BUILD INSTRUCTIONS

Saratoga Springs Resort

A mid-size display model in LEGO® bricks

561
pieces

26 × 19 cm
32 × 24 studs

Unofficial fan design

An unofficial fan-designed model (MOC), inspired by Disney's Saratoga Springs Resort & Spa at Walt Disney World. It is not affiliated with, sponsored or endorsed by The LEGO Group or Disney. LEGO® is a trademark of The LEGO Group.

About this model

The arrival front of the Carriage House at Saratoga Springs, built like a Victorian spa-town building in upstate New York: a cream ground floor and sage-green upper floors with white floor bands, under steep dark grey roofs with cream bargeboards. The three-storey central pavilion's tall front gable, with an attic window, a round window and a louvre, crosses a cross-gable that carries on the line of the gabled wings, and a white belvedere with a grey dome and finial stands where the roofs meet. White porches with posts and railings run along the wings, and a porte-cochere with its own steep gable stands over the carriage loop. Lower guest buildings in the same colours, with porches of their own, stand back at either end. In front, water bubbles from a rock in a small spring pool inside the loop, between black lamp posts, flower beds and two shade trees.

Pieces	561 elements, 70 kinds, 13 colours
Size	32 × 24 studs (25.6 × 19.2 cm), 13 cm tall
Scale	about 1:250 (one storey = 4 plates, 1 stud ≈ 2 m), like the large resort models
Build time	about 2 to 2½ hours
Model files	`saratoga_springs_midsize.mpd` (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The display base, the carriage loop and the lawns
2. The Carriage House
3. The belvedere
4. The guest buildings (build 2)
5. The porte-cochere
6. The garden: the spring, lamp posts, flower beds and trees

Every kit in the mid-size resort collection stands on the same 32×24 display base with a black front band. Each section starts with a list of the parts it needs.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- Each storey is one course of bricks, tan below and sand green above, with black bricks for the windows, then a layer of white plates.
- Plates hidden inside the plinth tie its big plates together before the walls go on.
- The wings' roofs go on before the pavilion's third storey; their inner ends stand against it.
- The pavilion roof and its cross-gable cross: build them one row of slopes at a time, with the tan slopes at the gable ends. Hidden dark grey bricks under the valleys have a step of their own, just before the slopes they hold up.
- The belvedere's finial and the spring's water sit on the centre stud of a 2×2 dome, half a stud off the grid.
- Each lamp post's bar pushes into the hollow stud of the round brick; the clear lantern slides onto the top of the bar.
- A **“Build 2”** badge means you build that module twice.

Getting the parts

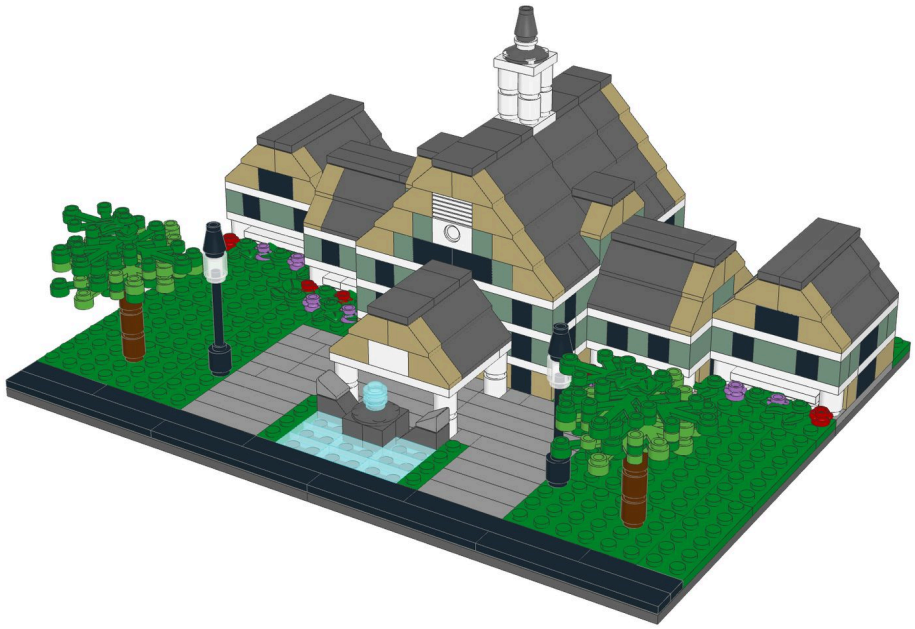

Every element is listed with its LEGO Element ID in the inventory at the back, and in `parts/` as CSV and BrickLink XML files. See “Ordering the parts” on the last pages.

1

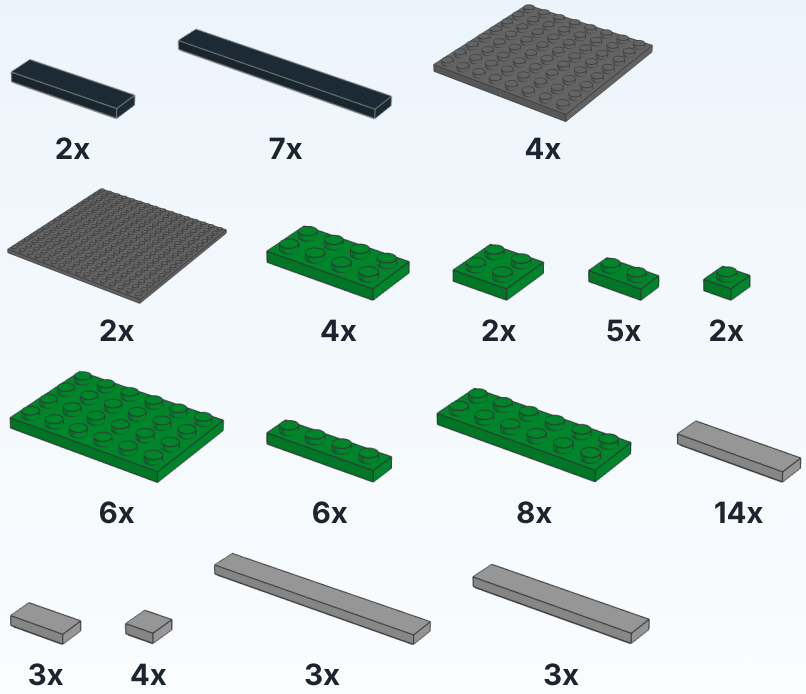

The display base

The base and the black band are the same for every mid-size kit. The carriage loop and the lawns go on next; the drive tiles tie the base plates together.

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

1. Go to **lego.com → Pick and Build → Pick a Brick** and choose **Upload list**.
2. Upload `parts/pick_a_brick_upload.csv`. It lists all 70 kinds of element by Element ID with their quantities, and fills your bag in one go.
3. If anything isn't matched, upload `pick_a_brick_upload_retry.csv`. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in Pick a Brick's Bestseller range, which ships from the US warehouse.

2 · BrickLink or Rebrickable (backup)

The files in `parts/` cover anything Pick a Brick does not stock:

- `bricklink_wanted_list.xml`: BrickLink → Want → Upload.
- `rebrickable_parts.csv`: import it as a Rebrickable part list, then compare stores.
- `pick_a_brick_mapping.csv`: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 561 elements with a known price come to about **US$73**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Ground:** any colour of tiles works for the base around the building.
- **Hidden parts:** bricks and plates inside the building can be any colour.
