

BUILD INSTRUCTIONS

Yacht Club Resort

A mid-size display model in LEGO® bricks

606
pieces

26 × 19 cm
32 × 24 studs

Unofficial fan design

An unofficial fan-designed model (MOC), inspired by Disney's Yacht Club Resort at Walt Disney World. It is not affiliated with, sponsored or endorsed by The LEGO Group or Disney. LEGO® is a trademark of The LEGO Group.

About this model

The entrance front of the Yacht Club, as a guest arriving by car sees it: a long, symmetric New England seaside hotel of grey-blue clapboard with rows of windows. A tall centre block rises under a big white-trimmed front gable with the white cupola on its ridge; end bays carry their own front gables and white louvres; recessed wings between them have white balcony railings on every upper floor; the roofs are dark grey. The white porte-cochere stands over the drive at the front door between two lamp posts, a flagpole stands on the lawn, blue hydrangeas grow along the facade, and a small lighthouse in the water at the front corner is a nod to the one on the lake side.

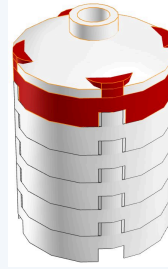

Pieces	606 elements, 60 kinds, 10 colours
Size	32 × 24 studs (25.6 × 19.2 cm), 13 cm tall
Scale	about 1:250 (one storey = 4 plates, 1 stud ≈ 2 m), like the large resort models
Build time	about 2 to 2½ hours
Model files	yacht_club_midsize.mpd (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The display base, the drive, the lawns and the water
2. The centre
3. The balcony wings (build 2)
4. The end bays (build 2)
5. The porte-cochere
6. The lighthouse, the lamps, the flagpole and the hydrangeas

Every kit in the mid-size resort collection stands on the same 32×24 display base with a black front band. Each section starts with a list of the parts it needs.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- Each storey takes two steps (three on the balcony wings, with the railing): a course of sand blue 1×2 bricks with black bricks for the windows, then a band of light grey plates. The top band is white: the eaves. Sand blue is a Bestseller only as the 1×2 brick, so the walls are laid in pairs.
- The balcony wings have no side walls: the long plates of each floor band run from the balcony edge to the back wall and hold the wing together.
- Roofs go up one row of slopes at a time; the white slopes go at the gable ends.
- The cupola's finial and the lighthouse lantern sit on the single centre stud of a 2×2 dish.
- A **"Build 2"** badge means you build that module twice.

Getting the parts

Every element is listed with its LEGO Element ID in the inventory at the back, and in parts/ as CSV and BrickLink XML files. See "Ordering the parts" on the last pages.

