

BUILD INSTRUCTIONS

Grand Floridian Resort

1,498
pieces

38 × 26 cm
48 × 32 studs

A micro-scale display model in LEGO® bricks

Unofficial fan design

An unofficial fan-designed model (MOC), inspired by Disney's Grand Floridian Resort & Spa at Walt Disney World. It is not affiliated with, sponsored or endorsed by The LEGO Group or Disney. LEGO® is a trademark of The LEGO Group.

About this model

This model shows the main building of the Grand Floridian: the seven-storey central block with its white verandas, steep front gable, twin chimneys and red-spired cupola; the two guest wings under hipped red roofs with gables and dormers; and the porte-cochere with its arched entrance. Palms, green lamp posts, a fountain and a red brick walk fill the entrance garden.

Pieces	1,498 elements, 70 kinds, 11 colours
Size	48 × 32 studs (38.4 × 25.6 cm), 16 cm tall at the spire
Scale	about 1:250 (one storey = 4 plates)
Build time	about 6 to 8 hours
Model files	grand_floridian.mpd (LDraw). Opens in BrickLink Studio, LeoCAD and LDCad.

How the build is organised

1. The grounds: base, drive, brick walk and lawns
2. The central block
3. The guest wings (build 2)
4. The porte-cochere
5. Gardens, palms and lamp posts

The central block and the guest wings are built on their own and then set on the base. Every section starts with a list of the parts it needs, so you can sort them before you start.

Reading the steps

Parts added in each step are **outlined in orange**. The blue box shows the parts for that step and how many of each you need. Part pictures are drawn to scale; plates longer than 8 studs are drawn at half size.

Tips

- Each storey takes three steps: the wall, then the veranda (a white railing with slim round columns), then the white floor band that ties them together.
- The walls behind the verandas are mostly black bricks. Keep black and white parts in separate trays.
- A **"Build 2"** badge means you build that module twice: the two guest wings are identical.
- Roofs go up one row of slopes at a time. Where a gable meets a roof, a few red 1×1 bricks go in first as hidden supports, in a step of their own just before the slopes that rest on them.

Getting the parts

Every element is listed with its LEGO Element ID in the inventory at the back, and in parts/ as CSV and BrickLink XML files. See "Ordering the parts" on the last pages.

