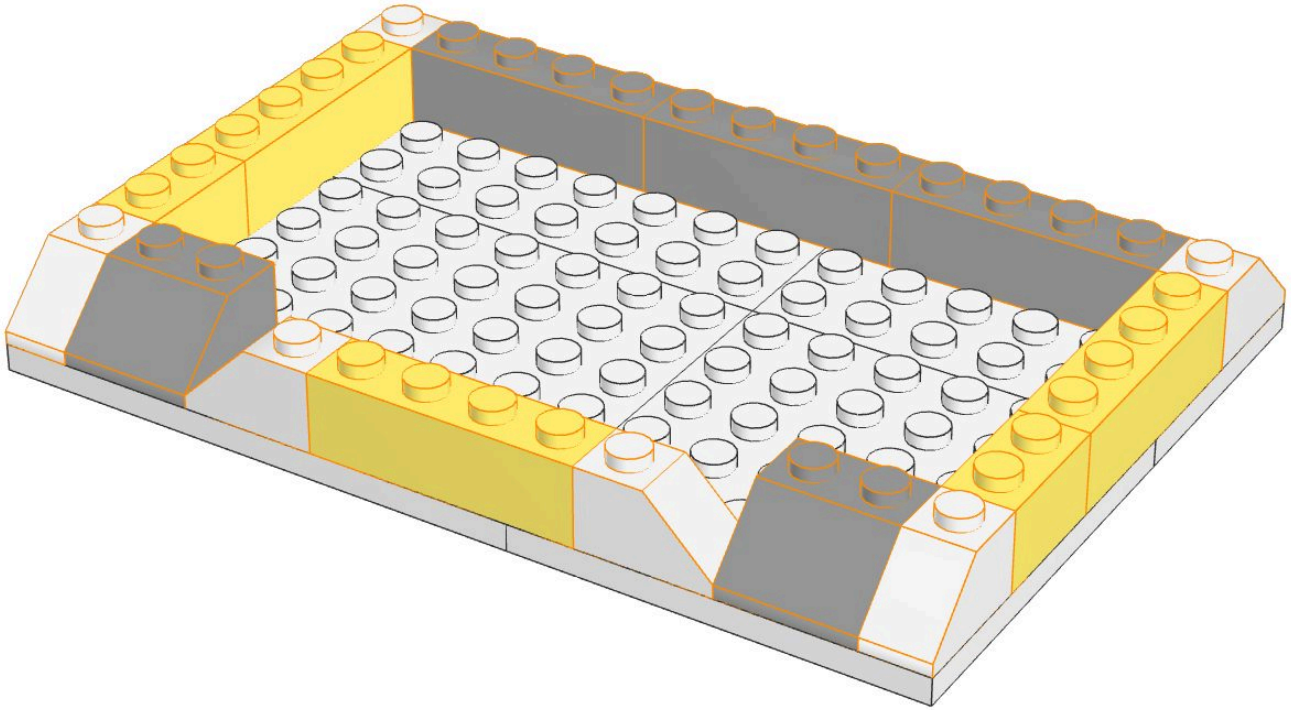

16

17

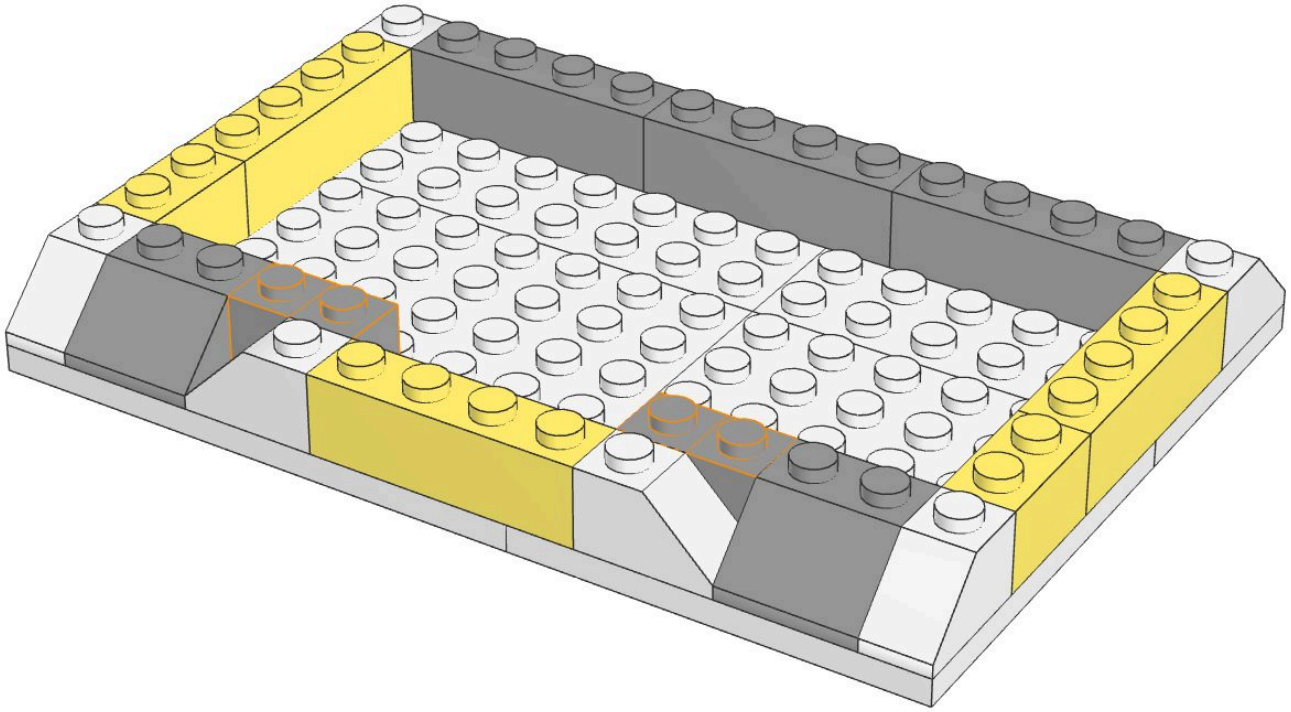

The tin roof goes up one row of slopes at a time. The white slopes at the gable ends are the trim; grey bricks hidden inside the roof hold up the rows above.

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

1. Go to **lego.com → Pick and Build → Pick a Brick** and choose **Upload list**.
2. Upload `parts/pick_a_brick_upload.csv`. It lists all 64 kinds of element by Element ID with their quantities, and fills your bag in one go.
3. If anything isn't matched, upload `pick_a_brick_upload_retry.csv`. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in Pick a Brick's Bestseller range, which ships from the US warehouse.

2 · BrickLink or Rebrickable (backup)

The files in `parts/` cover anything Pick a Brick does not stock:

- `bricklink_wanted_list.xml`: BrickLink → Want → Upload.
- `rebrickable_parts.csv`: import it as a Rebrickable part list, then compare stores.
- `pick_a_brick_mapping.csv`: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 575 elements with a known price come to about **US$76**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Villa colours:** each villa uses aqua or pink 1×1, 1×2 and 1×4 bricks only, so any pastel with those three bricks works.
- **Walls:** the bright light yellow bricks are 1×1, 1×2 and 1×4 only; the 1×3 isn't a Bestseller in this colour.
- **Ground:** any colour of tiles works for the base around the building.
- **Hidden parts:** bricks and plates inside the building can be any colour.

Colour names