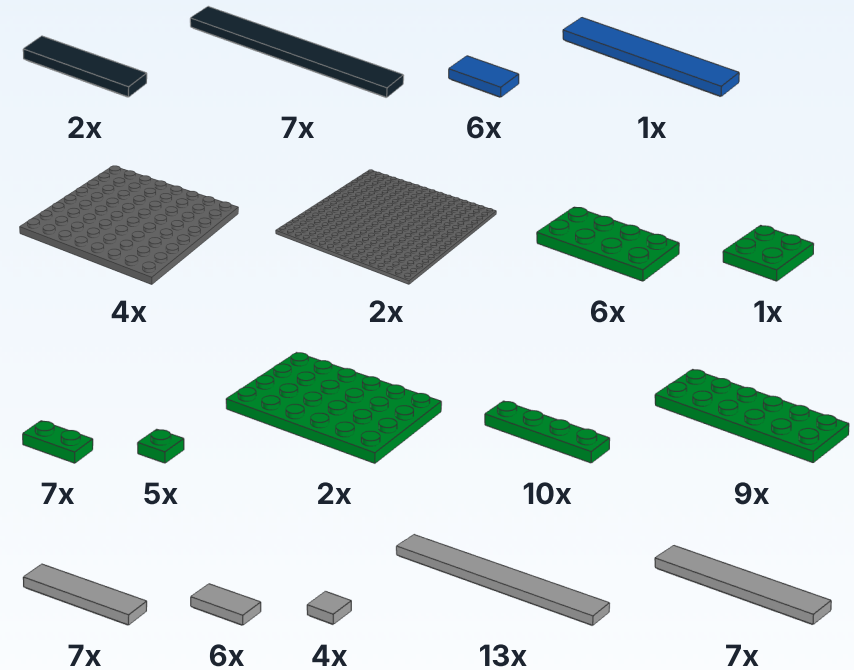

1

The display base, the drive, the lawns and the water

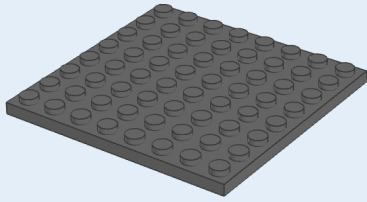

The base and the black band are the same for every mid-size kit. The drive, the walk, the lawns and the water go on next; the drive tiles tie the base plates together.

