

BUILD INSTRUCTIONS

Grand Floridian Resort

550
pieces

26 × 19 cm
32 × 24 studs

A mid-size display model in LEGO® bricks

Unofficial fan design

An unofficial fan-designed model (MOC), inspired by Disney's Grand Floridian Resort & Spa at Walt Disney World. It is not affiliated with, sponsored or endorsed by The LEGO Group or Disney. LEGO® is a trademark of The LEGO Group.

About this model

The main building of the Grand Floridian with its entrance: the five-storey central block wrapped in white verandas, its steep red roof and big front gable with an arched window, and the cupola with its red spire on top; two lower wings with verandas, hipped red roofs, a white-trimmed gable and a dormer each; and the porte-cochere over the drive, with white columns, an arched entrance and its own red gable. A round fountain and two palms stand on the lawn in front.

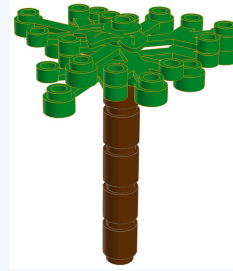

Pieces	550 elements, 58 kinds, 8 colours
Size	32 × 24 studs (25.6 × 19.2 cm), 14 cm tall
Scale	about 1:250 (one storey = 4 plates, 1 stud ≈ 2 m), like the large resort models
Build time	about 2 to 2½ hours
Model files	grand_floridian_midsize.mpd (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The display base, the drive and the lawns
2. The main building
3. The left wing
4. The right wing
5. The porte-cochere
6. The fountain and the palms

Every kit in the mid-size resort collection stands on the same 32×24 display base with a black front band. Each section starts with a list of the parts it needs.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- Each storey takes three steps: the walls (black behind the veranda), the veranda railing with its slim round columns, then the white floor band that ties them together. Keep black and white parts in separate trays.
- The two wings are mirror images, each with its own pages: the gable goes at the outer end.
- Roofs go up one row of slopes at a time. Red bricks hidden under the gables and dormers have a step of their own, just before the slopes that rest on them.
- The cupola's spire sits on a 1×2 plate with one stud, laid across the two below it.
- A **"Build 2"** badge means you build that module twice.

Getting the parts

Every element is listed with its LEGO Element ID in the inventory at the back, and in parts/ as CSV and BrickLink XML files. See "Ordering the parts" on the last pages.

