

BUILD INSTRUCTIONS

All-Star Movies Resort

A compact display model in LEGO® bricks

288
pieces

19 × 13 cm
24 × 16 studs

Unofficial fan design

An unofficial fan-designed model (MOC), inspired by Disney's All-Star Movies Resort at Walt Disney World. It is not affiliated with, sponsored or endorsed by The LEGO Group or Disney. LEGO® is a trademark of The LEGO Group.

About this model

The Cinema Hall entrance as a classic movie palace: a white facade with red pilasters and a stepped crown, a big marquee with yellow lights and rows of dark "letters" (no readable text), and a tall red sign blade lined with bulbs. A red carpet leads to the glass doors, with a giant film reel on one side and a giant clapperboard on the other. The real resort is decorated with giant film characters; they are left out on purpose, so this kit is less recognisable than the others in the collection.

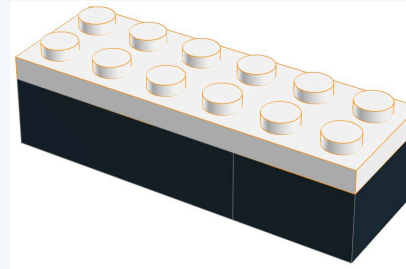

Pieces	288 elements, 54 kinds, 8 colours
Size	24 × 16 studs (19.2 × 12.8 cm), 12 cm tall
Scale	about 1:250 (one storey = 4 plates, 1 stud ≈ 2 m), like the large resort models
Build time	about 1 to 1½ hours
Model files	all_star_movies_compact.mpd (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The display base, the lawn and the red carpet
2. Cinema Hall and its marquee
3. The film reel
4. The clapperboard

Every kit in the compact resort collection stands on the same 24×16 display base with a black front band. Each section starts with a list of the parts it needs.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- The marquee is built up in thin layers of plates: yellow lights, then the white letter board with black "letters". Lay each layer exactly as in the picture.
- The sign blade is a stack of red bricks with a column of round yellow bulbs in front. The bulbs are only held at the bottom and at the top, so press the cap on firmly.
- Slopes round off the film reel. Check which way each slope faces before pressing it down.

Getting the parts

Every element is listed with its LEGO Element ID in the inventory at the back, and in parts/ as CSV and BrickLink XML files. See "Ordering the parts" on the last pages.

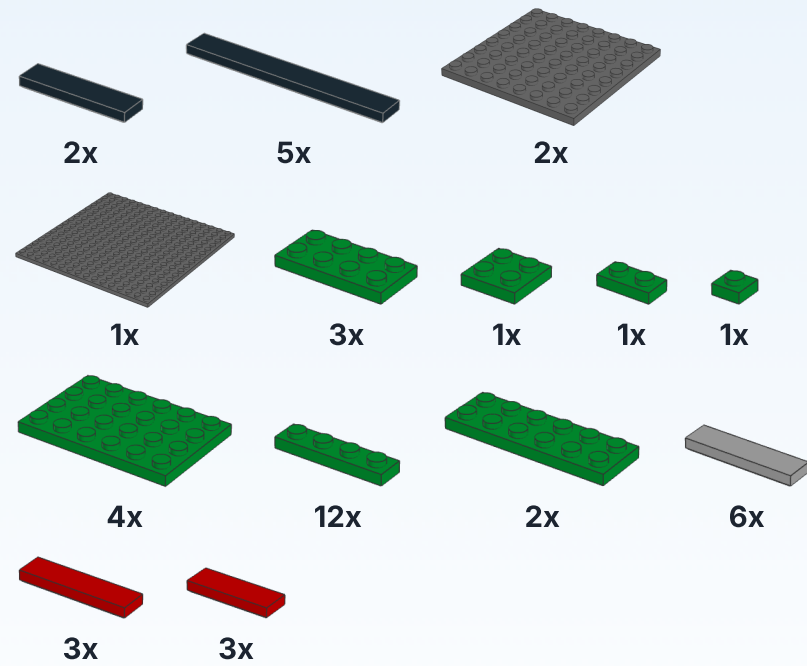

1

The display base

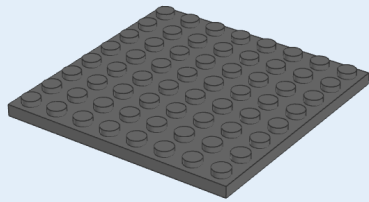

The base and the black band are the same for every kit in the collection. The lawn, the paving under the marquee and the red carpet go on next.

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

- 1. Go to **lego.com** → **Pick and Build** → **Pick a Brick** and choose **Upload list**.
- 2. Upload parts/pick_a_brick_upload.csv. It lists all 54 kinds of element by Element ID with their quantities, and fills your bag in one go.
- 3. If anything isn't matched, upload pick_a_brick_upload_retry.csv. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
- 4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in Pick a Brick's Bestseller range, which ships from the US warehouse.

2 · BrickLink or Rebrickable (backup)

The files in parts/ cover anything Pick a Brick does not stock:

- bricklink_wanted_list.xml: BrickLink → Want → Upload.
- rebrickable_parts.csv: import it as a Rebrickable part list, then compare stores.
- pick_a_brick_mapping.csv: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 288 elements with a known price come to about **US\$37**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Ground:** any colour of tiles works for the base around the building.
- **Hidden parts:** bricks and plates inside the building can be any colour.

Colour names

In this booklet	LEGO name	BrickLink
White	White	White
Red	Bright Red	Red
Yellow	Bright Yellow	Yellow
Black	Black	Black
Trans-Clear	Transparent	Trans-Clear
Light Bluish Gray	Medium Stone Grey	Light Bluish Gray
Green	Dark Green	Green