99 elements in this section

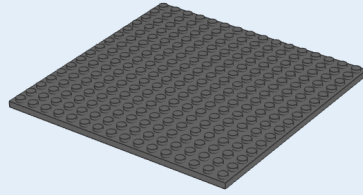

PARTS FOR THIS SECTION

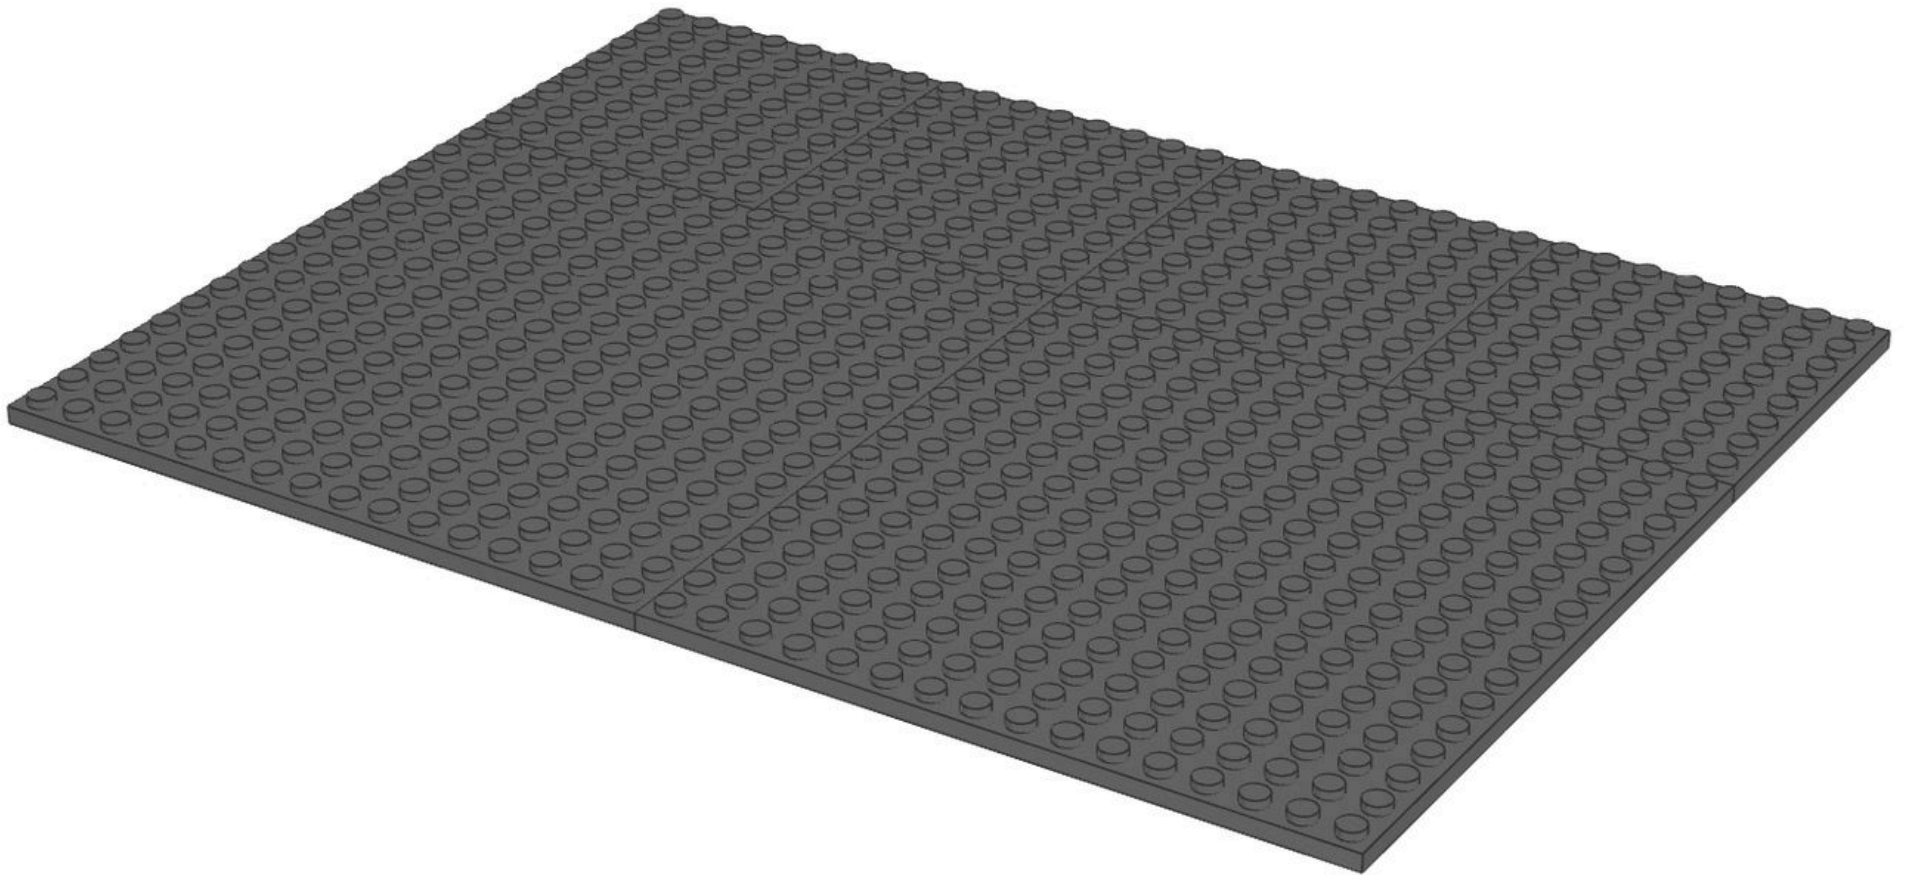

1

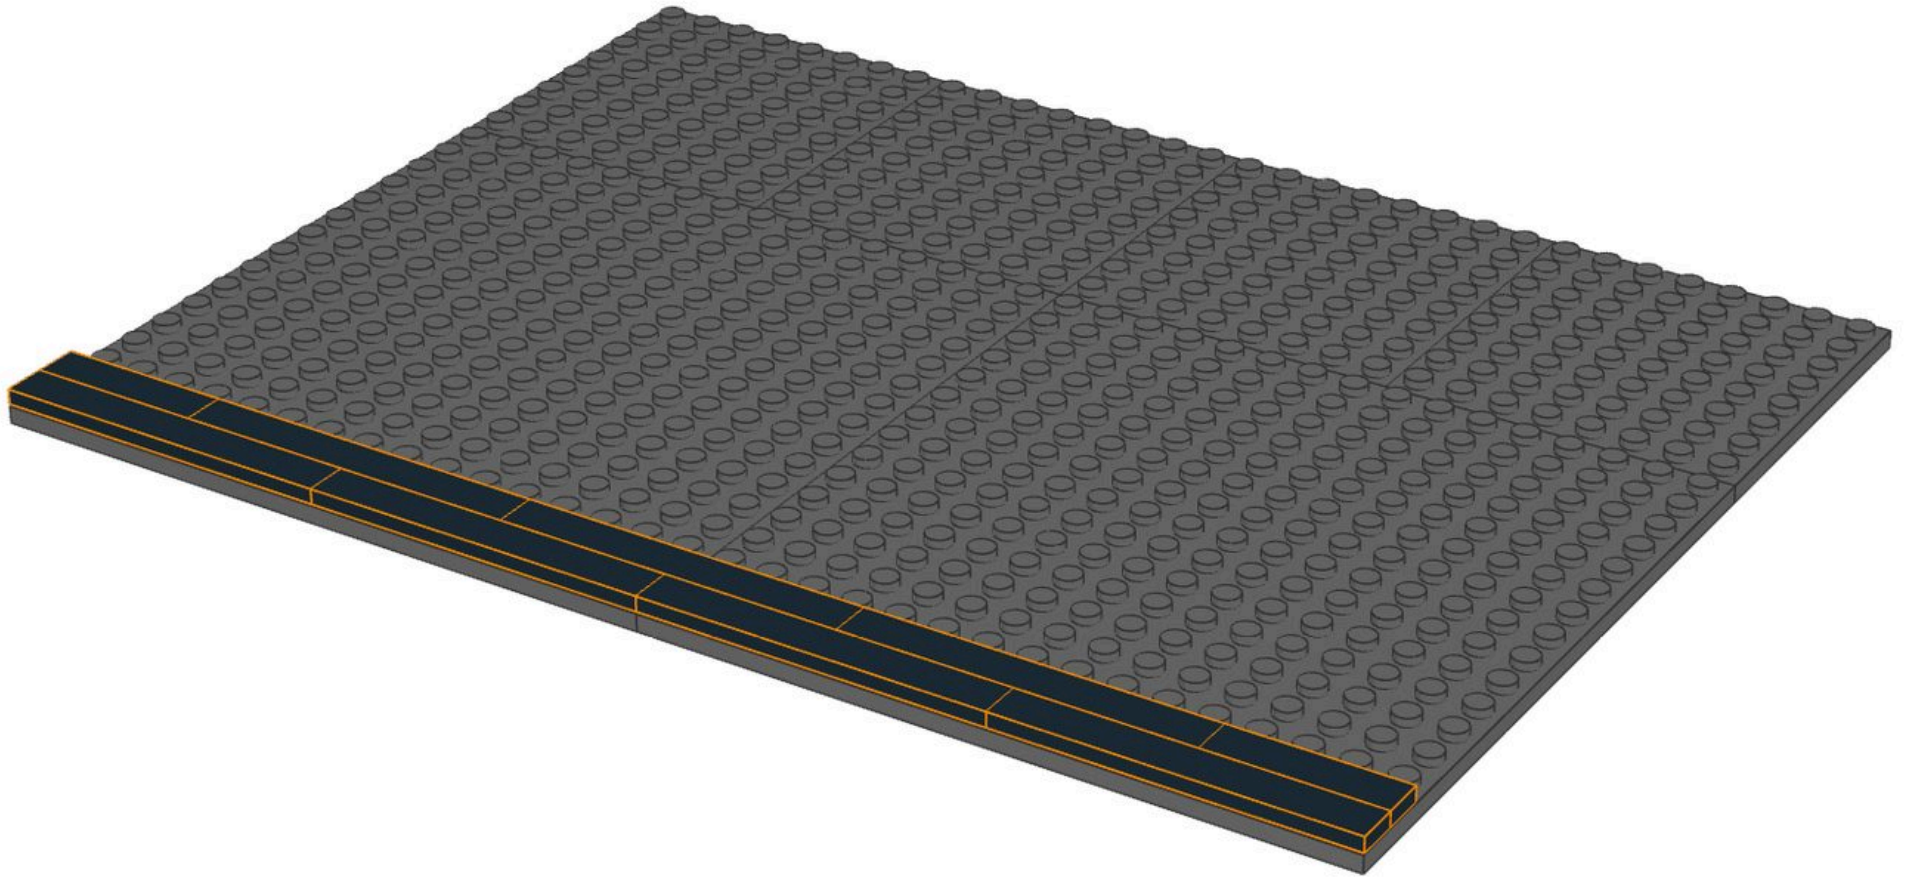

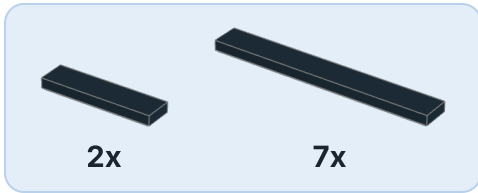

4x

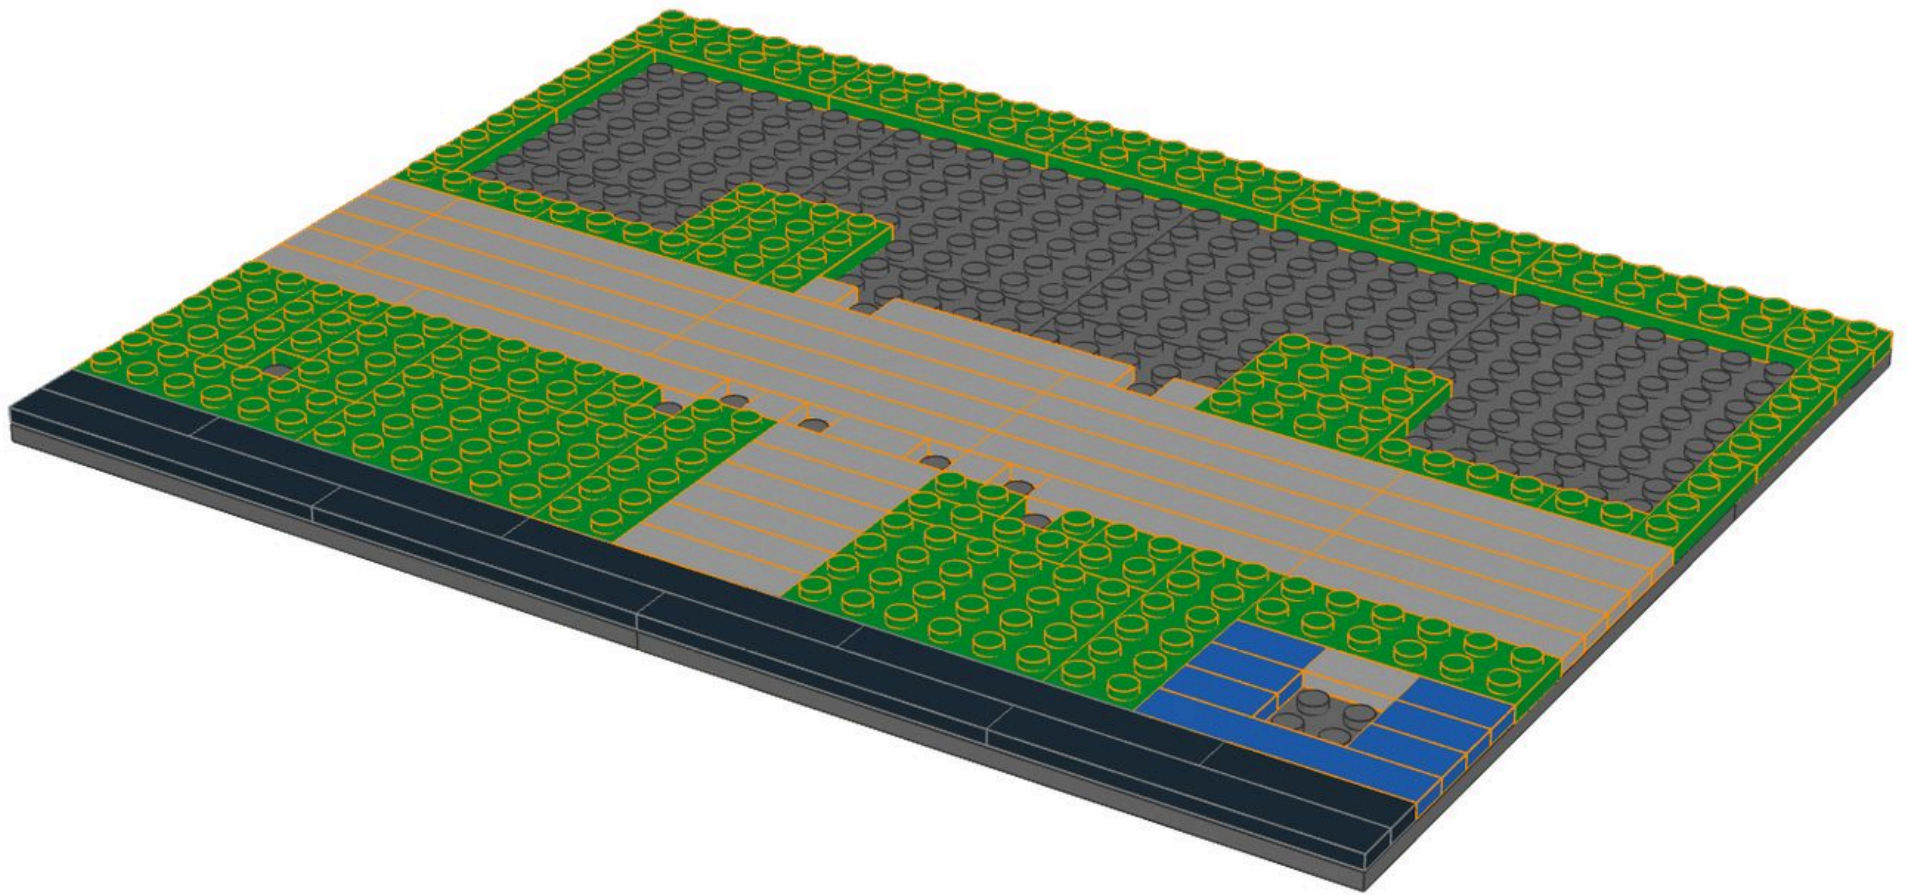

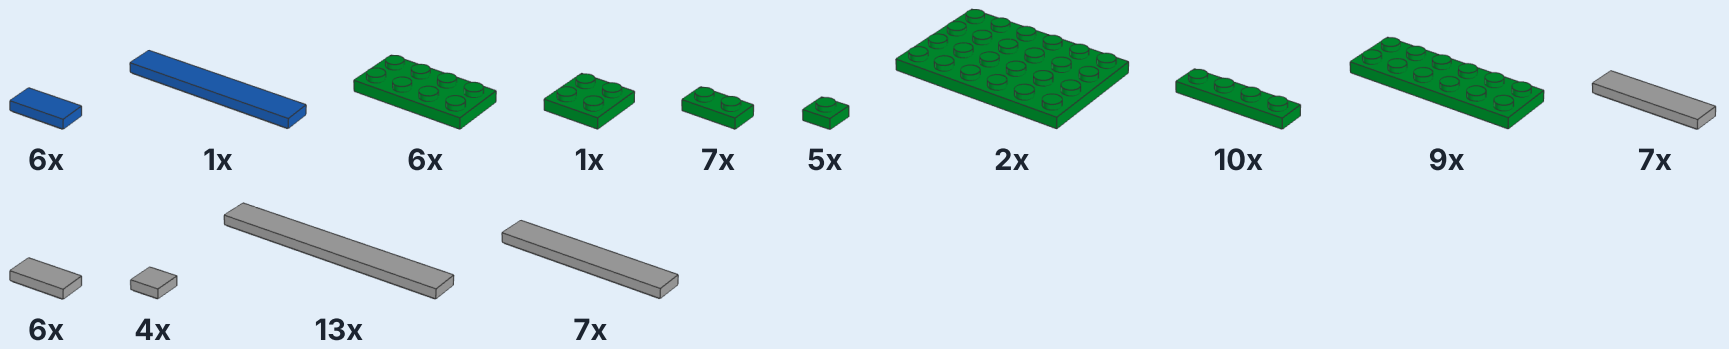

2x

2

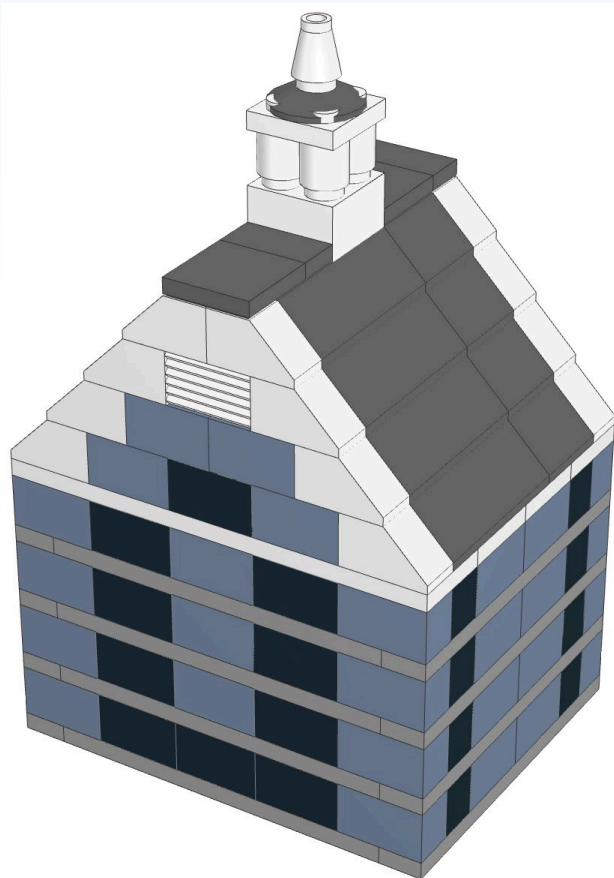

2

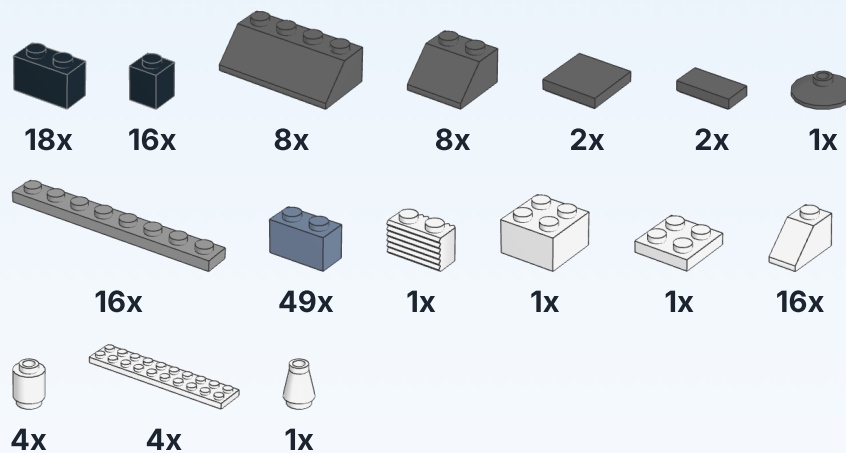