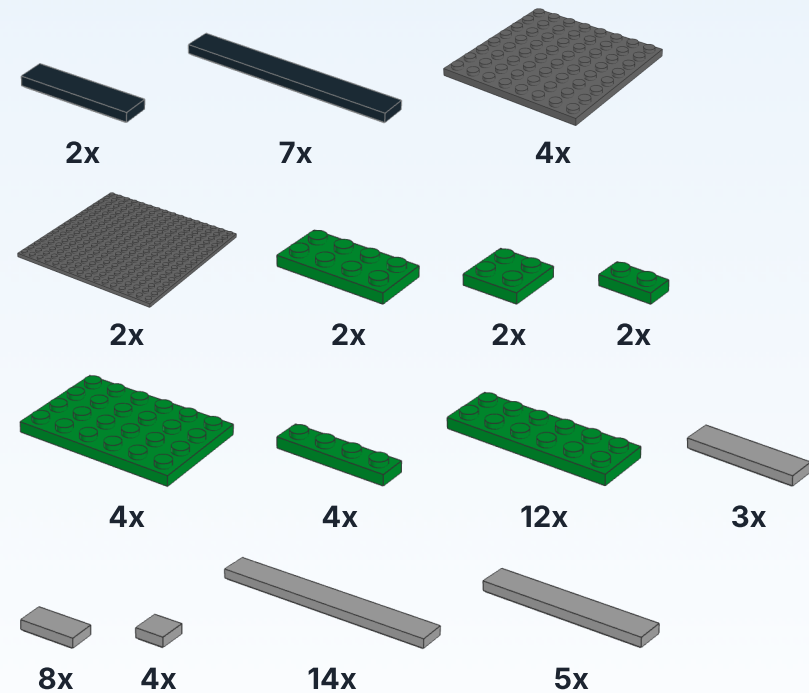

1

The display base

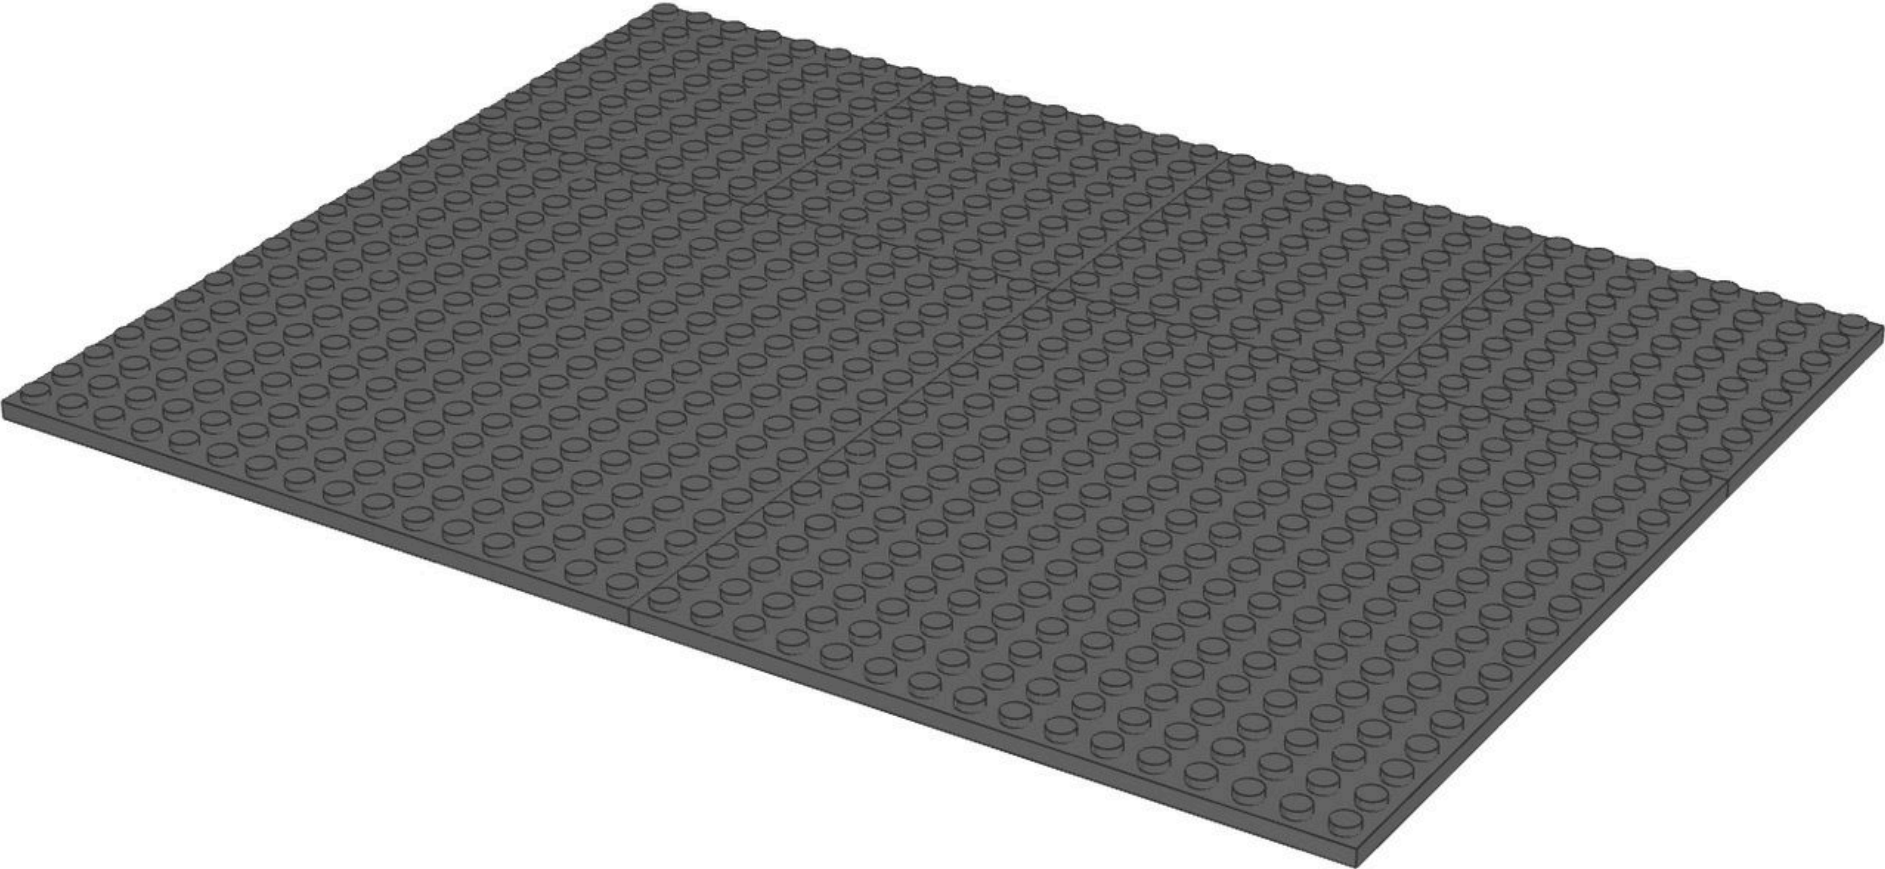

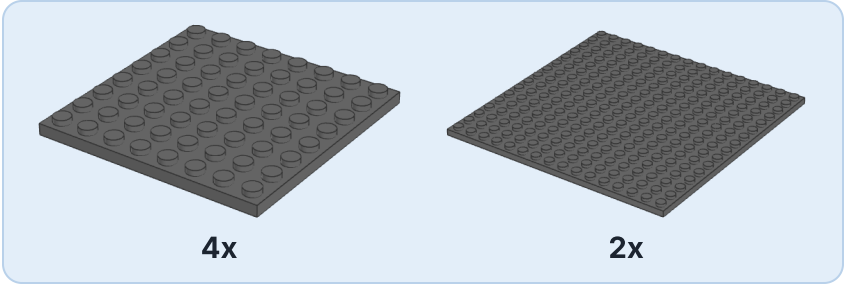

The base and the black band are the same for every mid-size kit. The drive, the walk and the lawns go on next; the drive tiles tie the base plates together.

The cupola stands on the four open studs at the top of the gable.

30

Lay the third 1×2 plate with one stud across the two below it; the cone goes on its stud.

