BUILD INSTRUCTIONS

Saratoga Springs Resort

A mid-size display model in LEGO® bricks

681
pieces

26 × 19 cm
32 × 24 studs

Unofficial fan design

An unofficial fan-designed model (MOC), inspired by Disney's Saratoga Springs Resort & Spa at Walt Disney World. It is not affiliated with, sponsored or endorsed by The LEGO Group or Disney. LEGO® is a trademark of The LEGO Group.

About this model

The Carriage House at Saratoga Springs, the lobby building, as it stands on its street corner, in the colours the resort wears today: mint-green shingle with tan trim, a deeper green under the porch, red-and-white stripes and warm brown roofs. The round lobby tower is the corner. It is built as an octagon with clipped corners; its tan band, front door and white louvre face the corner, under a tan cornice with a flared brown eave, a brown cone roof and a black finial. A porch on slim tan posts wraps round the tower's front and right behind a red-and-white striped edge. From the tower the long wing runs along the front street to the left: a balcony section with tan posts, a brown railing, a pale yellow upper storey and a tan gable; a mint-green shop with a green awning and a mint dormer with a small window; and a cream building with red awnings, a white-trimmed gable and a white cupola with a spire on its terracotta roof. A shorter pale wing runs from the tower toward the back along the right street. Chunky river-stone pillars carry a low white picket fence along the front and a white privacy fence down the right side, with a shade tree behind, and the two sidewalks meet at the corner.

Pieces	681 elements, 98 kinds, 12 colours
Size	32 × 24 studs (25.6 × 19.2 cm), 12 cm tall
Scale	about 1:250 (one storey = 4 plates, 1 stud ≈ 2 m), like the large resort models
Build time	about 2½ hours
Model files	`saratoga_springs_midsize.mpd` (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The display base, the sidewalks, the paving and the lawns
2. The Carriage House tower on the corner, with its porch
3. The mint-green wing: the shop and the balcony section
4. The cream building
5. The back wing
6. The fences and the garden: the stone pillars, the picket and privacy fences, shrubs and a tree

Every kit in the mid-size resort collection stands on the same 32×24 display base with a black front band. Each section starts with a list of the parts it needs.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- The tower is an octagon: its walls step in at the corners. Lay each course side by side with the picture; its joints cross those of the course below.
- The tan band runs up the outer corner of the step on the tower's front-right face. Each tan brick reaches one stud into the wall, so the mint bricks beside it lock it in.
- The porch's brown roof plates reach from the posts onto the tower walls. The striped edge alternates red and white, a plate and a slope on each.
- Every plate of the tan cornice reaches back onto the wall below it. The small brown slopes round its edge go on before the cone.
- The cone roof goes up one ring of slopes at a time. Hidden brown bricks under a few slopes hold up the ring above; they have a step of their own.
- The tower's finial and the cupola's spire sit on the centre stud of a 2×2 dish, half a stud off the grid. The cupola's white bar pushes into the top of its cone.
- A **“Build 6”** badge means you build that module six times.

Getting the parts

Every element is listed with its LEGO Element ID in the inventory at the back, and in `parts/` as CSV and BrickLink XML files. See “Ordering the parts” on the last pages.

1

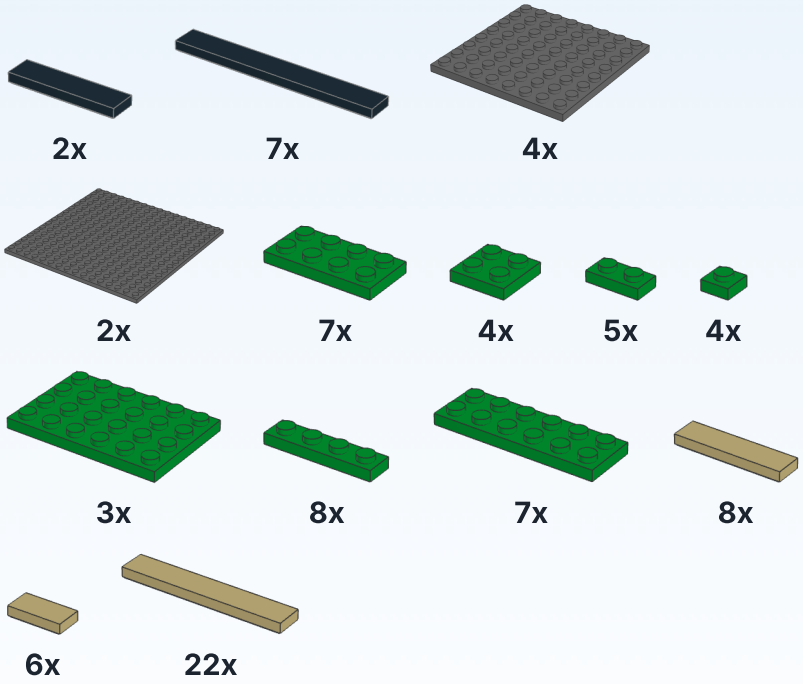

The display base

The base and the black band are the same for every mid-size kit. The sidewalks along both streets, the paving in front of the shops and the lawns go on next; the sidewalk tiles tie the base plates together.

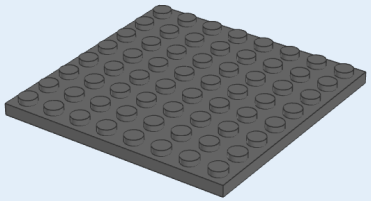

89 elements in this section

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

1. Go to **lego.com → Pick and Build → Pick a Brick** and choose **Upload list**.
2. Upload `parts/pick_a_brick_upload.csv`. It lists all 98 kinds of element by Element ID with their quantities, and fills your bag in one go.
3. If anything isn't matched, upload `pick_a_brick_upload_retry.csv`. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in Pick a Brick's Bestseller range, which ships from the US warehouse.

2 · BrickLink or Rebrickable (backup)

The files in `parts/` cover anything Pick a Brick does not stock:

- `bricklink_wanted_list.xml`: BrickLink → Want → Upload.
- `rebrickable_parts.csv`: import it as a Rebrickable part list, then compare stores.
- `pick_a_brick_mapping.csv`: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 681 elements with a known price come to about **US$77**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Ground:** any colour of tiles works for the base around the building.
- **Hidden parts:** bricks and plates inside the building can be any colour.