The centre

Four storeys of grey-blue clapboard with the entrance on the ground floor, under a tall front gable with white rake boards, a double window and a louvre. The white cupola stands on the ridge.

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

- 1. Go to **lego.com** → **Pick and Build** → **Pick a Brick** and choose **Upload list**.
- 2. Upload parts/pick_a_brick_upload.csv. It lists all 60 kinds of element by Element ID with their quantities, and fills your bag in one go.
- 3. If anything isn't matched, upload pick_a_brick_upload_retry.csv. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
- 4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in Pick a Brick's Bestseller range, which ships from the US warehouse.

2 · BrickLink or Rebrickable (backup)

The files in parts/ cover anything Pick a Brick does not stock:

- bricklink_wanted_list.xml: BrickLink → Want → Upload.
- rebrickable_parts.csv: import it as a Rebrickable part list, then compare stores.
- pick_a_brick_mapping.csv: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 606 elements with a known price come to about **US\$77**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Walls:** sand blue is a Bestseller only as the 1×2 brick. Light bluish gray 1×2 bricks give a grey Yacht Club if sand blue runs out.
- **Ground:** any colour of tiles works for the base around the building.
- **Hidden parts:** bricks and plates inside the building can be any colour.

Colour names

In this booklet	LEGO name	BrickLink
Sand Blue	Sand Blue	Sand Blue