31

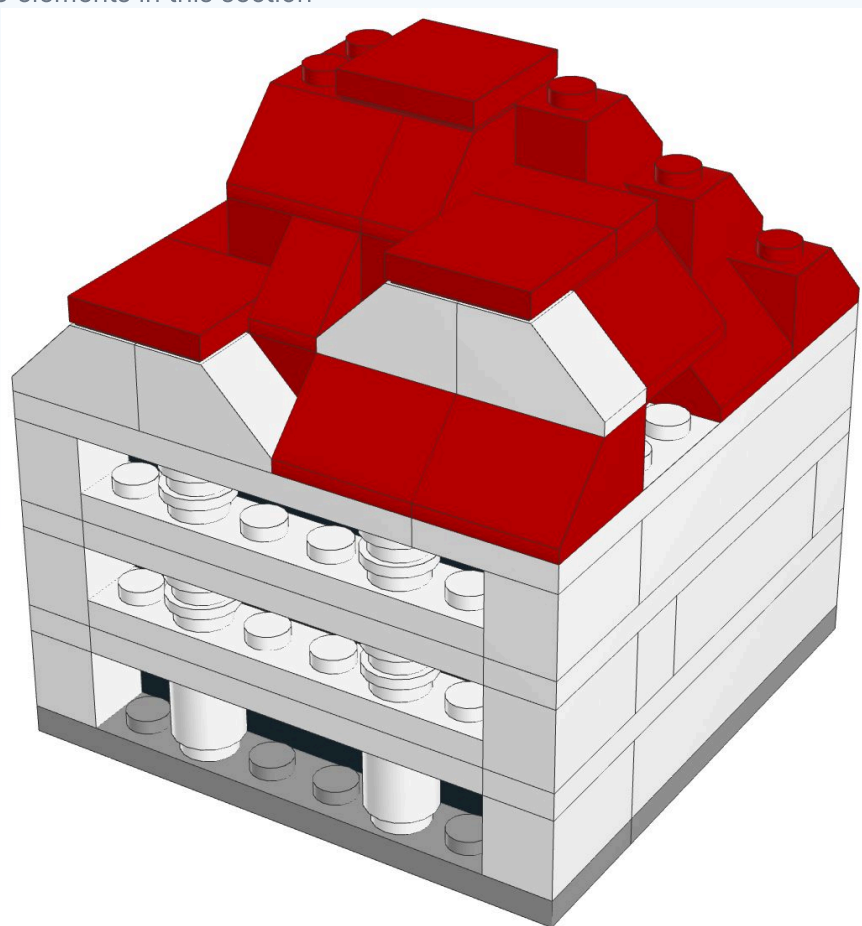

3

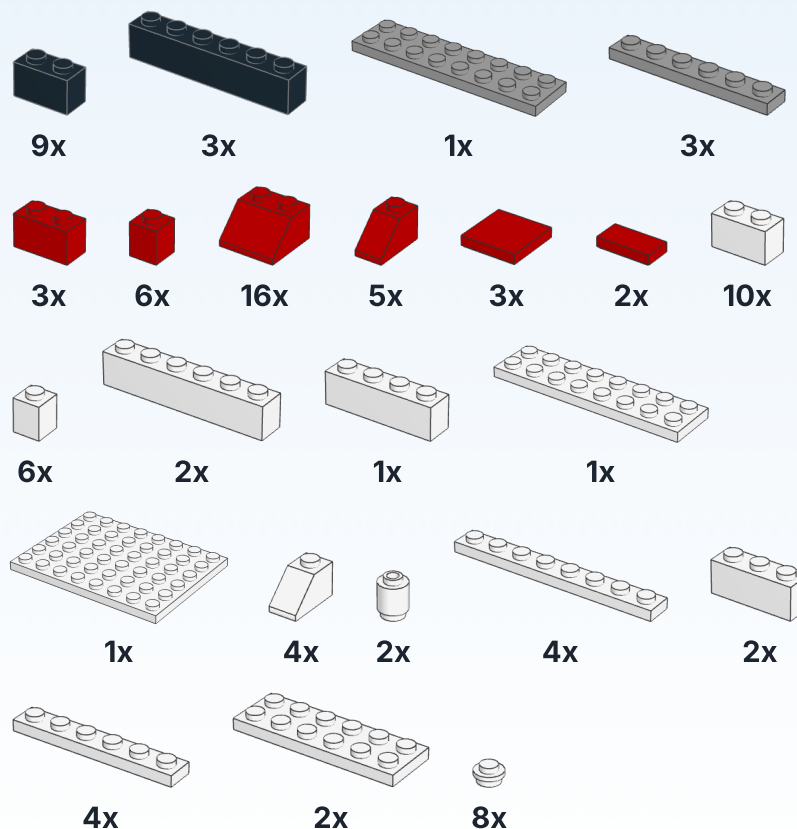

The left wing

Three storeys behind a veranda, under a hipped red roof with a white-trimmed gable at the outer end and a dormer next to the main building.

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

- 1. Go to **lego.com** → **Pick and Build** → **Pick a Brick** and choose **Upload list**.
- 2. Upload parts/pick_a_brick_upload.csv. It lists all 58 kinds of element by Element ID with their quantities, and fills your bag in one go.
- 3. If anything isn't matched, upload pick_a_brick_upload_retry.csv. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
- 4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element in this kit was in Pick a Brick's Bestseller range, which ships from the US warehouse.

2 · BrickLink or Rebrickable (backup)

The files in parts/ cover anything Pick a Brick does not stock:

- bricklink_wanted_list.xml: BrickLink → Want → Upload.
- rebrickable_parts.csv: import it as a Rebrickable part list, then compare stores.
- pick_a_brick_mapping.csv: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 550 elements with a known price come to about **US\$77**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Ground:** any colour of tiles works for the base around the building.
- **Hidden parts:** bricks and plates inside the building can be any colour.

Colour names