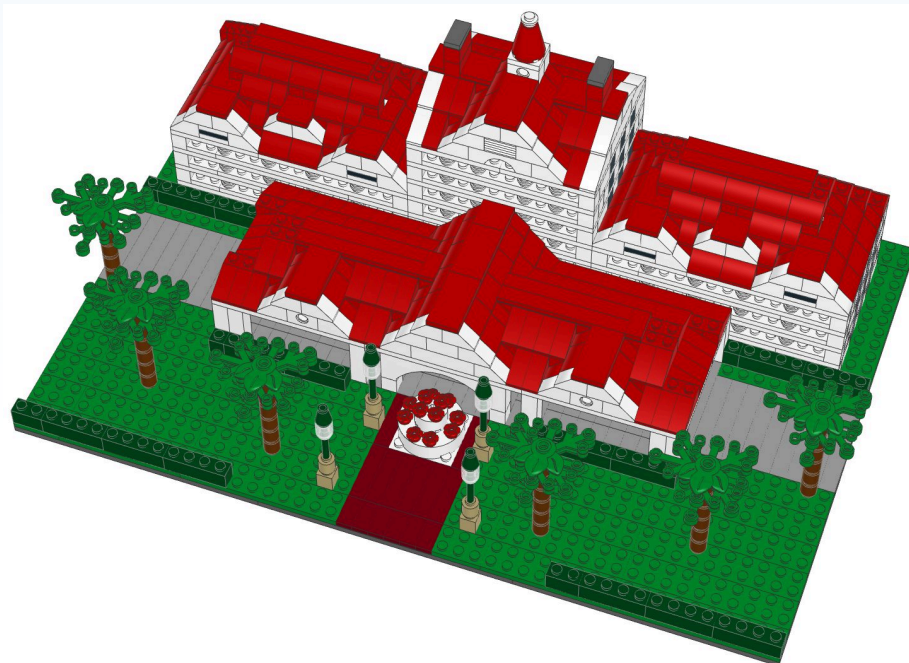

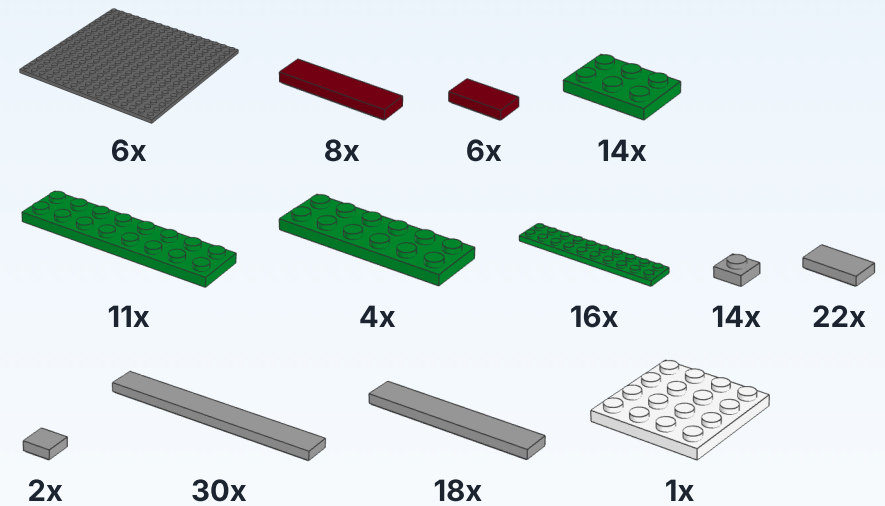

1

The grounds

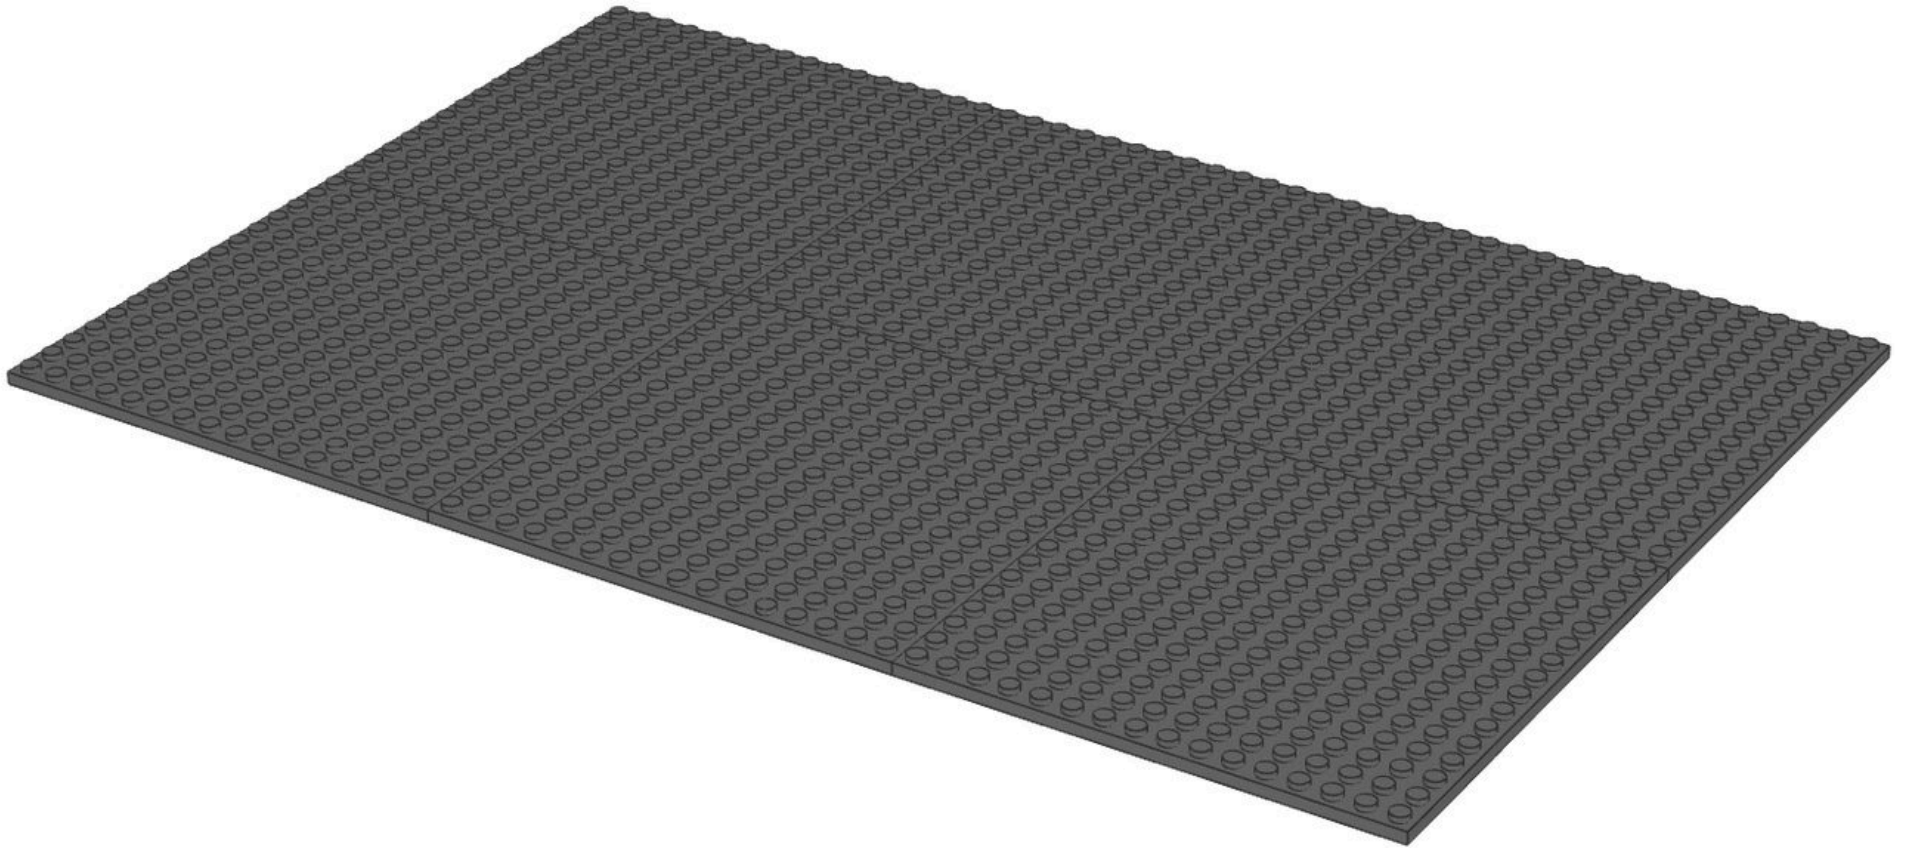

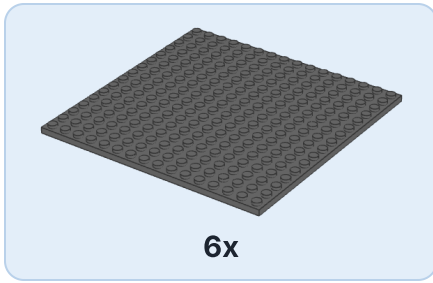

Six 16 × 16 plates form the base. The drive, lawns and the brick walk then lock them together.

Ordering the parts

1 · LEGO Pick a Brick (lego.com)

1. Go to **lego.com** → **Pick and Build** → **Pick a Brick** and choose **Upload list**.
2. Upload parts/pick_a_brick_upload.csv. It lists all 70 kinds of element by Element ID with their quantities, and fills your bag in one go.
3. If anything isn't matched, upload pick_a_brick_upload_retry.csv. It has LEGO's newer IDs for the same parts; many white parts got new IDs in 2025. Or search the inventory's design number and colour.
4. Bestseller elements can be ordered up to 999 at a time. Many Standard elements are limited to 10 per order. Every element this model needs more than 10 of was in the Bestseller range. The six Standard elements (the entrance arch, the fountain's round bricks, the spire cone, and the lamp posts' bars and caps) are needed 4 or fewer times each.

2 · BrickLink or Rebrickable (backup)

The files in parts/ cover anything Pick a Brick does not stock:

- bricklink_wanted_list.xml: BrickLink → Want → Upload.
- rebrickable_parts.csv: import it as a Rebrickable part list, then compare stores.
- pick_a_brick_mapping.csv: how each part maps to Pick a Brick, with the evidence, the last price seen and a BrickLink backup.

What it costs

At Pick a Brick prices seen in 2022–2025, the 1,486 elements with a known price come to about **US\$186**, plus shipping. LEGO raised prices on about a third of Pick a Brick elements in 2026, so expect to pay more. The bag total after uploading shows the current price.

Order a few spare 1×1 bricks and plates, because small parts go missing easily.

Substitutions

- **Base:** six 16×16 plates. Any plates that cover 48×32 studs will do.
- **Hidden parts:** the floor slabs inside the buildings and the red 1×1 supports inside the roofs can be any colour.
- **Lawn:** any green plates. Keep the joints away from the joints in the base.
- **Lamp posts:** black 3L bars work if dark green ones are hard to find.
